370 Total Sources	20 Categories	8 Audits Logged (Audits 1–8)
---	-------------------------------------	--

Source-type legend. **OECD** intergovernmental comparative data · **Gov/Agency** US government primary sources · **Congress** CRS reports, legislation, committee reports · **Peer Review** academic journals · **Think Tank** research institutions · **Law/Court** statutes, regulations, court decisions · **UN/Intl** international bodies · **NGO/Civil** civil society research · **Journalism** context only, not scoring.

Tier overlay coverage: all sources. Evidence-tier ratings (A authoritative non-partisan; B peer-reviewed or major think-tank with documented methodology; C use with caution; D partisan-aligned outlier, cite only with explicit advocacy framing) are present on **all 371 entries**. Sources 300–372 received tier ratings at registration in v9 (Audit 6); Sources 1–297 (and 153a/153b) received tier ratings retroactively in v11 via **Audit 8 — Retroactive Tier Overlay** (May 3, 2026). Distribution: 265 A · 87 B · 17 C · 2 D = 371. Tier definitions remain unchanged from v9. See the Audit Log entry for Audit 8 at document close for full per-category breakdown and rationale.

Aggregated from: REF_RDNC_Framework_v26_Sourced_2026_2 · REF_RDNC_CitationAudit_P2025_DNC_2026 · REF_RDNC_CapitalReport_EconomicFeasibility_2026_3 · REF_RDNC_SourceReferenceGuide_2026 (original, 82 sources). Sources 298 and 299 are intentionally unassigned to preserve the v8/v9 numbering boundary. Source 153 has been split into 153a and 153b; Source 91 is augmented by Source 326 — see the Maintainer Resolutions section at document close for full details. Re-verify all URLs before any public release.

1. TAXATION & FISCAL POLICY — 26 entries (v8: 1–23 + v9: 310, 316, 317)

#	Source · URL	Type	Key Finding	Documents Supported
1	OECD, Tax Administration 2025 (13th ed.) <i>oecd.org/tax/forum-on-tax-administration/</i>	OECD Tier A	Pre-filled returns standard across 85%+ of OECD administrations. 85%+ individuals and 95% of businesses file electronically. Pre-filing of wages and salaries has become a significant strategy transforming service delivery.	Prop 1 — IRS Reform & Pre-Filed Taxes; Bill 1/COLT (Part III)
2	IRS Direct File Pilot Evaluation, TIGTA (2024) <i>irs.gov/newsroom</i>	Gov/Agency Tier A	296,531 users in 2024 pilot, 94% satisfaction rate. Program met scope, cost, and schedule goals. Expanded in 2025, shut down November 2025 — demonstrating need for statutory codification.	Prop 1 — IRS Reform & Pre-Filed Taxes; Bill 1/COLT (Part III)
3	IRS Publication 5869 (2024) — Tax Gap Report <i>irs.gov/pub/irs-pdf/p5869.pdf</i>	Gov/Agency Tier A	Gross tax gap projected at \$696B annually for TY2022. Wages subject to withholding: 99%+ compliance. Self-reported income without third-party reporting: up to 57% misreporting rate.	Prop 1 — IRS Reform; Prop 4 — Close Wealth Loopholes; Prop 6 — Billionaire Tax; Bill 5/BWDS
4	Treasury, “Closing the Tax Gap” (2021) <i>home.treasury.gov/news/featured-stories/the-case-for-a-robust-attack-on-the-tax-gap</i>	Gov/Agency Tier A	\$160B+ annually in taxes the top 1% choose not to pay. Audit rates fell more sharply for high earners than EITC recipients over the past decade.	Prop 4 — Close Wealth Loopholes; Prop 1 — IRS Reform; Bill 5/BWDS; Capital Report
5	Yale Budget Lab, IRS Staffing Analysis (April 2025) <i>budgetlab.yale.edu</i>	Think Tank Tier B	Reducing IRS staffing ~28,000 increases deficit ~\$600B over 10 years. Systematic defunding of federal delivery capacity is shared root cause of tax gap and public health capacity gaps.	Prop 1 — IRS Reform; Prop 39 — Restore Federal Inspectors; Bill 1/COLT; Capital Report
6	Bipartisan Policy Center, IRS Enforcement (2025) <i>bipartisanpolicy.org</i>	Think Tank Tier B	IRS enforcement staff fell 58% between FY2010-2022 while tax gap doubled. \$20B reduction in IRS budget over 10 years increases deficit ~\$263B.	Prop 1 — IRS Reform; Capital Report
7	National Taxpayer Advocate Annual Report (2022) <i>taxpayeradvocate.irs.gov</i>	Gov/Agency Tier A	Americans spend an estimated \$31.7B annually on commercial tax preparation, cost falling disproportionately on lower-income filers.	Prop 1 — IRS Reform & Pre-Filed Taxes; Bill 1/COLT (Part III)
8	GAO, “Direct File Permanent Expansion” (December 2024) <i>gao.gov</i>	Gov/Agency Tier A	GAO endorsed permanent expansion and pre-population of IRS Direct File. Documented that the pilot met all performance targets.	Prop 1 — IRS Reform & Pre-Filed Taxes; Bill 1/COLT (Part III)
9	CBO, TCJA Extension Score (pub/61486, May 2024) <i>cbo.gov/publication/61486</i>	Gov/Agency Tier A	Permanent TCJA extension: \$4.6T FY2025-2034 (conventional). Dynamic growth feedback offsets ~3.5% of cost. Previous 2023 estimate was \$3.5T — revised upward \$1.1T.	Capital Report; Comp Docs (P2025 fiscal)
10	CRFB, “Fiscal Impact of the Harris and Trump Campaign Plans” (October 2024) <i>crfb.org/papers/fiscal-impact-harris-and-trump-campaign-plans</i>	Think Tank Tier B	Central/low/high ranges: Harris +\$3.95T (\$0.3T-\$8.3T); Trump +\$7.75T (\$1.65T-\$15.55T). Debt-to-GDP: 125% current law, 133% Harris, 142% Trump by FY2035.	Capital Report; Comp Docs (P2025/DNC fiscal)
11	CRFB, “Tax Cut Extensions Would Add \$37T to Debt by 2054” <i>crfb.org/blogs/tax-cut-extensions-would-add-37-trillion-debt-2054</i>	Think Tank Tier B	30-year debt addition: \$37T including interest. Debt-to-GDP 47.5 percentage points higher by 2054 vs. current law.	Capital Report; Comp Docs (P2025 tax cuts)
12	Penn Wharton Budget Model, 2024 Trump Campaign Proposals (August 2024) <i>budgetmodel.wharton.upenn.edu/issues/2024/8/26/trump-campaign-policy-proposals-2024</i>	Think Tank Tier B	Trump 2024 plan: +\$5.8T conventional / +\$4.1T dynamic deficits over 10 years. Long-run GDP -2.1% by 2054, wages -1.7%. Top 1% post-tax income gains \$47,000 in 2026.	Capital Report; Comp Docs (P2025 fiscal)

13	Penn Wharton Budget Model, 2024 Harris Campaign Proposals (August 2024) <i>budgetmodel.wharton.upenn.edu/issues/2024/8/26/harris-campaign-policy-proposals-2024</i>	Think Tank Tier B	Harris plan: +\$1.2T conventional / +\$2.0T dynamic deficits over 10 years. GDP -1.3% by 2034, -4% by 2054. Approx. one-fifth the deficit impact of Trump plan.	Capital Report; Comp Docs (DNC fiscal)
14	PWBM, Warren 2%/3% Wealth Tax Analysis (2021) <i>budgetmodel.wharton.upenn.edu</i>	Think Tank Tier B	Generates \$2.1T conventional/\$2.0T dynamic over 10 years. GDP -1.2% by 2050 due to capital crowd-out. Income-trigger design mitigates crowding-out documented in net-worth models.	Prop 6 — Billionaire Wealth Tax; Bill 5/BWDS
15	Saez and Zucman, UC Berkeley (2021) — Mark-to-Market Analysis <i>gabriel-zucman.eu</i>	Peer Review Tier A	Mark-to-market income-inclusion approach projected to raise \$2.0-3.0T over 10 years depending on design and avoidance assumptions.	Prop 6 — Billionaire Wealth Tax; Bill 5/BWDS
16	Mankiw & Weinzierl (2006, Journal of Public Economics) <i>sciencedirect.com/science/article/abs/pii/S0047272705001738</i>	Peer Review Tier A	Capital tax cut self-financing: ~50%. Labor tax cut: ~17%. Standard neoclassical growth model parameters. Tax cuts do not pay for themselves.	Capital Report; Comp Docs (P2025 tax cuts)
17	Concord Coalition / Holtz-Eakin Statement (May 2025) <i>concordcoalition.org</i>	Think Tank Tier B	Former CBO Director on OBBA: “This bill has essentially no impact on the trend rate of growth.” Claims of 3% growth are “numerically implausible.”	Capital Report; Comp Docs (P2025 fiscal)
18	Gale-Haldeman, Brookings/TPC (2021) — TCJA Supply-Side Effects <i>brookings.edu</i>	Think Tank Tier B	TCJA supply-side effects: “Investment growth was driven by trends unrelated to TCJA. Business formation, employment, and median wages slowed after TCJA was enacted.”	Capital Report; Comp Docs (P2025 tax cuts)
19	Tax Justice Network (2024) — Offshore Evasion <i>taxjustice.net</i>	Think Tank Tier C	Estimates \$427B in annual global tax revenue loss from offshore evasion. FATF enforcement frameworks provide international precedent for addressing it.	Prop 4 — Close Wealth Loopholes; Prop 6 — Billionaire Tax; Bill 5/BWDS
20	Moore v. United States, 602 U.S. 572 (2024) <i>supremecourt.gov/opinions/23pdf/22-800_jg6o.pdf</i>	Law/Court Tier A	CITATION CORRECTED (Audit 8): 602 U.S. 572 (not 600 U.S. 771; OT 2023 cases are in volume 602). Constitutional constraint on net-worth property tax framing. Mark-to-market and realization-event income tax approaches are more constitutionally durable. Referenced throughout BWDS Act constitutional architecture. <i>See Source 203 for full constitutional analysis.</i>	Prop 6 — Billionaire Wealth Tax; Bill 5/BWDS (constitutional; Source 203 preferred)
21	JCT 2024 — Employer Health Insurance Tax Expenditure <i>jct.gov</i>	Gov/Agency Tier A	Employer health insurance exclusion = 3rd-largest federal tax expenditure at \$252.4B. Restructuring toward training incentives is tractable in revenue-neutral framework.	Prop 36 — Shift Corporate Role from Healthcare to Training
22	Tax Policy Center, TCJA Distribution (2024) <i>taxpolicycenter.org</i>	Think Tank Tier B	71% of TCJA extension benefit accrues to top 20% of earners. Under the TCJA extension, the lowest-income quintile sees a benefit roughly 1/20th that of the highest income quintile. The flat-tax comparison referenced in related TPC analyses is a separate TPC publication; this entry covers TCJA distribution only.	Capital Report; Comp Docs (P2025 tax)
23	Tax Foundation Tariff Tracker (2026) <i>taxfoundation.org/research/all/federal/trump-tariffs-trade-war/</i>	Think Tank Tier B	Tariffs represent the largest US tax increase as a share of GDP since 1993. Revenue: \$2.0-3.3T over 10 years. Consumer cost: \$1,253-\$2,045/household. Note: post-Feb 20, 2026 SCOTUS ruling, see Sources 339–340 for Capital Report v3 superseding figures.	Capital Report; Comp Docs (P2025 tariffs)
310	TIGTA Snapshot Report 2025-IE-R027 (July 2025) <i>tigta.gov</i>	Gov/Agency Tier A	IRS workforce –25% in 2025; 31% of revenue agents departed; SB/SE division –35%. Documents the operational hollowing-out of enforcement capacity concurrent with the IRA rescissions.	Prop 1 — IRS Reform; Bill 1/COLT; Capital Report v3 Proposal 1
316	Tax Policy Center, “Taxing Wealth in the United States: Issues and Challenges” (Feb 2025) <i>taxpolicycenter.org/research-reports/taxing-wealth-united-states-issues-and-challenges</i>	Think Tank Tier A	Six wealth-tax options modeled. 1% above \$50M raises \$1.9T/10yr; combined 1% above \$50M + 2% above \$100M raises \$2.9T/10yr; flat 1% above \$30M raises \$2.8T/10yr. 85–90% of burden falls on top 1%. SUPERSEDES PWBM 2021 (Source 14) as the primary wealth-tax revenue citation.	Prop 6 — Billionaire Wealth Tax; Bill 5/BWDS; Capital Report v3 Proposal 3

317	Balkir, Saez, Yagan & Zucman, NBER WP 34170 (Aug 2025) <i>nber.org/papers/w34170</i>	Peer Review Tier A	Top 0.0002% effective tax rate 24% of economic income (2018–2020) vs. 30% population-wide and 45% for top labor earners. Splinter (Aug 2025) provides methodological counterpoint — flag both sides.	Prop 6 — Billionaire Wealth Tax; Bill 5/BWDS; Capital Report v3 Proposal 3

2. FISCAL MODELING & MACROECONOMICS — 35 entries (v8: 24–38 + v9: 300–302, 308, 309, 311, 328–338, 358–360)

Largest single category by Audit 6 additions — Capital Report v3 OBBBA modeling literature.

#	Source · URL	Type	Key Finding	Documents Supported
24	CBO, “How CBO Prepares Baseline Projections and Cost Estimates” <i>cbo.gov/publication/53550</i>	Gov/Agency Tier A	Conventional scoring holds GDP fixed. Dynamic scores apply only for legislation exceeding 0.25% of GDP threshold under House rules.	Capital Report — Methodology
25	Penn Wharton Budget Model, OLG Model Documentation <i>budgetmodel.wharton.upenn.edu/model/dynamic-olg/</i>	Think Tank Tier B	PWBM couples microsimulation with dynamic OLG general-equilibrium model. Publishes conventional and dynamic estimates for every analysis.	Capital Report — Methodology
26	Auerbach-Gorodnichenko (NBER WP 17447) <i>nber.org/papers/w17447</i>	Peer Review Tier A	Spending multipliers: 2.5-3.5 in recession, near zero in expansion. Direction consistent across methodology; magnitude disputed.	Capital Report; Prop 38 — Renewable Energy; Prop 45 — High-Speed Rail
27	Zandi/Moody’s Analytics — Fiscal Multiplier Table <i>moodyanalytics.com</i>	Think Tank Tier B	SNAP multiplier 1.73 (recession). UI extension 1.61. Federal infrastructure 1.5-1.6 (recession). Tax cuts to high income 0.27-0.37.	Capital Report — Fiscal Multipliers
28	CBO WP 2012-08, Ramey — Infrastructure Multiplier <i>cbo.gov</i>	Gov/Agency Tier A	Infrastructure multiplier 0.47 at full employment; higher in slack conditions. Referenced for fiscal impact methodology.	Capital Report — Infrastructure Multipliers; Prop 38; Prop 45; Bill 2/IIC
29	Blanchard-Leigh (2013, American Economic Review) <i>aeaweb.org/articles?id=10.1257/aer.103.3.117</i>	Peer Review Tier A	Fiscal consolidation multipliers during eurozone crisis were 1.5-2.5 — substantially larger than IMF assumed 0.5. Procyclical austerity deepens recessions.	Capital Report — Recession scenarios; Comp Docs
30	Irwin, “Peddling Protectionism” / “The Smoot-Hawley Tariff” (NBER) <i>nber.org</i>	Peer Review Tier A	Smoot-Hawley tariffs associated with 66% collapse in global trade 1929-1933 and deepened the Great Depression.	Capital Report — Tariffs; Comp Docs (P2025 protectionism)
31	PWBM, “Economic Effects of President Trump’s Tariffs” (April 2025) <i>budgetmodel.wharton.upenn.edu/uses/2025/4/10/economic-effects-of-president-trumps-tariffs</i>	Think Tank Tier B	Actual 2025 implemented tariffs project long-run GDP -6%, wages -5%, \$22,000 lifetime loss for median household. “Twice as harmful as a revenue-equivalent corporate tax hike to 36%.” Note: this April 2025 schedule was partially superseded by Feb 20, 2026 SCOTUS IEEPA ruling — see Source 341 for post-SCOTUS PWBM update.	Capital Report — Tariffs; Comp Docs (P2025 fiscal)
32	PIIE (Clausing-Lovely) — Tariff Consumer Cost <i>piie.com</i>	Think Tank Tier B	10%+60% scenario: \$2,600+/year cost per middle-income household. Described as “very conservative” — excludes domestic price increases and retaliation effects.	Capital Report — Tariffs; Comp Docs (P2025)
33	Amiti, Redding, and Weinstein (NBER, 2019) <i>nber.org</i>	Peer Review Tier A	Near-complete pass-through of 2018-19 tariffs to US consumers. Importers bore “nearly the full cost.” Referenced in 2018-19 trade war analysis.	Capital Report — Tariffs; Comp Docs (P2025)
34	CRFB, IRA Energy Cost Update (2024) <i>crfb.org/blogs/ira-energy-provisions-cost-could-double-new-emissions-rule</i>	Think Tank Tier B	IRA energy provisions cost substantially revised upward: original \$370-400B → \$870B through 2031 / \$1.1T through 2033. Goldman Sachs: \$1.2T. PWBM: \$1.045T.	Capital Report; Comp Docs (IRA/DNC clean energy)
35	Moody’s Analytics, IJA Impact Analysis <i>moodyanalytics.com</i>	Think Tank Tier B	IJA: GDP +3.5% by 2031, 772,400 jobs/yr, multiplier 1.23. Infrastructure investment is among highest-multiplier federal spending categories.	Capital Report; Bill 2/IIC; Prop 38 — Renewable Energy

