

Legislative Bill Glossary

A condensed reference for all 12 bills in the RDNC legislative sequence
2026 · Covers Bills 1–12 across Phase I, Phase II, and Phase III

This document sits between the full bill frameworks and the public-facing one-pager. It is designed for staffers, journalists, coalition partners, and anyone who needs to understand the full legislative scope before deciding which bill to examine in depth. Each bill card summarizes what the bill does, which legislative vehicle it uses and why, the core message, the primary attack surface, and the fallback position if the primary strategy faces opposition.

For full bill text and counsel notes, see Legislative Documents Leg02–Leg14. For the strategic sequencing logic and readiness assessment, see Leg01 (Legislative Sequencing Map v3).

At a Glance — All 12 Bills

#	Bill Title	Short Title	Vehicle	Phase	Core Message
1	Cost of Living Reduction & Tax Simplification Act of 2027	COLT Act	Reconciliation	Phase I	Making taxes easier, not higher.
2	Infrastructure & Industrial Capacity Act of 2027	IIC Act	Reconciliation	Phase I	Building what America needs. Jobs that can't be offshored.
3	Anti-Corruption & Fair Markets Act of 2027	ACFM Act	Standalone	Phase I	Same rules for everyone.
4	Family Stability & Workforce Investment Act of 2029	FSW Act	Reconciliation	Phase II	We did what we said. It worked. Now we expand it.
5	Billionaire Wealth & Digital Services Tax Act of 2030	BWDS Act	Reconciliation	Phase II	Fair contribution from those who benefited most.
6	Public Option Healthcare Expansion Act of 2030	POHE Act	Standalone	Phase II	If you like your plan, keep it. If you want a better option, one exists.
7	Digital Rights & Data Fiduciary Act of 2029	DRDO Act	Standalone	Phase II	Your data is yours. And your kids' brains are not a product.
8	Housing & Community Investment Act of 2029	HCI Act	Partnership	Phase II	Homes for Americans. Not investment portfolios.
9	Universal Coverage Transition Act	UCT Act	Standalone	Phase III	The public option worked. This is what working looks like at scale.
10	American Innovation & Public Equity Act	AIPE Act	Standalone	Phase III	AI was built on American research and American data. Americans share in what it builds.
11	Democratic Institutions Reform Act	DIR Act	Constitutional	Phase III	Protecting the gains we made. Making sure the next government can't undo what this one built.
12	National Firearm Standards Act of 2030	NFSA Act	Standalone	Phase II	The military will train you for free. The right is preserved. Accountability comes with it.

■ Phase I (0–5 yr) ■ Phase II (5–15 yr) ■ Phase III (15–30 yr) — introduce only after preconditions met

PHASE I — FOUNDATION (0–5 Years)

Objective: Deliver fast, visible wins that are politically difficult to reverse. Everything in Phase II depends on Phase I succeeding. Bills 1, 2, and 3 should be introduced within the first 18 months of a reform administration.

Bill 1 · COLT Act · Phase I (0–5 yr) · Track A — Budget Reconciliation Cost of Living Reduction & Tax Simplification Act of 2027

What it does	Why this vehicle	Key facts
- Pre-fills tax returns for wage earners using data the IRS already has - Expands enforcement targeting income above \$400K — no new rates - Caps childcare costs at 7% of household income - Funds provider supply grants in childcare deserts	Budget Reconciliation All provisions carry direct budget impact. Bypasses filibuster. Modeled on IRA (2022) and TCJA (2017) precedent. Fallback: Pre-filled returns only if enforcement is stripped. Childcare provision must be protected — it is the constituency anchor.	Message: "Making taxes easier, not higher." Depends on: None — this is the anchor bill. Attack: "IRS expansion." "Government doing your taxes." "Childcare spending." Full doc: Leg02 — COLT Act

Bill 2 · IIC Act · Phase I (0–5 yr) · Track A — Budget Reconciliation Infrastructure & Industrial Capacity Act of 2027