36	CRFB, FY2025 Biden Budget Analysis (March 2024) <i>crfb.org/papers/analysis-presidents-fy2025budget</i>	<i>Think Tank</i> Tier B	\$3.3T net deficit reduction over 10 years (\$5.2T revenue + \$900B cuts vs. \$3.2T new spending). Largest proposed deficit-reduction package in modern US history.	Capital Report; Comp Docs (DNC fiscal)
37	NBER, Sarin-Summers (WP26475) — IRS Enforcement ROI <i>nber.org/papers/w26475</i>	<i>Peer Review</i> Tier A	Enforcement ROI documented at \$3.18-\$12 per \$1 invested including deterrence effects. Referenced for IRS enforcement economic analysis.	Prop 1 — IRS Reform; Capital Report; Bill 1/COLT (Part III)
38	Chodorow-Reich et al. — Medicaid/State Fiscal Aid Multipliers <i>scholars.harvard.edu</i>	<i>Peer Review</i> Tier A	Medicaid/state fiscal aid recession multipliers: 1.36-1.61. Among highest countercyclical multipliers documented in the literature.	Capital Report; Comp Docs (Medicaid)
300	CBO Working Paper 2026-01, “Key Methods That CBO Used to Estimate the Macroeconomic Effects of the 2025 Reconciliation Act” (Feb 20, 2026) <i>cbo.gov/publication/61257</i>	<i>Gov/Agency</i> Tier A	Documents the formal modeling blend: short-term Keynesian for 2025–26; transitioning weights (0.75 / 0.50 / 0.25) across 2027–2029; long-run Solow thereafter. The 0.25%-of-GDP threshold for triggering dynamic scoring remains the operative House rule.	Capital Report v3 §1.1; methodology reference
301	Chodorow-Reich, Smith, Zidar & Zwick, “Tax Policy and Investment in a Global Economy,” NBER WP 32180 (2024) <i>nber.org/papers/w32180</i>	<i>Peer Review</i> Tier A	TCJA tax revenue feedback offsets only ~5% of direct revenue cost. By extension, OBBBA's similar provisions will not pay for themselves either. Foundational evidence for the static-vs-dynamic consensus.	Capital Report v3 §1.2; OBBBA fiscal analysis
302	JCT JCX-25-25 (May 14, 2025), “Macroeconomic Analysis of the Tax Provisions” <i>jct.gov/publications/2025/jcx-25-25/</i>	<i>Congress</i> Tier A	GDP +0.2% early years rising to +0.4% over 2030–2034; dynamic feedback offsets ~7% of static cost. JCT's formal macroeconomic analysis of OBBBA tax provisions.	Capital Report v3 §1.2; OBBBA fiscal analysis
308	CBO Pub. 59972 (Feb 2024) — IRS enforcement ROI baseline <i>cbo.gov/publication/59972</i>	<i>Gov/Agency</i> Tier A	Benchmark enforcement ROI 6.4:1; \$20B rescission → ~\$44B revenue loss / ~\$24B deficit increase 2024–2034. Standard reference for IRS enforcement cost-benefit analysis.	Prop 1 — IRS Reform; Bill 1/COLT; Capital Report v3 Proposal 1
309	CBO Pub. 61172 (Jan 2025) — IRS rescission update <i>cbo.gov/publication/61172</i>	<i>Gov/Agency</i> Tier A	Updated for the \$20B American Relief Act rescission: –\$66B receipts, +\$46B deficit. UPDATES v2 figures.	Prop 1 — IRS Reform; Bill 1/COLT; Capital Report v3 Proposal 1
311	Yale Budget Lab, “A Weakened IRS Has Substantial Consequences” (2026) <i>budgetlab.yale.edu/research/weakened-irs-has-substantial-consequences</i>	<i>Think Tank</i> Tier B	Full \$80B IRA appropriation would have yielded ~\$637B over 10 years (counterfactual); IRS-ICE MOU could cost \$147–479B over 10 years through undocumented-filer chilling effects.	Prop 1 — IRS Reform; Bill 1/COLT; Capital Report v3 Proposal 1
328	CBO, “Estimated Budgetary Effects of Public Law 119-21” (Pub. 61570, July 21, 2025) <i>cbo.gov/publication/61570</i>	<i>Gov/Agency</i> Tier A	Net deficit increase \$3.4T over 2025–2034 (revenues –\$4.5T; direct spending –\$1.1T). SUPERSEDES all pre-enactment House/Senate estimates including the May 2025 H.R. 1 score.	Capital Report v3 §3.1; OBBBA enacted analysis
329	CBO, “The Budget and Economic Outlook: 2026 to 2036” (Pub. 61882, Feb 11, 2026) <i>cbo.gov/publication/61882</i>	<i>Gov/Agency</i> Tier A	OBBBA dynamic effect on deficits 2026–2035 = +\$4.7T (incl. macro feedback + debt service). Real GDP +0.7% avg over budget window. Debt held by public: 99% → 120% by 2036; 175% by 2056. Standard reference for OBBBA throughout Capital Report v3.	Capital Report v3 §3.1; baseline reference
330	CBO, “Distributional Effects of Public Law 119-21” (Pub. 61367, Aug 11, 2025) <i>cbo.gov/publication/61367</i>	<i>Gov/Agency</i> Tier A	Bottom decile loses ~3.1% of resources by 2034; top decile gains ~2.7%. Health coverage: +10M uninsured by 2034 (excl. ePTC expiration). SUPERSEDES preliminary distributional letters of May 20 and June 12, 2025.	Capital Report v3 §3.1; OBBBA distributional

331	JCT JCX-36-25 / JCX-37-25 (July 29, 2025) — Post-enactment distribution <i>jct.gov/publications/2025/jcx-36-25/</i>	Congress Tier A	Official post-enactment distribution tables under current-policy and present-law baselines. SUPERSEDE earlier H.R. 1 JCT distribution tables. Methodological flag: Senate “current-policy” baseline scores tax-title cost at \$715B vs ~\$4.5T present-law — flagged as budget-convention break.	Capital Report v3 §3.1; OBBBA distribution
332	PWBM, “President Trump-Signed Reconciliation Bill: Budget, Economic, and Distributional Effects” (July 8, 2025) <i>budgetmodel.wharton.upenn.edu/issues/2025/7/8/</i>	Think Tank Tier A	Conventional 10-yr deficit +\$3.2T; dynamic +\$3.6T (debt drag exceeds growth offset). GDP –0.3% in 10 years; –4.6% in 30 years; wages –0.4% / –3.4%. Top 10% receives ~80% of total bill value.	Capital Report v3 §3.1; OBBBA enacted analysis
333	Tax Foundation, “One Big Beautiful Bill Act Tax Policies: Details and Analysis” (Feb 2026 revision) <i>taxfoundation.org/research/all/federal/big-beautiful-bill-senate-gop-tax-plan/</i>	Think Tank Tier B	Critical Feb 2026 revision: long-run GDP +0.7%, downward from earlier +1.2% due to identified housing-investment treatment error. Tax Foundation excludes debt-drag/crowding-out, which is why TF is the most positive non-partisan modeler.	Capital Report v3 §3.1; OBBBA enacted analysis
334	Tax Policy Center, “Distributional Effects of the Tax Provisions in the 2025 Budget Reconciliation Act” <i>taxpolicycenter.org/tax-model-analysis/distributional-effects-tax-provisions-2025-budget-reconciliation-act</i>	Think Tank Tier A	Average tax cut ~\$2,900 in 2026; ~60% of tax benefits accrue to top quintile; ~85% of households receive a 2026 cut, falling to ~70% by 2030 as temporary provisions expire.	Capital Report v3 §3.1; OBBBA distribution
335	Auerbach & Gale, “Then and Now: A Look Back and Ahead at the Federal Budget” (working paper, late 2025) <i>eml.berkeley.edu/~auerbach/AG%20Fiscal%20Primer%20final.pdf</i>	Peer Review Tier A	Confirms +\$4.2T 10-yr deficit; 2054 debt-to-GDP 183% as written / 199% permanent / 204% / 233% under endogenous rates. Berkeley working paper series.	Capital Report v3 §3.1; OBBBA long-run debt
336	Brookings, Gale / Page / Patel / Pomerleau, “One Big Beautiful Bill? A Preliminary Assessment” (March 23, 2026) <i>brookings.edu/wp-content/uploads/2026/03/OBBBA_Preliminary_Assessment_2026-03-23-1.pdf</i>	Think Tank Tier A	Most authoritative non-CBO retrospective. “Due to weak growth effects, dynamic scores of the Act tend to show higher deficits than conventional scores.”	Capital Report v3 §3.1; OBBBA enacted analysis
337	CRFB, “OBBBA Dynamic Score Comes In at \$4.7 Trillion” (March 11, 2026) <i>crfb.org/blogs/obbba-dynamic-score-comes-47-trillion</i>	Think Tank Tier B	Reports CBO integrated dynamic figures: \$4.2T dynamic deficit impact 2025–2034. 30-Year Cost: debt-to-GDP in 2054 reaches 176%–220% depending on permanence and rate assumptions.	Capital Report v3 §3.1; OBBBA dynamic
338	Trump CEA OBBBA analysis ♦ OUTLIER — TIER D <i>whitehouse.gov/cea</i>	Gov/Agency Tier D	Claims dynamic effects reduce deficit by \$2.1T; GDP up to +3.5%; uses labor supply elasticity 0.75 (vs CBO's 0.24). Outlier: flagged as far outside mainstream by CRFB, AEI, and Brookings. Cite only as partisan-administration outlier with explicit advocacy framing.	Capital Report v3 §3.1 (outlier flag)
358	CBO score, OBBBA Section 50003 (CFPB funding) — Pub. 61379 <i>cbo.gov/publication/61379</i>	Gov/Agency Tier A	Reduces CFPB funding cap from 12% to 6.5% of Fed's 2009 operating expenses. Reduces direct spending by \$3.9B over 2026–2034. The cleanest neutral fiscal score on this provision. Levitin (Georgetown Law) critiques CEA's \$237–369B “cost of CFPB” claim as “bizarre and contorted.”	Capital Report v3 §3.4; CFPB deregulation

359	White House CEA, “The Economic Benefits of Current Deregulatory Efforts” (June 2025) and OMB/OIRA Year-End Regulatory Accounting (Dec 2025) ♦ OUTLIER — TIER D <i>whitehouse.gov/cea + omb.gov</i>	<i>Gov/Agency</i> Tier D	Claim 0.29–0.78pp higher annual GDP growth; \$1.1–2.9T 10-year deficit reduction via growth; \$211.8B FY2025 net savings. Methodological flag: figures rely on agencies' own ex-ante cost estimates of original rules and do not net out foregone benefits. Cite only with explicit advocacy framing.	Capital Report v3 §3.4 (outlier flag)
360	PWBM, “2024 Harris Campaign Policy Proposals” (Aug 26, 2024) — v3 component-level re-citation <i>budgetmodel.wharton.upenn.edu/iss ues/2024/8/26/harris-campaign-policy-proposals-2024</i>	<i>Think Tank</i> Tier A	Aggregate Harris plan: +\$1.2T conventional / +\$2.0T dynamic deficits over 10 years. GDP –1.3% by 2034, –4% by 2054. Note: same upstream paper as Source 13 (v8); registered separately to support Capital Report v3 component-level citations (Sources 361, 364) without disturbing the v8 aggregate-level reference at Source 13.	Capital Report v3 §4.1; DNC 2024 platform

3. HEALTHCARE & SOCIAL PROGRAMS — 33 entries (v8: 39–63 + v9: 319–324, 367, 368)

#	Source · URL	Type	Key Finding	Documents Supported
39	OECD, Health at a Glance (Annual editions 2021-2025) <i>oecd.org/en/topics/health-at-a-glance.html</i>	<i>OECD</i> Tier A	US spends \$14,885/capita (17.2% of GDP) vs. OECD average \$5,967 (9.3% GDP). Every other high-income OECD member provides universal or near-universal coverage at substantially lower cost. Primary comparative health data for GP scoring of all healthcare proposals.	Prop 13 — Universal Healthcare; Prop 8 — Restore Public Health; Capital Report (GP ref)
40	Commonwealth Fund Mirror Mirror (2023) <i>commonwealthfund.org/publications/fund-reports/2023/jan/mirror-mirror-2023</i>	<i>Think Tank</i> Tier B	US ranks last among peer nations on equity, access, and efficiency despite highest spending. Used for P2025 Medicare/Medicaid cuts scoring.	Prop 13 — Universal Healthcare; Comp Docs (DNC healthcare)
41	Peterson-KFF Health System Tracker (March 2026) <i>healthsystemtracker.org</i>	<i>Think Tank</i> Tier A	US spends twice OECD average per capita with worse outcomes on life expectancy, maternal mortality, and preventable deaths. US life expectancy 78.4 years vs. OECD average 81+.	Prop 13 — Universal Healthcare; Capital Report
42	OECD/UNICEF (2021) — Childcare Comparative Data <i>oecd.org</i>	<i>OECD/UN</i> Tier A	41 high-income OECD and EU countries provide subsidized childcare. US has highest childcare costs as percentage of wages among OECD nations.	Prop 9 — Socialized Childcare; Bill 4/FSW; Capital Report (GP ref)
43	World Economic Forum, Childcare Costs (July 2023) <i>weforum.org</i>	<i>Think Tank</i> Tier B	Germany and Estonia: net childcare costs 0-1% of household wages. US anomaly is documented comparatively.	Prop 9 — Socialized Childcare; Bill 4/FSW
44	UNICEF Innocenti Report (2021) — Childcare & Development <i>unicef-irc.org</i>	<i>UN/Intl</i> Tier A	Childcare plays “key role in development for children and work-life balance for adults.” OECD research confirms subsidized childcare is primary instrument for supporting maternal employment.	Prop 9 — Socialized Childcare; Prop 10 — Universal Basic Investment; Bill 4/FSW
45	Pierre Fortin, Luc Godbout & Suzie St-Cerny (2013) — Quebec Universal Childcare ROI <i>journals.openedition.org/interventionseconomiques/1858</i>	<i>Peer Review</i> Tier A	CORRECTED: Pierre Fortin, Luc Godbout, Suzie St-Cerny (prior listing had wrong given names and wrong URL). Published 2013, <i>Revue Interventions économiques</i> no. 47; working paper CFFP 2012/02. Every \$1 invested in Quebec universal childcare returned ~\$1.49 to government through increased maternal labor force participation (~70,000 additional mothers employed, \$5.1B Quebec GDP impact in 2008). Net fiscal impact confirmed positive.	Prop 9 — Socialized Childcare; Capital Report
46	Baker, Gruber, Milligan (2008, Journal of Political Economy) — Quebec Childcare <i>journals.uchicago.edu/doi/10.1086/593033</i>	<i>Peer Review</i> Tier A	Quebec universal childcare expansion documented effects on maternal labor force participation and child development. Primary peer-reviewed source for childcare ROI.	Prop 9 — Socialized Childcare; Capital Report
47	CBO, BBB Childcare Score (pub/57630) <i>cbo.gov/publication/57630</i>	<i>Gov/Agency</i> Tier A	CBO BBB score: \$381.5B gross over 6 years for universal childcare expansion. PWBM US estimate: GDP +0.2% short-run.	Prop 9 — Socialized Childcare; Bill 4/FSW; Capital Report

48	Columbia Center on Poverty and Social Policy (2021) — CTC <i>poverty.columbia.edu</i>	<i>Think Tank</i> Tier B	Expanded Child Tax Credit (2021) reduced child poverty by 40%, lifting 3.7 million children out of poverty in first full month.	Prop 10 — Universal Basic Investment for Children; Comp Docs (DNC CTC)
49	ACOG, Reproductive Healthcare (2023, 2024) <i>acog.org</i>	<i>NGO/Civil</i> Tier B	Abortion restrictions increase maternal mortality, complicate miscarriage and ectopic pregnancy care, delay cancer treatment. IVF restrictions would eliminate ~75,000 births annually. Mifepristone is a WHO Essential Medicine with 99.6% safety record.	Prop 14 — Bodily Autonomy; Comp Docs (P2025 abortion)
50	Lancet (2020) — Abortion Laws and Safety <i>thelancet.com</i>	<i>Peer Review</i> Tier A	Countries with restrictive abortion laws have significantly higher rates of unsafe abortion. 45% of all abortions globally are unsafe, occurring primarily where legally restricted. Countries with legal access do not have higher abortion rates.	Prop 14 — Bodily Autonomy; Comp Docs (P2025/DNC abortion)
51	Endocrine Society (2023) — Gender-Affirming Care <i>endocrine.org</i>	<i>NGO/Civil</i> Tier B	Gender-affirming medical care is evidence-based and associated with significant mental health improvements. Standard of care across peer medical institutions.	Prop 14 — Bodily Autonomy; Comp Docs (P2025 LGBTQ+)
52	CDC (2022) — Contraception Statistics <i>cdc.gov</i>	<i>Gov/Agency</i> Tier A	Contraception prevents approximately 1.7 million unintended pregnancies annually in the US.	Prop 14 — Bodily Autonomy; Comp Docs (P2025 contraception)
53	Turnaway Study, UCSF (Foster et al.) / Gerdt et al. (2016) <i>ansirh.org/research/research/turnaway-study</i>	<i>Peer Review</i> Tier A	Women denied wanted abortions show worse economic, health, and child welfare outcomes across 5-year follow-up period. Direct prospective study. Lead PI: Diana Greene Foster (UCSF). Gerdt is a co-author on specific Turnaway Study papers; the overall study is attributed to Foster et al. The 2016 citation refers to specific papers using Turnaway Study data.	Prop 14 — Bodily Autonomy; Comp Docs (P2025/DNC abortion)
54	CDC (2026) — Measles Outbreak Data <i>cdc.gov/measles</i>	<i>Gov/Agency</i> Tier A	4,000+ confirmed measles cases since January 2025, worst in 33 years. Three deaths confirmed. MMR kindergartner vaccination rates fell from 95.2% (2019-2020) to 92.5% (2024-2025), below herd immunity threshold.	Prop 8 — Restore Public Health Infrastructure
55	CBO, Single-Payer Working Paper (pub/56811, 2020) <i>cbo.gov/publication/56811</i>	<i>Gov/Agency</i> Tier A	Federal subsidies under single-payer rise \$1.5-3.0T in 2030 alone. National Health Expenditure change: -\$0.7T to +\$0.3T depending on provider rates.	Prop 13 — Universal Healthcare; Capital Report
56	Urban Institute — Choose Medicare Act Analysis <i>urban.org</i>	<i>Think Tank</i> Tier B	Medicare for All / public option: \$388B deficit reduction over applicable window. Lower bound of public option savings estimates.	Prop 13 — Universal Healthcare; Bill 6/POHE; Capital Report
57	CBO, “Add a Public Plan to the Health Insurance Exchanges” (Budget Options 2013, Option 44890) <i>cbo.gov/budget-options/2013/44890</i>	<i>Gov/Agency</i> Tier A	PUBLICATION NUMBER CORRECTED: pub/41464 is a 2010 ACA exchange subsidy methodology document, not a public option score. Correct document: CBO Budget Options 2014 (Health Option 44890), “Add a Public Plan to the Health Insurance Exchanges.” Reduces federal deficits by approximately \$158B over 10 years by reducing subsidy costs as a public option lowers premiums.	Prop 13 — Universal Healthcare; Bill 6/POHE; Capital Report
58	RAND, Public Option Analysis (RR3153, 2020) <i>rand.org</i>	<i>Think Tank</i> Tier B	\$7-24B/yr federal savings from public option. Colorado public option produced ~10% premium reduction in real-world implementation.	Prop 13 — Universal Healthcare; Bill 6/POHE; Capital Report
59	CBO, ACA Enhanced Premium Tax Credit Extension (September 2025) <i>cbo.gov/publication/61734</i>	<i>Gov/Agency</i> Tier A	Permanent ACA enhanced premium tax credit extension covers 3.8M additional people. Expiration would raise premiums 114%.	Capital Report; Comp Docs (DNC ACA)
60	Bureau of Justice Statistics (2023) — Incarceration Rate <i>bjs.ojp.gov</i>	<i>Gov/Agency</i> Tier A	US has highest incarceration rate globally — 608 per 100,000 vs. OECD average ~120 per 100,000.	Prop 11 — Non-Profit Prison System; Comp Docs (DNC criminal justice)
61	Vera Institute (2022) — Private Prisons & Cash Bail <i>vera.org</i>	<i>Think Tank</i> Tier B	Private prison contracts associated with higher incarceration rates and no documented cost savings after quality adjustment. Ending cash bail and reducing pre-trial detention produces no increase in failure-to-appear or recidivism rates.	Prop 11 — Non-Profit Prison System; Comp Docs

62	Social Security Administration Trustees Report (2024) <i>ssa.gov/oact/tr/2024/</i>	Gov/Agency Tier A	Trust Fund projected depletion by 2035 under current policy.	Prop 15 — Social Security Modernization
63	USDA ERS, Food Security in the U.S. (2024) <i>ers.usda.gov/topics/food-nutrition-assistance/food-security-in-the-us/</i>	Gov/Agency Tier A	12.8% of US households (17M) experienced food insecurity in 2023. P2025 SNAP cuts context. US is the world's largest food exporter despite this rate.	Prop 54 — Domestic Food Priority Laws; Comp Docs (P2025 SNAP cuts)
319	CBO Pub. 57020 (April 2021), “A Public Option for Health Insurance in the Nongroup Marketplaces: Key Design Considerations” <i>cbo.gov/publication/57020</i>	Gov/Agency Tier A	Qualitative design framework, not a numerical score. SUPPLEMENTS the CBO 2013 / Urban Institute scoring base for the public option.	Prop — Public Option; Bill 8/HCI; Capital Report v3 Proposal 6
320	CBO Pub. 61734 (Sept 2025), “Estimated Effects of Enacting Selected Health Coverage Policies” <i>cbo.gov/publication/61734</i>	Gov/Agency Tier A	Permanent ePTC extension: +\$350B deficit FY2026–2035 (+3.8M insured by 2035); repeal of OBBA Title VII Subtitle B Marketplace cuts: +\$272B (+2.9M insured). Nearest-vintage CBO coverage-policy benchmark.	Public Option; ePTC; Capital Report v3 Proposal 6 + \$4.2
321	Georgetown Center for Children & Families + KFF — Joint OBBA-enacted baseline analysis <i>georgetown.edu/ccf + kff.org</i>	Think Tank Tier B	OBBA-enacted uninsured baseline: +10M by 2034; ~15M with ePTC expiration. Critical re-baselining flag for any new public-option score — pre-OBBA estimates measure against a materially worse counterfactual.	Public Option; Capital Report v3 Proposal 6 (baseline shift)
322	CBO/OMB on FY2025 President's Budget childcare proposal <i>cbo.gov + omb.gov</i>	Gov/Agency Tier A	\$400B over 10 years for universal childcare; \$200B for universal pre-K. UPDATES v2 with longer-window estimate of similar policies.	Universal Childcare; Capital Report v3 Proposal 8
323	Yale Budget Lab, Eppsteiner / Lee / Ricco, “Evaluating the Impacts of Federal Subsidies for Early Childhood Education and Care” (April 16, 2026) <i>budgetlab.yale.edu/news/260416/</i>	Think Tank Tier B	Most rigorous post-BBB academic ECEC fiscal-feedback estimate. Most generous co-pay subsidies raise maternal employment ~6 pp; require >500,000 additional FTE care workers; raise care-worker wages \$3–8/hr. None of the policies fully self-finance; Provider Tax Credit recovers largest share.	Universal Childcare; Capital Report v3 Proposal 8
324	New Mexico ECECD & Legislative Finance Committee — First US universal childcare launch (Nov 1, 2025) <i>nmececd.org + nmlegis.gov</i>	Gov/Agency Tier B	NEW EVIDENCE not in v2. First US state-level natural experiment on no-cost universal childcare. FY26 ECEC budget \$450M; LFC estimates universal cost could reach \$849.7M at 90% uptake. State-level data on uptake and labor force participation will be available within the v3 budget window.	Universal Childcare; Capital Report v3 Proposal 8
367	KFF calculator (Oct 29, 2025) — ePTC expiration impact <i>kff.org</i>	Think Tank Tier A	ePTC expiration causes average premium +114% (~\$1,016/year) for marketplace enrollees.	ePTC; Capital Report v3 \$4.2
368	Commonwealth Fund (Oct 2025) — ePTC expiration jobs / coverage analysis <i>commonwealthfund.org/publications/issue-briefs/2025/oct/expiring-premium-tax-credits-lead-340000-jobs-lost-2026</i>	Think Tank Tier B	ePTC expiration causes 7.3M to lose ACA coverage in 2026 (4.8M become uninsured); ~340,000 jobs lost.	ePTC; Capital Report v3 \$4.2

4. ECONOMY & LABOR — 25 entries (v8: 64–84 + v9: 312–315 antitrust update)

#	Source · URL	Type	Key Finding	Documents Supported
64	Brookings Institution (2022) — Industry Concentration <i>brookings.edu</i>	Think Tank Tier B	Over 75% of US industries saw concentration increases over 20 years. HHI rising across manufacturing, finance, retail.	Prop 2 — Antitrust Enforcement; Comp Docs (DNC)

65	Yale School of Management (September 2024) — Competition <i>som.yale.edu</i>	<i>Think Tank</i> Tier C	Competitive markets increase consumer surplus, reduce deadweight loss. Comparative analysis across concentrated vs. competitive sectors.	Prop 2 — Antitrust Enforcement & Corporate Accountability
66	American Antitrust Institute (April 2020) <i>antitrustinstitute.org</i>	<i>NGO/Civil</i> Tier C	Consolidation in telecom, airlines, healthcare, and agriculture produced “unprecedented levels of market concentration” with documented adverse effects on consumers and workers.	Prop 2 — Antitrust Enforcement; Bill 3/ACFM
67	De Loecker, Eeckhout, Unger (QJE 2020) — Corporate Markups <i>academic.oup.com/qje/article/135/2/561/5714769</i>	<i>Peer Review</i> Tier A	Aggregate US markups rose from 21% above marginal cost (1980) to 61% (2016), across all publicly traded US firms. The \$1.4T in lost labor income annually is from a separate Biden CEA analysis (Source 68) that applied this markup research.	Prop 2 — Antitrust Enforcement; Capital Report
68	CEA, Biden White House (2021) — Competition & Labor <i>whitehouse.gov/cea</i>	<i>Gov/Agency</i> Tier B	Anticompetitive practices cost workers estimated \$1.4T in annual labor income. Market concentration reduces labor share of income across sectors.	Prop 2 — Antitrust Enforcement; Capital Report
69	PIIE WP 18-4 (Furman-Orszag) — Competition & Growth <i>piie.com</i>	<i>Think Tank</i> Tier B	Reduced competition is a significant driver of income inequality and reduced productivity growth. Peterson Institute for International Economics working paper.	Prop 2 — Antitrust Enforcement; Capital Report
70	CBO (2021) — Federal Minimum Wage to \$15 <i>cbo.gov/publication/56975</i>	<i>Gov/Agency</i> Tier A	\$15/hr federal minimum by 2025 would raise wages for 17 million workers and lift 900,000 from poverty, at cost of approximately 1.4M jobs.	Prop 5 — Moving Minimum Wage; Comp Docs (DNC minimum wage)
71	Federal Reserve Bank of San Francisco (2020) — Minimum Wage <i>frbsf.org</i>	<i>Think Tank</i> Tier A	Moderate minimum wage increases in tight labor markets produce minimal employment losses. Context-dependent analysis supporting economic-condition-indexed approach.	Prop 5 — Moving Minimum Wage
72	Dube, Lester, Reich (Review of Economics and Statistics, 2010) <i>direct.mit.edu/rest/article/92/4/945/57855/</i>	<i>Peer Review</i> Tier A	County-pair analysis finds minimum wage increases have no significant employment effect on low-wage service sectors.	Prop 5 — Moving Minimum Wage; Comp Docs (DNC)
73	Cengiz et al. (Quarterly Journal of Economics, 2019) — Min Wage Meta <i>academic.oup.com/qje</i>	<i>Peer Review</i> Tier A	Meta-analysis of 138 state minimum wage changes finds near-zero employment effect with documented wage gains.	Prop 5 — Moving Minimum Wage; Comp Docs (DNC)
74	EPI (Economic Policy Institute, 2023) — Unionization & Wages <i>epi.org</i>	<i>Think Tank</i> Tier C	Union membership is associated with 10.2% wage premium controlling for industry and occupation. Union decline accounts for 13-37% of US wage inequality increase since 1980.	Comp Docs (DNC PRO Act / Labor Rights)
75	BLS (2024) — Union vs. Non-Union Wages <i>bls.gov/news.release/union2.nr0.htm</i>	<i>Gov/Agency</i> Tier A	Union workers earn median weekly wages of \$1,386 vs. \$1,090 for non-union workers.	Comp Docs (DNC/P2025 Labor)
76	Farber et al. (NBER, 2021) — Union Decline & Inequality <i>nber.org</i>	<i>Peer Review</i> Tier A	Union decline accounts for 13-37% of the increase in US wage inequality since 1980.	Comp Docs (DNC Labor Rights)
77	EPI (2024) — Overtime Threshold <i>epi.org</i>	<i>Think Tank</i> Tier C	Reducing the overtime salary threshold strips overtime protections from an estimated 3+ million workers. P2025 Lower Overtime proposal cited here.	Comp Docs (P2025 overtime rollback)
78	SBA (2024) — Small Business Jobs Data <i>sba.gov/document/annualreport</i>	<i>Gov/Agency</i> Tier A	SBA-backed loans supported 2.9 million small business jobs in fiscal year 2023.	Comp Docs (P2025/DNC SBA)

79	Haltiwanger, Jarmin, Miranda (Review of Economics and Statistics, 2013) <i>direct.mit.edu/rest/article/95/2/347/58100/</i>	Peer Review Tier A	Small business formation is the primary source of net new job creation in the US economy. Used for SBA lending and small business support analysis. REStat 95(2):347-361, DOI 10.1162/REST_a_00288.	Comp Docs (P2025/DNC SBA); Capital Report
80	KFF 2025 Employer Benefits Survey <i>kff.org</i>	Think Tank Tier A	US employers spend avg \$20,143/worker on family health insurance. 12-16x disparity vs. avg \$1,054-1,254/worker on training.	Prop 36 — Shift Corporate to Training; Bill 5/BWDS
81	ATD 2025 State of Industry — Workforce Training <i>td.org/research-reports</i>	NGO/Civil Tier B	Average US employer training investment: \$1,054-1,254/worker annually — substantially below peer nations with public healthcare systems.	Prop 36 — Shift Corporate to Training; Bill 4/FSW
82	OECD Getting Skills Right (2019) <i>oecd.org/en/publications/oecd-skills-strategy-2019_9789264313835-en.html</i>	OECD Tier A	Firms in countries where healthcare is publicly provided invest more in worker training than comparable firms in employer-coverage countries.	Prop 36 — Shift Corporate to Training; Bill 4/FSW
83	Baicker & Chandra (2006, Health Affairs) — Healthcare Premiums and Wages <i>pubmed.ncbi.nlm.nih.gov/16529582/</i>	Peer Review Tier B	"The Labor Market Effects of Rising Health Insurance Premiums": documents that higher employer-sponsored health insurance premiums are passed on to workers as lower wages at approximately a 1:1 ratio. The connection to reduced training investment is an inference from the crowd-out mechanism, not a direct finding of this paper. UK Apprenticeship Levy cautionary: apprenticeship starts fell after mandatory levy introduced.	Prop 36 — Shift Corporate to Training
84	Partnership for Public Service / Federal News Network (April 2026) <i>ourpublicservice.org</i>	NGO/Civil Tier B	Federal workforce overhaul costs through early 2026: ~\$71B total. DRP payments: \$4.5B. Admin leave during litigation: \$443.9M. RIF severance: \$763.9M. No credible net savings yet documented. Note: superseded by Source 349 (PPS Federal Harms Tracker \$165.6B economy-wide headline) for Capital Report v3.	Comp Docs (P2025 Schedule F / merit civil service)
312	De Loecker, Eeckhout & Mongey, "Quantifying Market Power and Business Dynamism" (SSRN 3837433) <i>ssrn.com/abstract=3837433</i>	Peer Review Tier A	Aggregate welfare ~9% lower in 2016 vs. 1980 , net of reallocation/selection gains. Use as central macro-welfare estimate for the antitrust enforcement case.	Antitrust; Capital Report v3 Proposal 2
313	De Loecker & Eeckhout, "The Macroeconomics of Market Power," Annual Review of Economics (2025) <i>annualreviews.org</i>	Peer Review Tier A	Synthesis update of post-2017 markup research. Incorporates dispute and reconciliation across competing measurement approaches.	Antitrust; Capital Report v3 Proposal 2
314	Benkard, Miller & Yurukoglu (2025) — Markup methodological challenge (working paper / forthcoming)	Peer Review Tier A	Methodological challenge to the rising-markup narrative. Finds the measurement is sensitive to how overhead is treated. Flag the dispute ; the macro markup finding is contested. v3 cites both sides.	Antitrust; Capital Report v3 Proposal 2 (dispute flag)
315	United States v. Google LLC (D.D.C., Sept–Dec 2025) <i>dcd.uscourts.gov</i>	Law/Court Tier B	Judge Mehta rejected divestiture of Chrome and Android; behavioral remedies only. Implication: realized welfare gain from current antitrust enforcement is likely modest relative to the structural-breakup counterfactual.	Antitrust; Capital Report v3 Proposal 2

5. INFRASTRUCTURE, ENERGY & TECHNOLOGY — 27 entries (v8: 85–104 + v9: 307, 325, 326, 327, 370–372)

Includes Source 91 (CBO IRA, with Audit 6 maintainer resolution to Source 326) and Source 326 (AUGMENTS Source 91). See Maintainer Resolutions section for details.