What it does	Why this vehicle	Key facts
- Modernizes the national energy grid and funds domestic clean energy - Funds domestic semiconductor fabrication and next-gen battery manufacturing - Modernizes airports and electrifies USPS fleet - Dramatically expands federal inspector and auditor workforce	Budget Reconciliation All provisions budget-scoreable. National security framing provides reconciliation latitude. Ideally passed in same package as Bill 1. Fallback: Semiconductor and inspector expansion are the core — most defensible under Byrd Rule. Grid and USPS can be separated.	Message: "Building what America needs. Jobs that can't be offshored." Depends on: Bill 1 political momentum. Attack: "Too expensive." "Government picking winners." "Green energy mandate." Full doc: Leg03 — IIC Act

Bill 3 · ACFM Act · Phase I (0–5 yr) · Track C — Standalone Legislation Anti-Corruption & Fair Markets Act of 2027

What it does	Why this vehicle	Key facts
- Bans congressional stock trading with criminal penalties and disgorgement - Mandates real-time financial disclosure for all senior officials - Establishes executive criminal liability for repeat corporate violators (five-tier graduated framework) - Strengthens revolving door restrictions to 4 years for senior officials	Standalone (60-vote Senate) Deliberately requires a floor vote. The power is in the recorded vote — every senator who opposes it is on record defending insider trading. Fallback: Enhanced civil penalties + mandatory disgorgement if criminal penalties fail. Do not accept delay.	Message: "Same rules for everyone." Depends on: Political capital from Bills 1 & 2. Public pressure campaign launched simultaneously. Attack: "Overreach." "Already have disclosure rules." Quiet bipartisan resistance. Full doc: Leg04 — ACFM Act

PHASE II — STRUCTURAL EXPANSION (5–15 Years)

Objective: Shift structural incentives using the political capital built in Phase I. Each reform expands or deepens systems that are already proven popular. High risk of backlash — sequence by political capital and avoid introducing all six simultaneously.

Bill 4 · FSW Act · Phase II (5–15 yr) · Track A — Second Reconciliation Window Family Stability & Workforce Investment Act of 2029

What it does	Why this vehicle	Key facts
- Extends childcare credit toward near-universality — raises income thresholds - Links unemployment benefits to free vocational and behavioral health training - Expands Earned Income Tax Credit to cover more childless workers - Creates corporate tax credits for employee training investment	Budget Reconciliation Second reconciliation window. Extends what Bill 1 proved. Does not introduce a new program — expands a popular one. Fallback: Training credits can be separated as standalone legislation if they face opposition.	Message: "We did what we said. It worked. Now we expand it." Depends on: COLT Act operational; childcare constituency established and defending Phase I wins. Attack: "More spending." "Dependency." Corporate training credit: "corporate welfare." Full doc: Leg05 — FSW Act

Bill 5 · BWDS Act · Phase II (5–15 yr) · Track A — Second Reconciliation Window Billionaire Wealth & Digital Services Tax Act of 2030

What it does	Why this vehicle	Key facts
- Digital services levy on large platforms (search, social, marketplace, advertising) - Billionaire Income Tax (BIT) on annual accrual basis — mark-to-market and deemed realization. NOT a net-worth property tax. - Closes offshore account and shell corporation loopholes - Revenue directed to healthcare fund, Social Security, and Universal Basic Investment	Budget Reconciliation Revenue provisions qualify for reconciliation. Lead with digital services levy — highest public sympathy. International coordination pre-launch reduces capital flight risk. Fallback: Mark-to-market capital gains tax on unrealized gains above \$1B if wealth tax faces constitutional challenge.	Message: "Fair contribution from those who benefited most." Depends on: Phase I coalition established. International coordination with EU, UK, Canada initiated. Attack: "Capital flight." "Punishing success." Wealth tax constitutional challenge. Full doc: Leg06 — BWDS Act

Bill 6 · POHE Act · Phase II (5–15 yr) · Track B — Sectoral Legislation Public Option Healthcare Expansion Act of 2030