#	Source · URL	Type	Key Finding	Documents Supported
---	--------------	------	-------------	---------------------

85	IEA World Energy Outlook (2024) <i>iea.org/reports/world-energy-outlook-2024</i>	UN/Intl Tier A	Renewable energy accounted for 90% of new global electricity capacity additions in 2023. Every peer OECD nation is increasing renewable investment.	Prop 38 — Renewable & Nuclear Energy; Bill 2/IIC; Comp Docs (P2025 energy)
86	Lawrence Berkeley National Laboratory (2024) — Energy Costs <i>emp.lbl.gov</i>	Gov/Agency Tier A	Utility-scale solar and wind are now lowest-cost new electricity generation in most US regions.	Prop 38 — Renewable & Nuclear Energy; Bill 2/IIC
87	DOE (2024) — Clean Electricity Economic Analysis <i>energy.gov</i>	Gov/Agency Tier A	Achieving 80% clean electricity by 2035 would reduce consumer electricity costs up to \$500/household annually.	Prop 38 — Renewable & Nuclear Energy; Bill 2/IIC
88	CHIPS and Science Act (2022) / Semiconductor Industry Association (2023) <i>semiconductors.org/chips/</i>	Gov/Agency Tier B	US share of global semiconductor manufacturing fell from 37% (1990) to 12% (2020). CHIPS Act: \$52.7B direct + \$24B tax credits produced 42,000-54,000 jobs.	Prop 41 — Strategic Domestic Technology; Bill 2/IIC; Capital Report
89	Boston Consulting Group (2021) — Taiwan Supply Disruption <i>bcg.com</i>	Think Tank Tier B	Taiwan supply disruption would cost global economy \$490B in year one. Supply chain concentration risk documentation.	Prop 41 — Strategic Domestic Technology; Bill 2/IIC
90	NBER WP 34625 (2025) — CHIPS Employment Effects <i>nber.org/papers/w34625</i>	Peer Review Tier A	CHIPS Act produced 42,000-54,000 jobs. Investment crowding-in effects substantially exceeded direct employment.	Prop 41 — Strategic Domestic Technology; Capital Report
91	CBO, IRA Cost Estimate (Aug. 2022) + CRFB/Goldman Sachs Updated Projections ◆ RESOLVED Audit 6 — see Source 326 <i>cbo.gov/system/files/2022-08/hr5376_IR_Act_8-3-22.pdf</i>	Gov/Agency Tier A	PUBLICATION NUMBER CORRECTED (Audit 2): pub/58278 is S. 4166 (Technological Hazards Preparedness Act), not IRA manufacturing credits. Correct primary source: CBO Aug. 3, 2022 IRA cost estimate (hr5376_IR_Act_8-3-22.pdf). IRA manufacturing credits subsequently revised substantially upward: original CBO \$271B projection revised to \$622B+ by CRFB and Goldman Sachs updated analyses through 2031. MAINTAINER RESOLUTION (Audit 6, May 2, 2026) : retained as historical baseline (CBO Aug 2022); the post-OBBBA rescission accounting is registered separately as Source 326 (Peterson Foundation, OBBBA Energy Tax Policy). Use Source 91 for “what the IRA projected” and Source 326 for “what OBBBA unwound.”	Capital Report; Comp Docs (IRA/DNC clean energy); Capital Report v3 Proposal 9 + \$3.1
92	UIC High-Speed Rail Atlas 2024 <i>uic.org/passenger/highspeed/</i>	UN/Intl Tier A	~65,000km globally in operation. China ~50,000km carrying 1.7B passengers/year. Japan Shinkansen: 5.6B cumulative passengers since 1964, zero fatalities. EU network grew 47% from 2013-2023.	Prop 45 — National High-Speed Rail Network
93	IPCC AR6 WGIII Chapter 10 (2022) — Transport Decarbonization <i>ipcc.ch/report/ar6/wg3/</i>	UN/Intl Tier A	Electrified rail supports transport decarbonization (medium confidence). Aviation: 12% vs. rail: 1% of transport CO2. Transport electrification is a key mitigation pathway.	Prop 45 — National High-Speed Rail; Comp Docs (DNC climate)
94	IPCC AR6 WGII (2022) — Climate Damages <i>ipcc.ch/report/ar6/wg2/</i>	UN/Intl Tier A	Without mitigation, climate damages will reduce global GDP by 10-23% by 2100. Used for P2025 fossil fuel expansion scoring and DNC IRA/Paris scoring.	Comp Docs (P2025 energy/climate); Capital Report
95	Amtrak FY2024 Ridership Data <i>amtrak.com/about-amtrak/annual-report</i>	Gov/Agency Tier A	All-time record 32.8M passengers. NEC carries 3x NYC-WAS passengers vs. all airlines combined.	Prop 45 — National High-Speed Rail Network
96	GAO, High Risk List (Annual) <i>gao.gov/highrisk/overview</i>	Gov/Agency Tier A	Federal enforcement capacity gaps across OSHA, EPA, FDA, FAA, and DoD financial management documented annually. DoD on High Risk since 1995.	Prop 39 — Restore Federal Inspectors; Prop 49 — Pentagon Audit; Bill 2/IIC; Comp Docs
97	AFL-CIO / EPI using BLS Occupational Data (2024) — OSHA Inspector Ratio <i>bls.gov/oes</i> (BLS source data); <i>aflcio.org</i> (ratio derived)	Think Tank Tier C	OSHA has 1 inspector per 82,000 workers based on BLS occupational employment data. Peer nations average 1 per 10,000 (ILO comparative data). 8x underfunding relative to international standard. BLS provides the raw employment data; the ratio is derived and reported by AFL-CIO and EPI.	Prop 39 — Restore & Expand Federal Inspectors; Bill 2/IIC; Comp Docs (P2025 deregulation)

98	USPS (2024) — Fleet Age Data <i>usps.com</i>	Gov/Agency Tier A	Fleet of 220,000+ vehicles averages 27 years old. GAO (2023): USPS Delivering for America plan projects \$40B in losses without modernization. EV conversion reduces fuel/maintenance by estimated \$4-6B.	Prop 44 — Electrify & Modernize USPS; Bill 2/IIC
99	FAA (2024) — Air Traffic Control Facilities <i>faa.gov</i>	Gov/Agency Tier A	40% of FAA ATC facilities are more than 40 years old. NextGen modernization program is behind schedule and over budget.	Prop 43 — Modernize Airports & ATC; Bill 2/IIC
100	Resources for the Future (August 2025) — EPA Carbon Standards <i>rff.org</i>	Think Tank Tier B	EPA carbon standard repeal: SO ₂ /NO _x health damages 2.3-4x larger than electricity cost savings. P2025 deregulation scoring.	Comp Docs (P2025 EPA deregulation); Capital Report
101	American Lung Association (2024) citing EPA Retrospective Analysis — Clean Air Act Benefits <i>lung.org / epa.gov/clean-air-act-over-view/benefits-and-costs-clean-air-act</i>	NGO/Civil Tier B	Clean Air Act regulations prevent estimated 370,000 premature deaths annually (ALA State of the Air). The \$32 in health benefits per \$1 spent on compliance is from EPA's own retrospective cost-benefit analysis of the Clean Air Act ("Benefits and Costs of the Clean Air Act, 1990-2020") — an EPA finding cited extensively by ALA. The premature deaths figure is ALA original research; the \$32:\$1 ratio is EPA's.	Comp Docs (P2025 EPA deregulation); Capital Report
102	NOAA (2024) — Commercial Fisheries & Disasters <i>noaa.gov</i>	Gov/Agency Tier A	US commercial fisheries generate \$321B in economic activity and 1.7M jobs. 28 separate billion-dollar weather/climate disasters in 2023, totaling \$92.9B in damages.	Prop 40 — Shoreline & Fishery Protection; Prop 59 — Climate Preparedness
103	NOAA/USGS — Water Stress Projections <i>noaa.gov/water</i>	Gov/Agency Tier A	40 of 48 contiguous US states will face water stress by 2071 under current trajectories. Colorado River first-ever federal water shortage declaration (2022).	Prop 53 — Water Rights; Prop 60 — Desalination Infrastructure
104	USBR (2023) — Desalination & Western Water <i>usbr.gov</i>	Gov/Agency Tier A	Lake Mead and Lake Powell reached record lows in 2022. National Academy of Sciences (2023): desalination costs have fallen 80% since 1970.	Prop 60 — Invest in Desalination Infrastructure
307	Global Infrastructure Hub meta-analysis of 3,000+ multiplier estimates <i>gihub.org/infrastructure-monitor/insights/fiscal-multiplier-effect-of-infrastructure-investment/</i>	Think Tank Tier B	Public infrastructure multiplier ~0.8 within 1 year, ~1.5 within 2–5 years, ~1.6 in contractionary phases. v3-adopted multiplier range.	IIC Act; Bill 4/IIC; Capital Report v3 Proposal 9 + \$1.5
325	Ramey 2020, NBER WP 27625 — Infrastructure multiplier time-to-spend caveat <i>nber.org/papers/w27625</i>	Peer Review Tier A	Time-to-spend and time-to-build delays substantially reduce short-run infrastructure multipliers, sometimes near zero in the first few years of new construction. Critical caveat to the GIH range.	IIC Act; Capital Report v3 Proposal 9
326	Peterson Foundation, "Energy Tax Policy Under the OBBBA" ♦ AUGMENTS Source 91 <i>pgpf.org/article/energy-tax-policy-under-the-obbba/</i>	Think Tank Tier A	OBBBA rescinds/phases out IRA energy provisions, generating \$496B in savings 2025–2034. §30D / 25E / 45W terminated Sept 30, 2025; §25C / 25D terminated Dec 31, 2025; §48E phase-out accelerated. v9 maintainer resolution for Source 91: retained as historical baseline; this entry registers the post-OBBBA position.	IIC Act; Capital Report v3 Proposal 9 + \$3.1
327	CRFB IRA Cost Update (2024) <i>crfb.org/blogs/ira-energy-provisions-cost-could-double-new-emissions-rule</i>	Think Tank Tier B	Original \$370–400B → \$870B/2031 / \$1.1T/2033 pre-OBBBA. Material in PARTIALLY-UNWOUND form post-OBBBA per Source 326.	IIC Act; Capital Report v3 Proposal 9
370	REPEAT Project, Princeton (July 2025) — Post-OBBBA emissions trajectory <i>repeatproject.org/</i>	Think Tank Tier B	Post-OBBBA emissions trajectory ~3% below current levels by 2030 vs. 42% reduction under preserved IRA. Cumulative gap 2026–2030: ~7 billion tons CO ₂ e. Community investment loss: ~\$500B in cumulative capital investment loss in U.S. electricity & clean fuels by 2035.	Capital Report v3 §4.3 IRA-preservation counterfactual
371	Energy Innovation, "Final Analysis: Economic Impacts of OBBBA Energy Provisions" (July 2025) <i>energyinnovation.org</i>	Think Tank Tier B	OBBBA cuts cumulative GDP \$980B–\$1.1T through 2034 vs. preserved IRA; 760,000 jobs lost by 2030; wholesale electricity prices +25% by 2030. Quantifies what the DNC 2024 IRA-preservation position would have prevented.	Capital Report v3 §4.3 IRA-preservation counterfactual

372	Rhodium Group Taking Stock 2025 <i>rhodiumgroup.com</i>	<i>Think Tank</i> Tier B	Post-OBBA: 26–35% reduction below 2005 by 2035 (vs 38–56% under preserved IRA). Independent emissions trajectory analysis aligned with REPEAT (370) and Energy Innovation (371).	Capital Report v3 §4.3 IRA-preservation counterfactual
-----	---	------------------------------------	--	---

6. LEGAL, GOVERNANCE & CIVIL RIGHTS — 30 entries (v8: 105–134)

#	Source · URL	Type	Key Finding	Documents Supported
105	EU GDPR (2018) / UK Age Appropriate Design Code (2021) <i>gdpr.eu / ico.org.uk/for-organisations/childrens-code/</i>	<i>Law/Court</i> Tier A	Data subject rights across 27 nations including consent, right to erasure, data portability. UK Children's Code restricts behavioral profiling, targeted advertising for users under 18. Primary model for DRDO Act.	Prop 22 — Citizen Data Ownership; Prop 28 — Stricter Advertising; Bill 7/DRDO
106	American Privacy Rights Act (H.R. 8818, 2024) <i>congress.gov/bill/118th-congress/house-bill/8818</i>	<i>Law/Court</i> Tier A	Bipartisan high-water mark for federal data legislation. Data-minimization architecture treating companies as trustees rather than owners. Most legally durable US approach.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO
107	FTC Commercial Surveillance Report (2024) <i>ftc.gov/reports/commercial-surveillance</i>	<i>Gov/Agency</i> Tier A	Systematic data collection without meaningful consumer consent or compensation documented. Privacy enforcement gaps across major platforms.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO
108	Zuboff, “The Age of Surveillance Capitalism” (PublicAffairs, 2019) <i>[Book: PublicAffairs, ISBN 978-1610395694]</i>	<i>Peer Review</i> Tier B	Documents behavioral data extraction model and democratic autonomy implications. Foundational academic work on platform data practices. Published by PublicAffairs press; Zuboff was professor emerita at Harvard Business School at time of publication.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO
109	Haidt, The Anxious Generation (Penguin Press, 2024); Twenge & Haidt (Journal of Abnormal Psychology, 2018) <i>anxiousgeneration.com</i>	<i>Peer Review</i> Tier B	The Anxious Generation (2024) is authored by Jonathan Haidt alone — Twenge is not a co-author (she is a separate researcher cited within it). Twenge & Haidt (2018) is a separate co-authored journal article in J. Abnormal Psychology documenting correlation between social media adoption and adolescent mental health decline, particularly for girls. Both cited as foundational research for digital minor protection proposals.	Prop 35 — Digital Minor Protection Standards; Bill 7/DRDO (Title V); Comp Docs
110	Haugen Congressional Testimony (2021) / Internal Meta Research <i>commerce.senate.gov/2021/10/the-facebook-whistleblower</i>	<i>Gov/Agency</i> Tier B	Internal Meta research showed Instagram worsened body image issues for 13.5% of teen girls. Facebook Papers documentation.	Prop 35 — Digital Minor Protection Standards; Bill 7/DRDO (Title V)
111	NYSRPA v. Bruen, 597 U.S. 1 (2022) <i>supremecourt.gov/opinions/21pdf/20-843_7j80.pdf</i>	<i>Law/Court</i> Tier A	New text-and-history standard for Second Amendment analysis. Regulations must be consistent with the Nation's historical tradition of firearm regulation. Foundational constitutional anchor for NFSA two-track architecture.	Prop 21 — National Firearm Standards; Bill 12/NFSA; Comp Docs [see Sources 200–202 for constitutional arch]
112	Maryland Shall Issue v. Moore, 4th Circuit en banc (2024), cert. denied (2025) <i>law.justia.com</i>	<i>Law/Court</i> Tier A	Maryland Handgun Qualification License upheld 14-2 by Fourth Circuit sitting en banc. Cert denied by Supreme Court January 2025. Strongest available legal precedent for Track B Federal Civilian Ownership Certificate design.	Prop 21 — National Firearm Standards; Bill 12/NFSA [see Source 201 for constitutional arch]
113	United States v. Rahimi, 602 U.S. 680 (2024) <i>supremecourt.gov</i>	<i>Law/Court</i> Tier A	“Relevantly similar” standard applied to firearm regulations. Clarified Bruen test application. Incorporated into NFSA acquisition-only, objective-criteria-only constitutional architecture.	Prop 21 — National Firearm Standards; Bill 12/NFSA [see Source 202 for constitutional arch]
114	CDC WISQARS (2023) — Firearm Death Statistics <i>cdc.gov/violenceprevention/firearms/fastfact.html</i>	<i>Gov/Agency</i> Tier A	Firearms are leading cause of death for Americans ages 1–19. 45,222 total firearm deaths in 2022.	Prop 21 — National Firearm Standards; Comp Docs (DNC gun violence)
115	Harvard T.H. Chan School of Public Health (2016, 2022) <i>hsph.harvard.edu/hicrc/firearms-research/</i>	<i>Think Tank</i> Tier B	Higher gun ownership rates consistently associated with higher firearm homicide and suicide rates across states and countries after controlling for covariates.	Prop 21 — National Firearm Standards; Comp Docs (DNC gun violence)
116	RAND Corporation, Science of Gun Policy (2024) <i>rand.org/research/gun-policy.html</i>	<i>Think Tank</i> Tier A	Permit-to-purchase laws are among the firearm policies with the most consistent evidence of reducing homicides and suicides. DNC gun violence scoring.	Prop 21 — National Firearm Standards; Comp Docs (DNC/P2025 gun policy)

117	OpenSecrets (2024) — Outside Spending <i>opensecrets.org</i>	NGO/Civil Tier A	Outside spending in federal elections exceeded \$4.5B in 2024 cycle.	Prop 32 — Repeal / Reform Citizens United; Comp Docs (DNC campaign finance)
118	Gilens and Page (Perspectives on Politics, 2014) <i>cambridge.org/core/journals/perspectives-on-politics/article/abs/testing-theories-of-american-politics-elites-interest-groups-and-average-citizens/62327F513959D0A304D4893B382B992B</i>	Peer Review Tier A	Economic elites and organized groups dominate policy outcomes. Average citizen has near-zero independent influence in multivariate analysis of 1,800 policy outcomes. Perspectives on Politics 12(3):564-581, DOI 10.1017/S1537592714001595.	Prop 32 — Repeal / Reform Citizens United; Comp Docs (DNC campaign finance)
119	Restore Trust in Congress Act (January 2026, Senators Moody and Gillibrand) <i>congress.gov</i>	Law/Court Tier A	Bipartisan legislation implementing full congressional stock trading ban with mandatory divestment and ethics-committee civil enforcement. Enforcement mechanism matters: ethics-committee civil enforcement more effective than DOJ prosecution given Speech or Debate Clause.	Prop 23 — Ban Congressional Insider Trading; Bill 3/ACFM (Part III)
120	University of Maryland Program for Public Consultation — Stock Trading Poll <i>publicconsultation.org</i>	Think Tank Tier B	86% of Americans favor prohibiting congressional stock trading (Republicans 87%, Democrats 88%, independents 81%). Most bipartisan polling number in the platform.	Prop 23 — Ban Congressional Insider Trading; Bill 3/ACFM (Part III)
121	Harvard Journal on Legislation (November 2025) — STOCK Act <i>journals.law.harvard.edu/jol/</i>	Peer Review Tier B	Disclosure-based remedies from the 2012 STOCK Act failed to deter conflicts. Enforcement gaps are structural, not accidental. Civil enforcement by the respective chambers is the more effective route.	Prop 23 — Ban Congressional Insider Trading; Bill 3/ACFM (Part III)
122	Campaign Legal Center (2025) — Stock Trading Conflicts <i>campaignlegalcenter.org</i>	NGO/Civil Tier C	1 in 3 members traded stocks 2019–2021. 3,700+ trades posed potential conflicts of interest.	Prop 23 — Ban Congressional Insider Trading; Bill 3/ACFM (Part III)
123	Brennan Center for Justice (2024) — Voting Access <i>brennancenter.org</i>	NGO/Civil Tier C	Voter suppression measures reduce turnout among eligible voters by 2–8 percentage points, disproportionately affecting low-income, minority, and young voters.	Prop 16 — Address Gerrymandering; Comp Docs (P2025/DNC voting rights)
124	GAO (2014) — Voter ID Laws <i>gao.gov/products/gao-14-634</i>	Gov/Agency Tier A	Voter ID laws reduce eligible voter turnout with no documented fraud prevention benefit. In-person voter fraud rate: approximately 0.00004% of ballots cast.	Comp Docs (P2025 voter ID restrictions)
125	Levitsky & Ziblatt, “How Democracies Die” (Harvard, 2018) <i>hup.harvard.edu</i>	Peer Review Tier B	Politicization of civil service is one of the three primary mechanisms by which elected autocrats undermine democratic institutions.	Comp Docs (P2025 Schedule F / authoritarianism)
126	Church Committee (1975) / 9/11 Commission Report <i>intelligence.senate.gov</i>	Gov/Agency Tier A	Church Committee: politically directed intelligence leads to domestic spying and civil liberties violations. 9/11 Commission: intelligence failures resulted from politicization of assessments, not from insufficient presidential control.	Comp Docs (P2025 intelligence / executive control)
127	Williams Institute, UCLA School of Law (2021) — LGBTQ+ Economics <i>williamsinstitute.law.ucla.edu</i>	Think Tank Tier B	LGBTQ+ non-discrimination laws associated with 8.9% lower risk of poverty and improved economic outcomes.	Prop 14 — Bodily Autonomy; Comp Docs (P2025 LGBTQ+)
128	Trevor Project National Survey (2024) <i>thetrevorproject.org/survey-2024/</i>	NGO/Civil Tier C	LGBTQ+ youth who report having at least one accepting adult at school have 40% lower odds of attempting suicide. States with legal protections show 30–40% lower depression and suicidality.	Prop 14 — Bodily Autonomy; Comp Docs (P2025 LGBTQ+ in schools)
129	Brennan Center (2021) — Mass Incarceration & GDP <i>brennancenter.org</i>	NGO/Civil Tier C	Mass incarceration estimated to have reduced US GDP by \$78–87B annually through removed labor force participation.	Prop 11 — Non-Profit Prison System; Comp Docs (DNC criminal justice)

130	Fix the Court (2024) / Norm Ornstein (AEI) — SCOTUS Term Limits <i>fixthecourt.com</i>	Think Tank Tier C	18-year rotating term limit via senior status model is the most constitutionally durable mechanism — the Justice continues to serve as an active federal judge, avoiding Article III “good behavior” conflict. Fix the Court is the primary source. Norm Ornstein (American Enterprise Institute, not Brookings) has co-advocated this model; corrected from prior erroneous Brookings attribution.	Prop 33 — Supreme Court Reform; Bill 11/DIR
131	NIST AI Risk Management Framework (2023) <i>nist.gov/system/files/documents/2023/01/26/AI_RMF_1_0.pdf</i>	Gov/Agency Tier A	Systematic AI risks documented. Framework for AI governance and risk management. EU AI Act (2024) is the most comprehensive global framework currently in implementation.	Prop 30 — AI Safety & Rights Framework; Prop 7 — US Sovereign AI; Comp Docs
132	DHS OIG (2019–2024) — Detention Facilities <i>oig.dhs.gov</i>	Gov/Agency Tier A	Multiple reports documenting inadequate medical care, overcrowding, and in-custody deaths in CBP and ICE facilities. 41 in-custody deaths in 2022, highest in recorded history.	Prop 26 — Bipartisan Oversight of Detention Facilities
133	Harvard JCHS (2024) — Housing & Institutional Investment <i>jchs.harvard.edu</i>	Think Tank Tier A	12.1 million renter households severely cost-burdened (50%+ of income). Institutional investors own up to 40% of single-family rental homes in some metro submarkets.	Prop 27 — Restrict Corporate Home Ownership; Bill 8/HCI; Comp Docs (DNC housing)
134	NLIHC (2024) — Affordable Housing Shortage <i>nlihc.org</i>	Think Tank Tier B	US faces a shortage of 7.3 million affordable homes for the lowest-income renters.	Prop 27 — Restrict Corporate Home Ownership; Bill 8/HCI

7. EDUCATION — 11 entries (v8: 135–145)

#	Source · URL	Type	Key Finding	Documents Supported
135	OECD, Education at a Glance (Annual editions) <i>oecd.org/en/topics/education-at-a-glance.html</i>	OECD Tier A	Primary comparative education data: PISA results, per-pupil spending, attainment rates, and tuition comparisons across member nations. Primary GP scoring reference for all education proposals.	Prop 37 — Scandinavian Education; Prop 34 — Reduce Tuition; Capital Report (GP scoring ref)
136	OECD PISA (2023) — International Education Rankings <i>oecd.org/pisa/</i>	OECD Tier A	US 15-year-olds rank 28th in reading and 35th in mathematics among OECD nations. Finland, Estonia, South Korea, Japan consistently top-ranked.	Prop 37 — Adopt Scandinavian Education Model; Comp Docs (P2025 DoE elimination)
137	McKinsey Global Institute (2009) — Education Achievement Gap <i>mckinsey.com/industries/education</i>	Think Tank Tier C	Closing US educational achievement gap with top-performing nations would add 3–5% to GDP annually — cumulative \$40–100T over following decades.	Prop 37 — Adopt Scandinavian Education Model
138	UK Age Appropriate Design Code / EU Digital Services Act (2022) <i>ico.org.uk/childrens-code</i>	Law/Court Tier A	UK Children's Code (2021): restricts behavioral profiling, targeted advertising, and nudge techniques for users under 18. EU DSA minor protection provisions. Three-tier structure in DRDO Act Title V modeled on UK Children's Code.	Prop 35 — Digital Minor Protection Standards; Bill 7/DRDO (Title V)
139	NCES (2024) — US Tuition Data <i>nces.ed.gov</i>	Gov/Agency Tier A	Average published tuition at 4-year public institutions: \$10,940/year in-state. Tuition rose 179% in inflation-adjusted terms from 1980–2023.	Prop 34 — Reduce Tuition & Expand Adult Education; Comp Docs (DNC college affordability)
140	Federal Reserve Bank of New York (2024) — Student Debt <i>newyorkfed.org/microeconomics/hhd/c</i>	Gov/Agency Tier A	Student loan debt exceeds \$1.77T; 45M borrowers. Debt burden reduces homeownership rates, delays family formation, constrains consumption.	Comp Docs (DNC student loans; P2025 IDR elimination)
141	Jackson, Johnson, Persico (QJE 2016) — School Spending & Wages <i>academic.oup.com/qje/article-abstract/131/1/157/2461148</i>	Peer Review Tier A	10% increase in per-pupil spending throughout school career increases adult wages by 7% and reduces poverty rates by 3.5%. QJE 131(1):157-218, DOI 10.1093/qje/qjv036.	Prop 37 — Adopt Scandinavian Education Model; Comp Docs (DNC K-12 investment)
142	Quebec Consumer Protection Act §§248-249 (1980) / Irwin Toy v. Quebec (1989) <i>quebec.ca</i>	Law/Court Tier A	Complete ban on commercial advertising directed at under-13s upheld by Supreme Court of Canada (Irwin Toy v. Quebec, 1989). 40+ years of documented enforcement.	Prop 28 — Stricter Advertising Laws; Bill 7/DRDO (Title II; Title V)

143	Chile Law 20.606 (2016) / Taillie et al. (PLOS Medicine 2020) <i>journals.plos.org/plosmedicine/</i>	<i>Law/Court</i> Tier A	Chile food marketing restriction: 24% reduction in calories from sugar-sweetened beverages. Most rigorously evaluated advertising restriction globally.	Prop 28 — Stricter Advertising Laws
144	Boyland et al. (JAMA Pediatrics 2022) — Food Marketing Meta-Analysis <i>jamanetwork.com/journals/jamapediatrics</i>	<i>Peer Review</i> Tier A	96 studies confirm food marketing increases caloric intake and HFSS food choice. Dhar-Baylis (J. Marketing Research 2011): Quebec ban reduced fast-food purchase propensity 13%/week.	Prop 28 — Stricter Advertising Laws
145	UK Health and Care Act 2022 — HFSS Advertising Ban <i>legislation.gov.uk/ukpga/2022/31</i>	<i>Law/Court</i> Tier A	9pm watershed + 24hr online HFSS ad ban (enforcement January 2026). Estimated 20,000 fewer childhood obesity cases.	Prop 28 — Stricter Advertising Laws; Bill 7/DRDO

8. MILITARY & DEFENSE — 15 entries (v8: 146–159 with Source 153 split into 153a/153b)

Source 153 (Fortna, originally flagged Audit 1 as unresolved) is replaced by 153a (Princeton UP book) and 153b (ISQ journal article). See Maintainer Resolutions section for details.

#	Source · URL	Type	Key Finding	Documents Supported
146	ASCE Infrastructure Report Card (2021) <i>infrastructurereportcard.org</i>	<i>NGO/Civil</i> Tier B	Infrastructure investment gap \$2.6T over 10 years, C- grade. ASCE estimates \$3.3T economic benefit from closing the infrastructure gap.	Prop 51 — Strategic Military Workforce Pivot; Bill 2/IIC; Capital Report
147	BLS (2024) — Construction Workforce Gap <i>bls.gov/ooh/construction-and-extraction/</i>	<i>Gov/Agency</i> Tier A	Construction workforce gap of ~430,000 workers. Veteran underemployment in infrastructure trades documented as a transition gap.	Prop 51 — Strategic Military Workforce Pivot; Bill 4/FSW
148	Commission on Wartime Contracting (2011) <i>wartimecontracting.gov</i>	<i>Gov/Agency</i> Tier A	\$31–60B lost to contractor fraud and waste in Iraq and Afghanistan alone.	Prop 50 — Reduce Military Contractor Dependence; Capital Report
149	Quincy Institute / Brown University Costs of War (2025) <i>watson.brown.edu/costsofwar/</i>	<i>Think Tank</i> Tier C	Military contractors received 54% of \$4.4T Pentagon budget 2020–2024 (\$2.4T). Top 5 contractors received \$771B.	Prop 50 — Reduce Military Contractor Dependence; Capital Report
150	GAO-23-106123 — DoD Service Contracts High Risk / POGO Contractor Cost Analysis <i>gao.gov/products/gao-23-106123 / pogo.org</i>	<i>Gov/Agency</i> Tier B	DoD service contracts \$184–226B/yr flagged as high-risk (GAO-23-106123). The 1.83x contractor vs. federal employee cost ratio is from a separate POGO (Project on Government Oversight) analysis of contractor costs across occupational categories, not from this GAO report. Two sources combined here: GAO for the dollar volume; POGO for the cost ratio.	Prop 50 — Reduce Military Contractor Dependence; Capital Report
151	CISA (2024) — Critical Infrastructure Cyber Attacks <i>cisa.gov/topics/cyber-threats-and-advisories/ransomware</i>	<i>Gov/Agency</i> Tier A	2,365 ransomware attacks on US critical infrastructure in 2023 — 18% increase. State-sponsored attacks on critical infrastructure increased 40% year-over-year.	Prop 46 — Expand Cyberwarfare Defenses
152	Microsoft Digital Defense Report (2024) <i>microsoft.com/en-us/security/security-insider/microsoft-digital-defense-report-2024</i>	<i>Industry Research</i> Tier C	State-sponsored cyber attacks targeting critical infrastructure increased 40% year-over-year. Used for Cyberwarfare Defenses scoring. <i>Reclassified Audit 1: “Tech” is not in the defined source-type taxonomy; treated as Industry Research with disclosure.</i>	Prop 46 — Expand Cyberwarfare Defenses; Comp Docs (P2025 CYBERCOM)
153a	Fortna (2008), Does Peacekeeping Work? Shaping Belligerents' Choices after Civil War ◆ RESOLVED Audit 6 — Source 153 split into 153a / 153b <i>press.princeton.edu/books/paperback/9780691136714</i>	<i>Peer Review (book)</i> Tier A	Canonical empirical aggregation: UN peacekeeping reduces conflict recurrence by 50–85% in post-conflict environments. The book is the standard citation in modern peacekeeping literature. Princeton University Press, 2008.	Prop 52 — Multilateral Peacekeeping Coalition; Comp Docs (P2025 CYBERCOM)

153b	Fortna (2004), “Does Peacekeeping Keep Peace? International Intervention and the Duration of Peace After Civil War,” International Studies Quarterly 48(2):269–292 ◆ RESOLVED Audit 6 — Source 153 split into 153a / 153b academic.oup.com/isq/article-abstract/48/2/269/1888752	<i>Peer Review (journal)</i> Tier A	Precursor empirical paper. Earlier articulation of the peacekeeping duration-of-peace finding subsequently developed in the 2008 book.	Prop 52 — Multilateral Peacekeeping Coalition; Comp Docs (P2025 CYBERCOM)
154	Bulletin of Atomic Scientists, Doomsday Clock (2024) thebulletin.org	<i>Think Tank</i> Tier B	90 seconds to midnight — closest ever. Global nuclear risk at highest since Cold War. US-Russia strategic stability dialogue suspended.	Prop 65 — Nuclear Diplomacy; Comp Docs (P2025 nuclear arsenal)
155	Arms Control Association Fact Sheet (2024) armscontrol.org/factsheets/	<i>NGO/Civil</i> Tier B	9 countries hold nuclear weapons. US and Russia account for ~90% of warheads. Global nuclear risk context for nuclear diplomacy proposals.	Prop 65 — Nuclear Diplomacy; Comp Docs (P2025 nuclear arsenal)
156	Watson Institute Costs of War (2023) watson.brown.edu/costsofwar/	<i>Think Tank</i> Tier B	\$8T+ spent on post-9/11 operations. None had formal declarations of war. Used for War Powers Act reform scoring.	Prop 48 — Reinforce War Powers Act
157	Congressional Research Service (R42699, 2021) — War Powers everycrsreport.com/reports/R42699.html	<i>Congress</i> Tier A	The WPR's 48-year track record of non-enforcement is itself the evidentiary basis for reform. Presidents have deployed forces without authorization in multiple theaters since 1973.	Prop 48 — Reinforce War Powers Act; Comp Docs
158	DoD Inspector General (2023) — Pentagon Audit dodig.mil	<i>Gov/Agency</i> Tier A	\$247.5M in duplicate payments, \$6.8B in accounting adjustments without documentation, \$1.9T in assets that “cannot be verified.”	Prop 49 — Pentagon Budget Audit Accountability
159	Planetary Society / BDO USA (2023) — NASA Economic Impact; RTI International / NCO-PNT — GPS Economic Value planetary.org / nco.gov	<i>NGO/Civil</i> Tier B	NASA generates \$7.19 in economic output per \$1 invested, supporting ~312,000 US jobs (Planetary Society/BDO). The \$1.4T GPS annual GDP contribution is a separate finding from RTI International research commissioned by the National Coordination Office for Space-Based Positioning, Navigation, and Timing (NCO/PNT) — not from the Planetary Society/BDO study.	Prop 47 — Expand NASA & Space Force; Capital Report