What it does	Why this vehicle	Key facts
- Creates a public insurance option for individuals and small businesses - Launches first in rural markets and small business pools — fewest insurer alternatives - Automatic expansion trigger: if premiums drop by target, expansion is statutory - Private insurers may participate under standardized benefit and pricing rules	Standalone (60-vote Senate) Wedge strategy — start where private coverage is weakest. Automatic expansion built into the bill; no additional legislation required if performance thresholds are met. Fallback: Stronger ACA-style expansion if public option is blocked. Sets up the next attempt.	Message: "If you like your plan, keep it. If you want a better option, one exists." Depends on: COLT Act operational; Phase I built public trust in government program delivery. Attack: "Government takeover." "Destroy private insurance." "Socialized medicine." Full doc: Leg07 — POHE Act

Bill 7 · DRDO Act · Phase II (5–15 yr) · Track B — Sectoral Legislation Digital Rights & Data Fiduciary Act of 2029

What it does	Why this vehicle	Key facts
- Establishes data portability rights — take your data when you leave a platform - Mandates meaningful consent:	Standalone Legislation GDPR-aligned deliberately — leverages existing compliance infrastructure. FTC Act section 5 is the enforcement foundation. Title V minor protections are the most bipartisan	Message: "Your data is yours. And your kids' brains are not a product." Depends on: Executive Order 2 (Data Transparency baseline) operational. Attack: "Innovation-killing." "Nanny state."

specific, informed, freely given, and revocable • Criminalizes mass unauthorized data harvesting above a volume threshold • Creates early-stage compensation framework — FTC pilot, mandatory rules follow • Title V: Digital Minor Protection Standards — three-tier framework (under-13 COPPA enforcement; 13–15 full algorithmic and advertising prohibition; 16–17 default chronological with opt-in). Full algorithmic access at 18.	element — 80%+ public support across party lines. Fallback: Portability and consent provisions survive even if compensation framework is removed. Title V minor protections can pass as standalone.	Tech and data broker opposition — but minor protection provisions have broad bipartisan cover. Full doc: <i>Leg08 — DRDO Act (Title V: Digital Minor Protection Standards)</i>
--	--	---

Bill 8 · HCI Act · Phase II (5–15 yr) · Track C — Federal-State Partnership Housing & Community Investment Act of 2029

What it does	Why this vehicle	Key facts
• Federal grant incentives for states adopting corporate home ownership restrictions • National registry of corporate-owned residential properties • Competitive grants for localities that reduce exclusionary zoning • Affordable housing supply expansion grants, priority to qualifying states	Federal Incentive / State Partnership South Dakota v. Dole (1987) is the constitutional authority. Federal funding conditions on state policy adoption — how the interstate highway system and drinking age were nationalized. Fallback: Expand federal inspector mandate for corporate ownership data collection. Data is the precondition for state action.	Message: <i>"Homes for Americans. Not investment portfolios."</i> Depends on: COLT Act housing provisions; Bill 2 inspector expansion collecting ownership data. Attack: "Government controlling property." "Anti-investment." Real estate investment industry. Full doc: <i>Leg09 — HCI Act</i>

Bill 12 · NFSA Act · Phase II (5–15 yr) · Track B — Standalone Legislation National Firearm Standards Act of 2030

What it does	Why this vehicle	Key facts
• Track A (hunting/sporting, state-administered, manual-action long guns only) preserved completely unchanged • Track B: Federal Civilian Ownership Certificate, delivered free through military/Guard, covers handguns and semi-automatics • Tiered renewal schedule proportional to weapon risk: 10 years (manual-action) down to 2 years (NFA-regulated automatic weapons) • Grandfathered weapon transition: keep indefinitely, sell to government buyback at fair market value, upgrade via Track B certification, or inherit within immediate family with ATF notification	Standalone (60-vote Senate) Most constitutionally complex bill in the Phase II sequence. Full Bruen (2022) analysis required before introduction. Second Amendment savings clause cites Heller, McDonald, and Bruen by name. Fallback: Track A alone (hunting license clarification and handgun exclusion) can pass as standalone and establishes the jurisdictional framework. Track B follows in next legislative window.	Message: <i>"The military will train you for free. The right is preserved. Accountability comes with it."</i> Depends on: Phase I political capital; anti-corruption bill credibility established; no federal gun bill should precede the accountability and anti-corruption wins. Attack: "Gun grab." "Registry by the back door." "Punishing law-abiding owners." All pre-answered: no confiscation, no registry, military delivers it free. Full doc: <i>Leg14 — NFSA Act (Bill 12)</i>

PHASE III — SYSTEMIC TRANSFORMATION (15–30 Years)

Objective: Lock in structural convergence toward globally proven systems. These bills are the destination — generational reforms that depend on Phase I and II having created the political conditions. Attempting any of these before their preconditions are met will fail and damage the entire agenda.