9. AGRICULTURE & ENVIRONMENT — 10 entries (v8: 160–169)

#	Source · URL	Type	Key Finding	Documents Supported
160	GAO (2024) — Foreign Agricultural Land Ownership gao.gov	<i>Gov/Agency</i> Tier A	43.4 million acres of US agricultural land under foreign ownership as of 2021, up 66% over a decade.	Prop 53 — Water Rights & Foreign Ownership Ban; Prop 27 — Corporate Home Ownership; Bill 8/HCI
161	National Academy of Sciences (2023) — Desalination Costs nationalacademies.org	<i>Think Tank</i> Tier A	Desalination costs have fallen 80% since 1970 and continue declining with membrane technology improvements.	Prop 60 — Invest in Desalination Infrastructure
162	FAO Food and Agriculture State Report (2023) fao.org/world-food-situation/	<i>UN/Intl</i> Tier A	Countries with domestic food security buffers have 23% lower acute food insecurity rates during global commodity price shocks. Aquaculture now accounts for 57% of seafood for human consumption globally.	Prop 54 — Domestic Food Priority Laws; Prop 55 — Marine Life & Aquaculture
163	NOAA Fisheries Stock Assessment (2024) fisheries.noaa.gov/national/population-assessments/fish-stock-sustainability-index	<i>Gov/Agency</i> Tier A	46 stocks subject to overfishing or overfished. Ocean-based industries contribute \$373B to US GDP annually.	Prop 40 — Shoreline & Fishery Protection; Prop 55 — Marine Life & Aquaculture

164	NIBS “Natural Hazard Mitigation Saves” (2019) / FEMA BRIC Program — Pre-Disaster Mitigation ROI <i>nibs.org/natural-hazard-mitigation-saves-2019-report</i>	<i>NGO/Civil</i> Tier A	Every \$1 invested in pre-disaster mitigation saves \$6 in post-disaster recovery costs. The primary source is the National Institute of Building Sciences (NIBS) “Natural Hazard Mitigation Saves” report series (2019 edition). FEMA and OMB cite this finding in budget documents but NIBS is the originating research organization.	Prop 59 — National Climate Preparedness Corps
165	Basel Convention Plastic Waste Amendments (Decision BC-14/12, 2021) <i>basel.int</i>	<i>Law/Court</i> Tier A	187 Parties brought most plastic waste under Prior Informed Consent procedure. Effective January 2021. EU Regulation 2024/1157 imposes full non-OECD export ban from November 2026.	Prop 3 — Ban Waste Export
166	International Seabed Authority (2023) <i>isa.int</i>	<i>UN/Intl</i> Tier A	Deep-sea mining risks are not yet adequately characterized. Moratorium recommended pending environmental studies.	Prop 55 — Protect Marine Life & Expand Aquaculture
167	Reagan-Udall Foundation Independent Panel (2022) — FDA Reform <i>reaganudall.org</i>	<i>Think Tank</i> Tier B	Unified FDA structure creates organizational tensions compromising both food safety and drug review. Commissioned by FDA Commissioner Califf.	Prop 61 — FDA Split & Reform
168	DOL Wage and Hour Division (2023) — Farm Labor Violations <i>dol.gov/agencies/whd</i>	<i>Gov/Agency</i> Tier A	Agriculture is among the highest-violation sectors for FLSA minimum wage and child labor provisions.	Prop 57 — Address Farm Labor Abuses
169	Economic Policy Institute (2022) — Farm Worker Wage Theft <i>epi.org</i>	<i>Think Tank</i> Tier C	Undocumented farm workers face systematic wage theft estimated at billions annually. Limited recourse due to status vulnerability.	Prop 57 — Address Farm Labor Abuses

10. FOREIGN AFFAIRS & IMMIGRATION — 7 entries (v8: 170–176)

#	Source · URL	Type	Key Finding	Documents Supported
170	NAS, “The Economic and Fiscal Consequences of Immigration” (2016) <i>nationalacademies.org/our-work/the-economic-and-fiscal-consequences-of-immigration</i>	<i>Think Tank</i> Tier A	Immigrants and descendants make strongly positive net fiscal contributions over 75-year time horizons.	Prop 63 — Selective & Streamlined Immigration; Comp Docs (P2025/DNC immigration)
171	CBO (2024) — Immigration GDP Projection <i>cbo.gov</i>	<i>Gov/Agency</i> Tier A	Immigration projected to increase GDP by \$7T over following decade through labor force expansion, entrepreneurship, and innovation.	Prop 63 — Selective & Streamlined Immigration; Capital Report; Comp Docs
172	American Immigration Council (2023) — DACA Economic Contribution <i>americanimmigrationcouncil.org</i>	<i>NGO/Civil</i> Tier B	DACA recipients contribute \$33.4B in taxes annually. 700,000+ individuals who have no other country of effective nationality.	Comp Docs (DNC DACA / Dreamers protection)
173	NBER (Pope, 2016) — DACA Wage Effects <i>nber.org</i>	<i>Peer Review</i> Tier A	DACA significantly increases wages, job quality, and health insurance coverage for recipients.	Comp Docs (DNC DACA / Dreamers wage effects)
174	RAND Corporation (2020, 2023) — Alliance Networks <i>rand.org</i>	<i>Think Tank</i> Tier B	Strong alliance networks reduce US military deployment costs by 30–50% in comparable scenarios. Multilateral frameworks reduce cost per unit of security through burden-sharing.	Prop 62 — Diplomatic Relationship Restoration; Comp Docs (P2025 isolationism/NATO)
175	Ikenberry, “Liberal Leviathan” (Princeton University Press, 2011) <i>press.princeton.edu/books/paperback/9780691151236/liberal-leviathan</i>	<i>Academic Book</i> Tier B	Rules-based international order produces documented economic and security benefits for the US that substantially exceed the cost of leadership. <i>Reclassified Audit 1: Princeton UP monograph (not journal article); type updated from Peer Review to Academic Book.</i>	Prop 62 — Diplomatic Relationship Restoration; Comp Docs (P2025 multilateralism)
176	ILO Convention 138 / Convention 182 — Child Labor <i>ilo.org</i>	<i>UN/Intl</i> Tier A	Minimum Age Convention (138) ratified by 173 countries. Worst Forms of Child Labor Convention (182) ratified by 187 countries. Universal norms against weakening child labor protections.	Prop 57 — Address Farm Labor Abuses; Comp Docs (P2025 child labor)

11. PHARMACEUTICAL & PATENT POLICY — 4 entries (v8: 177–180)

#	Source · URL	Type	Key Finding	Documents Supported
177	RAND Drug Price Comparison Report (2024) <i>rand.org/pubs/research_reports/RRA788-2.html</i>	<i>Think Tank</i> Tier A	US brand-name drug prices are 2.56x the average of 32 comparable OECD nations.	Prop 31 — Patent Law Reform; Comp Docs (P2025 drug prices; DNC negotiation)
178	CBO, Drug Negotiation Score (pub/58850) <i>cbo.gov/publication/58850</i>	<i>Gov/Agency</i> Tier A	IRA drug negotiation generates \$237B in deficit savings over 10 years from the first 10 drugs alone. CBO: 13 fewer new drugs out of 1,300 over 30 years — the principal trade-off.	Prop 31 — Patent Law Reform; Capital Report; Comp Docs (DNC drug negotiation)
179	I-MAK, “Overpatented, Overpriced” (2022) <i>i-mak.org</i>	<i>NGO/Civil</i> Tier C	Top 12 drugs by revenue cost \$96B/year in excess pricing due to patent evergreening abuse.	Prop 31 — Patent Law Reform; Capital Report
180	FTC Patent Assertion Entity Study (2016) / Pay-for-Delay <i>ftc.gov/reports/patent-assertion-entity-activity-ftc-study</i>	<i>Gov/Agency</i> Tier B	FTC estimates pay-for-delay costs \$3.5B/yr. Pharmaceutical patent abuse documentation.	Prop 31 — Patent Law Reform; Capital Report

12. DEMOCRACY & ELECTORAL REFORM — 5 entries (v8: 181–185)

#	Source · URL	Type	Key Finding	Documents Supported
181	Brennan Center for Justice (2022) — Gerrymandering <i>brennancenter.org</i>	<i>NGO/Civil</i> Tier C	Extreme partisan gerrymandering produces districts mathematically unresponsive to voter preference shifts. Stephanopoulos-McGhee (U Chicago Law Review, 2015) developed efficiency gap measure used in federal litigation.	Prop 16 — Address Gerrymandering; Bill 11/DIR
182	OMB/CBO (2019) — Government Shutdown Cost <i>gao.gov / whitehouse.gov/omb</i>	<i>Gov/Agency</i> Tier A	35-day 2018-19 shutdown cost the US economy \$11 billion (\$3B permanently lost). Government Accountability Office (2021): 18 significant funding gaps since 1980.	Prop 18 — Shutdown Accountability for Congress
183	Northwestern Medill Local News Report (2025) <i>localnewsinitiative.northwestern.edu</i>	<i>Peer Review</i> Tier A	50M Americans in news deserts. 213 local news desert counties (record high). Peterson-Napoli (2024): media consolidation reduces local news volume by 35–60% within 3 years of acquisition.	Prop 19 — Restore Independent Local News; Media Kit
184	Snyder & Strömberg (Journal of Political Economy, 2010) <i>journals.uchicago.edu/doi/10.1086/652903</i>	<i>Peer Review</i> Tier A	JOURNAL CORRECTED (Audit 2): Published in JPE 118(2):355-408, NOT the AER. The AER DOI in the prior citation was fabricated. Local newspaper coverage reductions cause measurable reductions in voter turnout, increased corruption in local government, and reduced electoral accountability. DOI 10.1086/652903.	Prop 19 — Restore Independent Local News
185	Freedom House (2024) — Global Democracy <i>freedomhouse.org/report/freedom-in-the-world</i>	<i>NGO/Civil</i> Tier B	18th consecutive year of global democratic decline. V-Dem (2024): 72% of world population lives under autocracy.	Comp Docs (DNC counter-authoritarianism)

13. HEALTHCARE ECONOMICS & INSURANCE MARKETS — 6 entries (v8: 186–191)

#	Source · URL	Type	Key Finding	Documents Supported
186	OECD SME Finance Scoreboard (2023) <i>oecd.org</i>	<i>OECD</i> Tier A	All 38 OECD member states provide some form of direct state financing or guarantee for SMEs. US SBA is among the most minimal such programs in the OECD.	Comp Docs (P2025 eliminate SBA lending)
187	ACOG and AMA (2024) — IVF Access <i>acog.org / ama-assn.org</i>	<i>NGO/Civil</i> Tier B	IVF restrictions would eliminate access for ~2% of all births in the US (approximately 75,000 births annually).	Prop 14 — Bodily Autonomy; Comp Docs (P2025 IVF/contraception)
188	Himmelstein & Woolhandler (Annals 2020) — Admin Savings <i>annals.org</i>	<i>Peer Review</i> Tier B	Administrative savings from single-payer: \$400B/yr. Primary source for administrative efficiency argument in universal healthcare.	Prop 13 — Universal Healthcare; Capital Report

189	Deming (Review of Economics and Statistics, 2009) — Head Start <i>journals.sagepub.com</i>	Peer Review Tier A	Head Start participation increases high school graduation rates and college enrollment for participants. Used for P2025 Eliminate Head Start scoring.	Comp Docs (P2025 eliminate Head Start)
190	Perry Preschool Project / Abecedarian Project (Heckman et al., 2010; Campbell et al., Science, 2014) <i>heckmanequation.org</i>	Peer Review Tier A	\$7–12 return per \$1 invested in high-quality early childhood programs through reduced crime, higher wages, and better health outcomes over 30-year longitudinal follow-up.	Prop 10 — Universal Basic Investment for Children; Comp Docs (P2025 Head Start)
191	Barnichon, Matthes & Ziegenbein (2018) — FRBSF Economic Letter 2018-19 <i>frbsf.org/economic-research/publications/economic-letter/2018/august/financial-crisis-at-10-years-will-we-ever-recover/</i>	Gov/Agency Tier A	ATTRIBUTION CORRECTED (Audit 1): Prior citation listed Berkshire (San Francisco Fed, 2017) — fabricated attribution. Correct authors: Régis Barnichon, Christian Matthes, Alexander Ziegenbein. Year: 2018. The Financial Crisis at 10: Will We Ever Recover?, FRBSF Economic Letter 2018-19, Aug. 13, 2018. Lifetime per-capita income loss from 2007-08 financial crisis: ~\$70,000 per American.	Capital Report; Comp Docs (P2025 financial deregulation)

14. SCORING METHODOLOGY REFERENCE SOURCES — 12 entries (v8: 192–199 + v9: 303–306 multiplier literature)

v9 additions (Sources 303–306) are the academic basis for Capital Report v3 \$1.5 honest engagement on multipliers.

#	Source · URL	Type	Key Finding	Documents Supported
192	OECD, Health at a Glance (Annual) <i>oecd.org/en/topics/health-at-a-glance.html</i>	OECD Tier A	Primary comparative health data for GP scoring of all healthcare-related proposals. International precedent verification across 38+ OECD member countries.	Prop 13 — Universal Healthcare; Prop 8 — Restore Public Health (OECD GP scoring ref)
193	OECD, Education at a Glance (Annual) <i>oecd.org/en/topics/education-at-a-glance.html</i>	OECD Tier A	Primary comparative education data for GP scoring. PISA results, per-pupil spending, attainment rates, and tuition comparisons.	Prop 37 — Scandinavian Education; Prop 34 — Reduce Tuition (OECD GP scoring ref)
194	OECD, Tax Administration Series (Annual) <i>oecd.org/tax/forum-on-tax-administration/</i>	OECD Tier A	Primary comparative tax administration data. Pre-filing rates, e-filing rates, and compliance infrastructure across 58+ jurisdictions.	Prop 1 — IRS Reform; Prop 4 — Close Wealth Loopholes; Prop 6 — Billionaire Tax (OECD GP scoring ref)
195	GAO, High Risk List (Annual) <i>gao.gov/highrisk/overview</i>	Gov/Agency Tier A	Primary reference for US Transition difficulty (UT) scores on proposals involving federal agency reform. Identifies agencies with documented management deficiencies.	Prop 39 — Federal Inspectors; Prop 61 — FDA Split; Prop 43 — Airports; Prop 49 — Pentagon (GAO GP ref)
196	Congressional Research Service (CRS) Reports — Various <i>congress.gov/crs-products</i>	Congress Tier A	Used throughout for US legislative history, constitutional analysis, and US Transition scoring. CRS reports cited: War Powers (R42699); Tax Gap (R47858); Federal Tax Gap Overview (IF11887).	Multiple bills — UT scoring reference (CRS reports compilation)
197	World Bank, Governance Indicators <i>worldbank.org/en/publication/worldwide-governance-indicators</i>	UN/Intl Tier B	Cross-national comparison of regulatory quality, rule of law, and government effectiveness when establishing GP precedent scores for governance reform proposals.	Prop 16 — Gerrymandering; Prop 33 — Supreme Court Reform; Prop 29 — Term Limits (World Bank GP ref)
198	RAND Corporation — Multiple Studies <i>rand.org</i>	Think Tank Tier B	Multiple RAND studies cited across platform: gun policy (2024), alliance networks (2020, 2023), drug policy (2021), community policing (2020), multilateralism (2019). RAND is the primary cited think tank across defense and security proposals.	Prop 46 — Cyberwarfare; Prop 50 — Reduce Military Contractor; Prop 48 — War Powers (RAND multi-study ref)
199	OECD Social Expenditure Database (Annual) <i>oecd.org/social/expenditure.htm</i>	OECD Tier A	US social spending is 18.4% of GDP vs. OECD average 21.1%. Primary comparative source for social program scoring. Safety net spending context.	Comp Docs (P2025 SNAP/Medicaid cuts; DNC safety net)
303	Orchard, Ramey & Wieland, NBER WP 31584 (rev. October 2024) <i>nber.org/papers/w31584</i>	Peer Review Tier A	General-equilibrium consumption multipliers from temporary cash transfers below 0.2 across four case studies (US 2001 rebate, US 2008 rebate, Singapore, Australia). Directly challenges Capital Report v2's countercyclical-transfer claim.	Capital Report v3 \$1.5; multiplier methodology

304	Ramey, “Do Temporary Cash Transfers Stimulate the Macroeconomy? Evidence from Four Case Studies,” IMF Economic Review (2025) <i>IMF Economic Review</i>	Peer Review Tier A	Synthesis: temporary cash transfers “likely provided little or no macroeconomic stimulus in advanced economies.” Companion to NBER 31584. Foundational v3 methodology reference for the \$1.5 honest engagement.	Capital Report v3 \$1.5; multiplier methodology
305	Auerbach, Gorodnichenko, McCrory & Murphy, “Fiscal Multipliers in the Covid-19 Recession,” NBER WP 29531 (rev. May 2025) <i>nber.org/papers/w29531</i>	Peer Review Tier A	Reaffirms larger multipliers in recessions vs. expansions (~2.0 vs. <1.0); supply constraints reduce multipliers even in recession. Supports state-dependent claim with caveat — basis for v3 government-purchase multiplier framing in Scenario C.	Capital Report v3 \$1.5 + \$5.4; multiplier methodology
306	Jo & Zubairy, “State-Dependent Government Spending Multipliers,” AEJ Macroeconomics 17(1), Jan 2025 <i>(AEA member access — paywalled)</i>	Peer Review Tier A	Spending multipliers larger specifically in low-inflation recessions (downward nominal wage rigidity mechanism). Critical caveat: current high-inflation environment would suppress multipliers in any near-term recession. Refines the state-dependent claim for v3.	Capital Report v3 \$1.5 + \$5.4; multiplier methodology

15. CONSTITUTIONAL LAW ARCHITECTURE — 12 entries (v8: 200–210 + v9: 318)

#	Source · URL	Type	Key Finding	Documents Supported
<i>These sources are cited in the bill frameworks (REF_RDNC_Leg02–Leg14) as constitutional architecture notes, not in the scoring methodology. All five priority bills requiring formal constitutional counsel review are noted.</i>				
200	NYSRPA v. Bruen, 597 U.S. 1 (2022) — Text-and-History Standard <i>supreme.justia.com/cases/federal/us/597/20-843/</i>	Law/Court Tier A	Established the text-and-history standard for Second Amendment analysis. NFSA two-track architecture is specifically designed to align with this standard: shall-issue certification on objective criteria only, applied to acquisition not possession.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III); ConstitutionalResearch Group A
201	Maryland Shall Issue v. Moore, 4th Cir. en banc (No. 21-2017, Aug. 23, 2024), cert. denied Jan. 2025 <i>ca4.uscourts.gov/opinions/212017.p.pdf</i>	Law/Court Tier A	DOCKET CORRECTED (Audit 2): 21-2017 (not 21-1255; docket 21-1255 is <i>Bianchi v. Brown</i> , a different Second Amendment case). Maryland Handgun Qualification License upheld 14-2 en banc (Keenan, J. writing for the court). Cert denied by Supreme Court January 2025. Strongest available legal precedent for NFSA Track B Federal Civilian Ownership Certificate.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — COUNSEL PRIORITY); ConstitutionalResearch Group A
202	United States v. Rahimi, 602 U.S. 680 (2024) — Relevantly Similar Standard <i>supremecourt.gov/opinions/23pdf/22-915_8o6b.pdf</i>	Law/Court Tier A	Clarified Bruen test application. “Relevantly similar” standard incorporated into NFSA acquisition-only, objective-criteria-only constitutional architecture. Roberts, C.J., 8-1. Decided June 21, 2024.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III); ConstitutionalResearch Group A
203	Moore v. United States, 602 U.S. 572 (2024) — Realization Requirement <i>supremecourt.gov/opinions/23pdf/22-800_jg6o.pdf</i>	Law/Court Tier A	CITATION CORRECTED (Audit 2): 602 U.S. 572 (not 600 U.S. 771; OT 2023 cases are in volume 602). Kavanaugh, J. for the Court; 7-2 on result; fractured on rationale. Upheld the Mandatory Repatriation Tax but explicitly declined (per Barrett concurrence) to rule on whether Congress can tax unrealized gains generally. BWDS Act restructured from net-worth property tax to three-track Billionaire Income Tax precisely to operate within what Moore confirmed as safe ground. Thomas dissent argued realization is constitutionally required.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — COUNSEL PRIORITY); ConstitutionalResearch Group B
204	South Dakota v. Dole, 483 U.S. 203 (1987) — Spending Clause Conditions <i>supreme.justia.com/cases/federal/us/483/203/</i>	Law/Court Tier A	Federal funding conditions on state policy adoption. Constitutional authority for HCI Act federal incentive grant architecture. How the interstate highway system and drinking age were nationalized via conditional spending.	Prop 27 — Corporate Home Ownership; Bill 8/HCI (Part III); ConstitutionalResearch Group D
205	Sorrell v. IMS Health, 564 U.S. 552 (2011) <i>supreme.justia.com/cases/federal/us/564/552/</i>	Law/Court Tier A	First Amendment constraints on commercial data regulation. DRDO Act uses data fiduciary framing rather than property rights framework specifically to navigate Sorrell exposure.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — COUNSEL PRIORITY); ConstitutionalResearch Group C

206	Ruckelshaus v. Monsanto, 467 U.S. 986 (1984) <i>supreme.justia.com/cases/federal/us/467/986/</i>	Law/Court Tier A	Takings Clause constraints on data ownership frameworks. DRDO Act avoids “data ownership” language and uses “data fiduciary” framing to avoid Ruckelshaus exposure.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — COUNSEL PRIORITY); ConstitutionalResearch Group C
207	Speech or Debate Clause, Art. I, §6, cl. 1 <i>constitution.annotated.congress.gov</i>	Law/Court Tier A	Constitutional constraint on DOJ prosecution of members of Congress for legislative acts. ACFM Act uses ethics-committee civil enforcement as the primary mechanism, not DOJ prosecution, because civil enforcement does not face Speech or Debate Clause exposure that criminal prosecution would.	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — COUNSEL PRIORITY); ConstitutionalResearch Group F
208	IRC §§475, 1256, 1296, Subpart F — Existing Mark-to-Market Mechanisms <i>irs.gov/irm</i>	Law/Court Tier A	Existing tax code mechanisms for taxing income without requiring an asset sale. BWDS Act constitutional construction subsection explicitly frames the Billionaire Income Tax under Subtitle A (income tax), not a new property-based tax, using these existing statutory models.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — statutory arch); ConstitutionalResearch Group B
209	District of Columbia v. Heller, 554 U.S. 570 (2008) <i>supreme.justia.com/cases/federal/us/554/570/</i>	Law/Court Tier A	Established individual right to keep and bear arms. NFSA Second Amendment savings clause cites Heller by name. Right to keep arms for traditionally lawful purposes is explicitly preserved in the bill's grandfathering provision.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III); ConstitutionalResearch Group A
210	McDonald v. City of Chicago, 561 U.S. 742 (2010) <i>supreme.justia.com/cases/federal/us/561/742/</i>	Law/Court Tier A	Incorporated the Second Amendment against the states through the Fourteenth Amendment. NFSA architecture must navigate both federal and state constitutional doctrine.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III); ConstitutionalResearch Group A
318	Moore v. United States, 602 U.S. ____ (June 20, 2024) <i>supremecourt.gov/opinions/23pdf/22-800_3e04.pdf</i>	Law/Court Tier A	7-2 upheld the Mandatory Repatriation Tax; Court explicitly declined to resolve whether realization is constitutionally required. Footnote disclaimed taxes on wealth, holdings, and appreciation. At least 4 plausible hostile votes (Alito, Thomas, Gorsuch, plus Barrett's concurrence). Constitutional risk for wealth tax remains high. Note: same case as Source 203 (BWDS architecture focus); this entry registered separately to support Capital Report v3 wealth-tax constitutional risk analysis.	Wealth Tax; Bill 5/BWDS; Capital Report v3 Proposal 3

16. COMPARATIVE GOVERNANCE & DEMOCRATIC STUDIES — 3 entries (v8: 211–213)

#	Source · URL	Type	Key Finding	Documents Supported
211	V-Dem Institute (2023, 2024) — Democratic Erosion <i>v-dem.net</i>	Think Tank Tier A	V-Dem (2023): Hungary and Turkey documented as cases of deliberate democratic erosion. V-Dem (2024): 72% of world population lives under autocracy. 18th consecutive year of global democratic decline.	Comp Docs (P2025 Schedule F; authoritarianism)
212	NAPA, Merit Civil Service System (2003) <i>napawash.org</i>	Think Tank Tier B	Merit civil service system is the foundational mechanism for consistent, non-partisan service delivery across administrations.	Comp Docs (P2025 Schedule F; merit civil service)
213	American Antitrust Institute / RAND Drug Policy Research Center / Brookings Institution — Multiple Studies <i>antitrustinstitute.org / rand.org / brookings.edu</i>	Think Tank Tier B	Composite entry for multi-study citations: AAI consolidation research; RAND drug policy (2021); Brookings antitrust and economic competition research. All are frequently cited across multiple proposals and documents.	Multiple ARA proposals; Comp Docs (multi-proposal GP/B reference)

17. CONSTITUTIONAL LAW RESEARCH — LEGISLATIVE ARCHITECTURE (PHASE 2, GROUPS A–G) — 58 entries (v8: 214–271)

Largest single category. Group A (Second Amendment/Bruen), Group B (Sixteenth Amendment/Taxation), Group C (First Amendment/Data), Group D (Spending Clause/Coercion), Group E (Article III/Governance), Group F (Speech or Debate Clause), Group G (Byrd Rule/Reconciliation).

#	Source · URL	Type	Key Finding	Documents Supported
---	--------------	------	-------------	---------------------

214	Antonyuk v. James, 120 F.4th 941 (2d Cir. 2024) — NY CCIA Post-Bruen <i>ag.ny.gov/sites/default/files/decisions/antonyuk-2d-cir-post-gvr-op.pdf</i>	<i>Law/Court</i> Tier A	Upheld New York's Concealed Carry Improvement Act good-moral-character requirement, training, in-person interview, and most sensitive-locations provisions. Struck social-media-disclosure and private-property default. GVR'd by SCOTUS July 2024 in light of Rahimi; reissued October 24, 2024; cert denied April 7, 2025 (No. 24-795). Key post-Bruen licensing circuit authority.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III); ConstitutionalResearch Group A
215	McRorey v. Garland, 99 F.4th 831 (5th Cir. 2024) — 18-20-Year-Old Delays <i>ca5.uscourts.gov/opinions/pub/24/24-30043-CR2.pdf</i>	<i>Law/Court</i> Tier A	Fifth Circuit upheld enhanced background checks and de-facto 10-day delays for 18-20-year-old purchasers under Bruen footnote 9. Treated footnote 9 as endorsing background-check shall-issue regimes generally. Supports NFSA Track B objective-criteria structure.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — 18-20 licensing); ConstitutionalResearch Group A
216	Bianchi v. Brown, 111 F.4th 438 (4th Cir. 2024) (en banc) — Assault Weapons Ban <i>congress.gov/crs-product/LSB11219</i>	<i>Law/Court</i> Tier A	4th Circuit en banc upheld Maryland assault weapons ban 10-5. NOTE: docket 21-1255 (Bianchi) is the assault weapons case; docket 21-2017 (Maryland Shall Issue v. Moore, Source 201) is the HQL licensing case. Cert denied alongside Snope v. Brown June 2, 2025.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — assault-category definition); ConstitutionalResearch Group A
217	NAGR v. Lamont, 153 F.4th 213 (2d Cir. 2025) — CT Semi-Automatic Ban Upheld <i>independent.org/article/2025/09/10/courts-ban-semiautomatic-firearms/</i>	<i>Law/Court</i> Tier A	Second Circuit upheld Connecticut semi-automatic firearms ban post-Bruen. Used dangerous-or-unusual standard. Snope v. Brown cert denied June 2, 2025 alongside this case trajectory. Relevant to NFSA assault-category definition constitutionality.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — assault-category definition); ConstitutionalResearch Group A
218	United States v. Morgan (10th Cir. Sept. 2, 2025) — Hughes Amendment Machine Gun Ban <i>ca10.uscourts.gov/sites/ca10/files/opinions/010111292933.pdf</i>	<i>Law/Court</i> Tier A	10th Circuit unanimously reversed district court; upheld 26 U.S.C. §922(o) machine gun ban post-Bruen holding machine guns not “in common use” for self-defense at Bruen step one. 6th Circuit (Bridges) and 9th Circuit (Kittson) reached same result. No circuit split on §922(o). Cert pending No. 25-6055.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — Hughes Amendment/NFA); ConstitutionalResearch Group A
219	Snope v. Brown / Kavanaugh Statement (SCOTUS, June 2, 2025) — AR-15 Cert Watch <i>firearmslaw.duke.edu/2025/09/scotus-gun-watch-week-of-9-9-25</i>	<i>Law/Court</i> Tier A	SCOTUS denied cert in Snope v. Brown (Maryland assault weapons ban) and Ocean State Tactical v. Rhode Island (magazines) June 2, 2025. Three Justices dissented (Thomas, Alito, Gorsuch). Justice Kavanaugh wrote separately that “this Court should and presumably will address the AR-15 issue soon, in the next Term or two.” Viramontes v. Cook County (No. 25-238) and Duncan v. Bonta (No. 25-198) relisted 11+ times as of April 2026.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — assault-category SCOTUS watch); ConstitutionalResearch Group A
220	ANJRPC v. Attorney General New Jersey (3d Cir. en banc, argued Oct. 15, 2025) — PENDING <i>independent.org/article/2025/10/22/3d-circuit-oral-argument-on-n-j-rifle-ban/</i>	<i>Law/Court</i> Tier A	Third Circuit en banc hearing on New Jersey assault weapons and magazine ban. Panel had upheld surety-regime analog for referrer requirement but struck liability-insurance mandate. With Trump-era appointments, decision could produce first circuit-level strike of assault weapons ban and create clean SCOTUS circuit split. Decision pending as of April 2026.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — assault-category highest risk; monitor); ConstitutionalResearch Group A
221	United States v. Peterson (5th Cir., reissued Aug. 27, 2025) — NFA-as-Shall-Issue <i>ca5.uscourts.gov/opinions/pub/24/24-30043-CR2.pdf</i>	<i>Law/Court</i> Tier A	Fifth Circuit held suppressors are not “arms” at Bruen step one; on more durable rationale, held NFA registration is itself analogous to Bruen footnote 9 shall-issue licensing — fingerprints plus background check plus objective criteria. This is the most important post-Bruen authority formally analogizing NFA registration to shall-issue licensing. Supports FCOC Track B architecture.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — FCOC constitutional analog); ConstitutionalResearch Group A
222	Gonzales v. Raich, 545 U.S. 1 (2005) — Commerce Clause Intrastate Activity <i>supreme.justia.com/cases/federal/us/545/1/</i>	<i>Law/Court</i> Tier A	Upheld Controlled Substances Act as applied to locally grown marijuana under Commerce Clause. Establishes that Congress may regulate intrastate economic activity that is part of a larger interstate regulatory scheme. Foundation for Track B FCOC jurisdiction over intrastate firearm acquisitions.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III); Prop 27 — Corporate Home Ownership; Bill 8/HCI (Part III); ConstitutionalResearch Group A/D
223	Koons/Siegel v. Platkin (3d Cir. en banc, argued Feb. 11, 2026) — PENDING <i>ammoland.com/2026/02/koons-siegel-v-platkin-cases-heard-en-banc-at-3rd-circuit/</i>	<i>Law/Court</i> Tier A	Third Circuit en banc hearing NJ carry licensing scheme. Panel upheld surety-analogy for four-referrer requirement, struck \$50 victim-fund tax and liability-insurance mandate as not shall-issue and not historically grounded. Post-Rahimi treatment of surety doctrine directly relevant to NFSA Track B design. Decision pending.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — surety-analog; monitor); ConstitutionalResearch Group A