Bill 9 · UCT Act · Phase III (15–30 yr) · Track A — Healthcare Full Transition Universal Coverage Transition Act

What it does	Why this vehicle	Key facts
- Age-band expansion: 55–64 first, stepwise down every 2 years - No mandate — existing plans guaranteed during transition - Provider reimbursement above Medicare rates for 7-year transition period - Multiple revenue streams: payroll, AI fund returns, BWDS revenues, DoD reallocation	Standalone — requires exceptional conditions Only viable after Public Option has operated for 4+ years and demonstrated competence. Do not introduce before preconditions are met. Fallback: Permanent hybrid system — public option and private plans coexist indefinitely.	Message: "The public option worked. This is what working looks like at scale." Depends on: Bill 6 public option operational 4+ years. Reform-aligned Senate supermajority or political crisis window. Attack: "Government takeover." "Bankrupt the country." "Loss of doctor choice." Full doc: Leg10 — UCT Act

Bill 10 · AIPE Act · Phase III (15–30 yr) · Track B — AI & Capital Framework American Innovation & Public Equity Act

What it does	Why this vehicle	Key facts
- Establishes the American Public Innovation Fund — sovereign wealth fund - Voluntary co-investment: companies exchange minority equity for government contract access - Data licensing fees for AI trained on government data or public research - Fund returns directed to healthcare, Social Security, and Universal Basic Investment	Standalone Legislation Voluntary co-investment first — mandatory contributions after model proves out. Norway Government Pension Fund Global is the structural model. Fallback: Tax-based redistribution of AI profits without government equity ownership.	Message: "AI was built on American research and American data. Americans share in what it builds." Depends on: AI sector mature enough for equity valuation. Phase I and II revenue base operational. Attack: "Government takeover of tech." "Capital flight." "Innovation killer." Full doc: Leg11 — AIPE Act

Bill 11 · DIR Act · Phase III (15–30 yr) · Track C — Governance Reform Democratic Institutions Reform Act

What it does	Why this vehicle	Key facts
- Supreme Court 18-year term limits via senior status model - Campaign finance: statutory track (if Citizens United narrowed) or constitutional amendment - Automatic voter registration, ranked-choice voting, independent redistricting - Expanded ethics standards building on Anti-Corruption Act (Bill 3)	Constitutional Amendment or Statutory Most constitutionally complex bill in the sequence. Track selection depends on court composition at time of introduction. Do not introduce without 60+ Senate votes identified. Fallback: Ethics and transparency expansion only. State-level RCV and redistricting reform continues in parallel.	Message: "Protecting the gains we made. Making sure the next government can't undo what this one built." Depends on: Phase I and II politically entrenched. At least 2 Supreme Court appointments have shifted landscape. Attack: "Power grab." "Court packing." "Rigging elections." Full doc: Leg12 — DIR Act

REF_RDNC_Leg00_BillGlossary_2026_3 · Legislative Ecosystem · Summary Reference · 2026

Full bill frameworks: Leg02–Leg14. Strategic sequencing and readiness: Leg01. Core policy source: American Renewal Agenda (ARA) — RDNC Framework v25 (REF_RDNC_Framework_v25_2026).

v3 corrections: "11 bills" corrected to "12 bills" (was a stale header count; all 12 bills were already listed correctly in the bill cards). Framework version reference corrected v20 → v25. Originally conceived and authored by a concerned American citizen. Developed with the assistance of Claude (Anthropic). The ideas belong to anyone willing to fight for them.