224	Eisner v. Macomber, 252 U.S. 189 (1920) — Original Realization Doctrine <i>supreme.justia.com/cases/federal/us/252/189/</i>	<i>Law/Court</i> Tier A	Established stock dividends are not “income” because they do not “sever” value from capital. The original source of the constitutional realization requirement. Substantially eroded by Bruun (1940), Horst (1940), Cottage Savings (1991), and Glenshaw Glass (1955). Invoked by Thomas/Barrett dissents in Moore (2024). BWDS must navigate Macomber’s survival as a live doctrinal constraint.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — realization doctrine); ConstitutionalResearch Group B
225	Helvering v. Bruun, 309 U.S. 461 (1940) — Realization Not Required for Land <i>supreme.justia.com/cases/federal/us/309/461/</i>	<i>Law/Court</i> Tier A	Court held taxpayer realized gain on lease cancellation without a “sale or exchange” event — first significant erosion of Macomber’s severance requirement. Combined with Horst (1940): realization occurs at “earliest opportunity to realize income.” Establishes that constructive or deemed-realization events are constitutional.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — realization doctrine); ConstitutionalResearch Group B
226	Cottage Savings Ass’n v. Commissioner, 499 U.S. 554 (1991) — Low Realization Threshold <i>supreme.justia.com/cases/federal/us/499/554/</i>	<i>Law/Court</i> Tier A	Realization event requires only “material difference” in property exchanged; threshold is low and primarily statutory (IRC §1001). Substantially confirms that Congress has broad authority to define what constitutes a realization event. Supports BWDS deferral-charge mechanism as legislatively defined realization event.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — deferral charge); ConstitutionalResearch Group B
227	Flint v. Stone Tracy Co., 220 U.S. 107 (1911) — Corporate Privilege Excise <i>supreme.justia.com/cases/federal/us/220/107/</i>	<i>Law/Court</i> Tier A	Upheld corporate income tax as an excise on the privilege of doing business in corporate form, not a direct tax subject to apportionment. Foundation for framing digital services levy as a Flint-type excise on the privilege of providing digital services in US commerce — avoiding the Sixteenth Amendment/apportionment question entirely.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — digital services levy excise framing); ConstitutionalResearch Group B
228	Chamber of Commerce v. Lierman (4th Cir. Aug. 15, 2025) — Maryland Digital Ad Tax <i>pwc.com/us/en/services/tax/library/maryland-digital-ad-tax-pass-through-ban-unconstitutional.html</i>	<i>Law/Court</i> Tier A	Fourth Circuit struck Maryland’s Digital Advertising Tax pass-through ban as a First Amendment violation (speaker-based discrimination) while dismissing ITFA, Commerce Clause, and Due Process challenges to the underlying tax under Tax Injunction Act. Key cautionary precedent for BWDS Title II digital services levy: avoid pass-through bans; avoid content-based or speaker-based exemptions.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — digital services levy 1A); ConstitutionalResearch Group B
229	Sonzinsky v. United States, 300 U.S. 506 (1937) — Taxing Power Belt-and-Suspenders <i>supreme.justia.com/cases/federal/us/300/506/</i>	<i>Law/Court</i> Tier A	Upheld National Firearms Act \$200 transfer tax (\$200) under Taxing Power even though regulatory intent was plain. Establishes that a nominal federal fee/tax on FCOC certification would give Congress belt-and-suspenders Taxing Power authority alongside Commerce Clause. Also confirms NFA’s taxing-power foundation is secure.	Prop 21 — Firearm Standards; Bill 12/NFSA (Part III — Taxing Power); Prop 6 — Billionaire Tax; Bill 5/BWDS; ConstitutionalResearch Group A/B
230	IRC §877A (2008 HEART Act) — Expatriation Exit Tax Constitutional History <i>irs.gov/individuals/international-taxpayers/expatriation-tax</i>	<i>Law/Court</i> Tier A	IRC §877A imposes mark-to-market exit tax on covered expatriates (net worth > \$2M or average annual net tax > \$190K). Operated since 2008 without successful Sixteenth Amendment challenge. <i>Topsnik v. Commissioner</i> (146 T.C. 1, 2016) litigated application, not constitutional invalidity. Deemed realization at expatriation is the most constitutionally validated individual MTM. BWDS deemed-realization-at-death is modeled on §877A.	Prop 6 — Billionaire Tax; Bill 5/BWDS (Part III — deemed realization at death; most secure element); ConstitutionalResearch Group B
231	Moody v. NetChoice, 603 U.S. 707 (2024) — Platform Editorial Expression <i>supreme.justia.com/cases/federal/us/603/22-277/</i>	<i>Law/Court</i> Tier A	SCOTUS vacated and remanded 9-0 FL SB 7072 and TX HB 20. Part III-B (5 votes, Kagan, J.) held platforms’ content curation is protected First Amendment editorial expression under <i>Tornillo</i> , <i>PG&E</i> , <i>Turner</i> , and <i>Hurley</i> . Did not resolve whether all algorithmic outputs (especially recommender systems) are expressive. Critical precedent for DRDO Title V must-carry and algorithmic-feed architecture.	Prop 22 — Citizen Data Ownership; Prop 35 — Digital Minor Protection; Bill 7/DRDO (Part III — editorial expression); ConstitutionalResearch Group C
232	Free Speech Coalition v. Paxton, 606 U.S. 461 (2025) — Age Verification for Adults <i>law.cornell.edu/supremecourt/text/22-277</i>	<i>Law/Court</i> Tier A	Upheld Texas HB 1181 age-verification requirements under intermediate scrutiny but confined the holding to Ginsberg obscenity-as-to-minors zone. Does NOT extend to protecting minors from algorithmic feeds or non-obscene content. Governs DRDO’s under-13 COPPA-enforcement tier; does not validate the 13-15 algorithmic-feed prohibition.	Prop 35 — Digital Minor Protection; Bill 7/DRDO (Part III — age-verification authority and limits); ConstitutionalResearch Group C
233	NetChoice v. Bonta (CAADCA, 9th Cir. Rounds 1 & 2, 2024-2026) — Age-Appropriate Design <i>hklaw.com/en/insights/publications/2026/03/ninth-circuit-issues-mixed-ruling-on-california-age-appropriate-design</i>	<i>Law/Court</i> Tier A	Round 1 (Aug. 16, 2024, 113 F.4th 1101): DPIA requirement struck as compelled speech; age-estimation/data-minimization PI vacated on facial-challenge grounds. Round 2 (Mar. 12, 2026, No. 25-2366): coverage definition upheld as facially valid; best-interests data-use restrictions and dark-patterns provisions invalidated. Most directly applicable precedent for DRDO Title V design.	Prop 35 — Digital Minor Protection; Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — CAADCA DPIA/design code); ConstitutionalResearch Group C

234	Zauderer v. Office of Disciplinary Counsel, 471 U.S. 626 (1985) — Compelled Disclosure <i>supreme.justia.com/cases/federal/us/471/626/</i>	<i>Law/Court</i> Tier A	Permitting compelled disclosure of purely factual and uncontroversial information under rational basis. Foundation for DRDO data-portability mandate as conduct/transmission regulation rather than compelled commercial speech. Narrowed by NIFLA v. Becerra (2018). Governs DRDO Title I portability mandate constitutionality.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — data portability compelled disclosure); ConstitutionalResearch Group C
235	NIFLA v. Becerra, 585 U.S. 755 (2018) — Compelled Disclosure Narrowed <i>supreme.justia.com/cases/federal/us/585/18-1388/</i>	<i>Law/Court</i> Tier A	Narrowed Zauderer by rejecting separate “professional speech” category and requiring compelled disclosures to be “not unjustified or unduly burdensome.” If DRDO portability mandate extends to inferred data or platform’s own algorithmic outputs, NIFLA raises the doctrinal threshold. Governs DRDO Title I scope limitations.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — compelled disclosure limits); ConstitutionalResearch Group C
236	Brown v. Entertainment Merchants Ass’n, 564 U.S. 786 (2011) — Minors and First Amendment <i>supreme.justia.com/cases/federal/us/564/786/</i>	<i>Law/Court</i> Tier A	Struck California violent-video-game restriction on First Amendment grounds. Minors retain First Amendment rights. Protecting minors from “ideas...a legislature thinks unsuitable” is not a compelling interest. Empirical causation (not correlation) required. Direct precedent controlling DRDO Title V 13-15 algorithmic-feed prohibition: most hostile Supreme Court authority for that provision.	Prop 35 — Digital Minor Protection; Bill 7/DRDO (Part III — Title V highest constitutional risk); ConstitutionalResearch Group C
237	Reno v. ACLU, 521 U.S. 844 (1997) — Internet Full First Amendment Protection <i>supreme.justia.com/cases/federal/us/521/844/</i>	<i>Law/Court</i> Tier A	Internet communication receives full First Amendment protection (not reduced like broadcast). Struck Communications Decency Act. Foundation for all platform First Amendment analysis post-Moody. Reinforces that DRDO Title V algorithmic-feed prohibition for minors faces strict scrutiny, not the reduced scrutiny available for broadcast.	Prop 22 — Citizen Data Ownership; Prop 35 — Digital Minor Protection; Bill 7/DRDO (Part III — internet First Amendment baseline); ConstitutionalResearch Group C
238	Cedar Point Nursery v. Hassid, 594 U.S. 139 (2021) — Physical Access Takings <i>law.cornell.edu/supremecourt/text/20-107</i>	<i>Law/Court</i> Tier A	Physical-access mandates are per se takings; explicitly preserved “government health and safety inspection regimes” exception. Relevant to DRDO: if portability mandate compels platform to grant technical access to user-data systems, Cedar Point analysis applies. Fiduciary framing and user-data-only scope minimize exposure.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — Takings; data-access limits); ConstitutionalResearch Group C
239	Jack M. Balkin, “Information Fiduciaries and the First Amendment” (49 UC Davis L. Rev. 1183, 2016) <i>papers.ssrn.com/sol3/papers.cfm?abstract_id=2675270</i>	<i>Peer Review</i> Tier B	Academic foundation for the data-fiduciary constitutional framing in DRDO. Argues platforms are analogous to lawyers and doctors and may be subjected to fiduciary duties without First Amendment objection because the fiduciary relationship is accepted as a condition of operating in a regulated industry. Primary academic authority for DRDO’s fiduciary-as-Sorrell-workaround approach.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — fiduciary framing constitutional basis); ConstitutionalResearch Group C
240	303 Creative LLC v. Elenis, 600 U.S. 570 (2023) — Compelled Creative Expression <i>supreme.justia.com/cases/federal/us/600/21-476/</i>	<i>Law/Court</i> Tier A	Held that a web designer cannot be compelled to create websites with messages the designer disagrees with. Strengthens compelled-speech doctrine in pure-expression contexts. If DRDO portability or algorithm-disclosure provisions require platforms to produce expressive content (curated feeds, editorial recommendations) rather than raw user data, 303 Creative creates First Amendment exposure.	Prop 22 — Citizen Data Ownership; Bill 7/DRDO (Part III — compelled expression limits on DRDO scope); ConstitutionalResearch Group C
241	United States v. Brewster, 408 U.S. 501 (1972) — Stock Trading Not Legislative Act <i>supreme.justia.com/cases/federal/us/408/501/</i>	<i>Law/Court</i> Tier A	Senator can be prosecuted for accepting a bribe because “taking a bribe is no part of the legislative process.” Government’s case need not rely on legislative acts or motivation for legislative acts. Core authority for ACFM Act: stock trading by a Member is private commercial activity; prosecution does not implicate the Speech or Debate Clause. The foundational case for ACFM’s criminal enforcement structure.	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — criminal prosecution authority); ConstitutionalResearch Group F
242	Gravel v. United States, 408 U.S. 606 (1972) — Legislative Act Definition; Aide Coverage <i>supreme.justia.com/cases/federal/us/408/606/</i>	<i>Law/Court</i> Tier A	Legislative acts are those “forming an integral part of the deliberative and communicative processes” of legislation. Extended Clause protection to aides (senatorial aides covered when performing acts legislators could perform). Gravel’s private publication of the Pentagon Papers outside the legislative process was unprotected. ACFM staff revolving-door provisions interact with aide-coverage rule.	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — legislative act definition; aide coverage); ConstitutionalResearch Group F
243	United States v. Helstoski, 442 U.S. 477 (1979) — Evidentiary Bar; Waiver Requirements <i>supreme.justia.com/cases/federal/us/442/477/</i>	<i>Law/Court</i> Tier A	Government may not use past legislative acts as evidence in prosecuting a Member even for non-legislative crimes (bribery). Waiver requires “explicit and unequivocal expression.” If ACFM prosecution must rely on committee briefing as evidence of “official capacity” information receipt, Helstoski bars that evidence. Governs referral-segregation requirement in ACFM Sec. 102(b) design.	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — evidentiary bar; referral segregation); ConstitutionalResearch Group F

244	United States v. Johnson, 383 U.S. 169 (1966) — Floor Speech Protected; Outside Speech Not <i>supreme.justia.com/cases/federal/us/383/169/</i>	<i>Law/Court</i> Tier A	Member's floor speech protected by Clause; DOJ could not introduce that speech as evidence of corrupt motive. Established that Speech or Debate protection extends to "legislative acts in the legislative sphere." Press releases, newsletters, and constituent service are not protected. ACFM financial disclosure requirements applicable to legislative-sphere communications are within constitutional bounds.	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — floor speech protected; press release not); ConstitutionalResearch Group F
245	United States v. Park, 421 U.S. 658 (1975) — Responsible Corporate Officer Doctrine <i>supreme.justia.com/cases/federal/us/421/658/</i>	<i>Law/Court</i> Tier A	President of Acme Markets convicted under FDCA without proof he personally participated in or had specific knowledge of violations. Held: RCO may be convicted if they had authority to prevent or correct violations and failed to do so. ACFM Title III five-tier graduated framework is modeled on RCO doctrine. Tier 3 (misdemeanor, knowledge required) is within Park zone. Tier 4 (felony, mandatory minimum, knowledge only) draws Staples scrutiny.	Prop 24 — Official Accountability; Bill 3/ACFM (Part III — RCO doctrine; executive liability tiers); ConstitutionalResearch Group F
246	United States v. Rayburn House Office Building, 497 F.3d 654 (D.C. Cir. 2007) — Absolute Non-Disclosure Privilege <i>caselaw.findlaw.com/court/us-dc-circuit/1383026.html</i>	<i>Law/Court</i> Tier A	D.C. Circuit held bar on compelled disclosure of legislative materials is "absolute." Executive branch cannot search congressional offices for legislative materials even under valid warrant. Cert denied 552 U.S. 1295 (2008). Creates risk for ACFM prosecutions that rely on committee briefings as evidence. ACFM's Ethics Committee-first structure is designed to navigate this ruling (no Executive exposure until referral).	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — non-disclosure privilege; D.C. Cir.); ConstitutionalResearch Group F
247	United States v. Renzi, 651 F.3d 1012 (9th Cir. 2011) — Individual Member Fact-Finding Not Protected <i>caselaw.findlaw.com/court/us-9th-circuit/1576803.html</i>	<i>Law/Court</i> Tier A	9th Circuit explicitly rejected Rayburn's absolute non-disclosure privilege. Held that individual (non-committee) Member fact-finding is not a "legislative act" protected by the Clause. Circuit split with D.C. Circuit on evidentiary non-disclosure. Creates prosecutorial leverage in ACFM cases outside D.C. Circuit. Cert denied 132 S. Ct. 1097 (2012).	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — non-disclosure privilege; 9th Cir.); ConstitutionalResearch Group F
248	United States v. DeCoster, 828 F.3d 626 (8th Cir. 2016) — RCO Prison Constitutional <i>law.justia.com/cases/federal/appellate-courts/ca8/15-1890/15-1890-2016-07-06.html</i>	<i>Law/Court</i> Tier A	8th Circuit upheld three-month FDCA prison sentence for responsible corporate officers without proof of mens rea — but explicitly relied on the "relatively small" penalty as the constitutional safety valve. Judge Beam dissented: any prison time without mens rea is constitutionally suspect. Cert denied 137 S. Ct. 2156 (2017). ACFM Tier 4 mandatory-minimum felony goes beyond DeCoster zone.	Prop 24 — Official Accountability; Bill 3/ACFM (Part III — RCO prison penalty; Tier 4 Staples scrutiny); ConstitutionalResearch Group F
249	Duplantier v. United States, 606 F.2d 654 (5th Cir. 1979) — Financial Disclosure Upheld <i>caselaw.findlaw.com/court/us-5th-circuit/1546505.html</i>	<i>Law/Court</i> Tier A	Upheld Ethics in Government Act mandatory financial disclosure under a balancing test rejecting strict scrutiny. No sitting federal official has successfully invoked Fifth Amendment to defeat statutory financial disclosure. Combined with Buckley v. Valeo (1976) "exacting scrutiny" framework: ACFM Title II real-time and annual disclosure is constitutionally sound. Presidential blind-trust application raises novel Article II questions.	Prop 25 — Financial Transparency; Prop 24 — Official Accountability; Bill 3/ACFM (Part III — financial disclosure authority); ConstitutionalResearch Group F
250	Eastland v. United States Servicemen's Fund, 421 U.S. 491 (1975) — Committee Investigations Protected <i>supreme.justia.com/cases/federal/us/421/491/</i>	<i>Law/Court</i> Tier A	Committee subpoenas and investigations fall squarely within protected legislative sphere. Internal ethics-committee fact-finding protected under Speech or Debate Clause. Supports ACFM's Ethics Committee primary civil enforcement model: Ethics Committee investigation is protected legislative activity; resulting referral can transmit non-privileged evidence.	Prop 23 — Congressional Trading; Bill 3/ACFM (Part III — Ethics Committee enforcement); ConstitutionalResearch Group F
251	NFIB v. Sebelius, 567 U.S. 519 (2012) — Spending Clause Coercion Doctrine <i>supreme.justia.com/cases/federal/us/567/519/</i>	<i>Law/Court</i> Tier A	Struck ACA Medicaid expansion as unconstitutionally coercive 7-2. Roberts plurality (with Breyer/Kagan): coercion turns on size of existing grant threatened (>10% of state budgets), all-or-nothing structure, and "shift in kind" to a new program. UCT and POHE must avoid all three factors. HCl's preference structure (not exclusion of existing funds) is designed to be on the permissible side of NFIB's coercion line.	Prop 27 — Corporate Home Ownership; Prop 13 — Universal Healthcare; Bill 8/HCl (Part III); Bill 6/POHE (Part III); Bill 9/UCT (Part III); ConstitutionalResearch Group D
252	Mayhew v. Burwell, 772 F.3d 80 (1st Cir. 2014) — No Coercion Post-NFIB <i>caselaw.findlaw.com/court/us-1st-circuit/1683093.html</i>	<i>Law/Court</i> Tier A	First Circuit rejected Maine's challenge to ACA MOE requirements as coercive; found no "shift in kind." No circuit has since invalidated a federal funding condition under the NFIB coercion doctrine. NFIB coercion remains a floor, not a ceiling, in the circuits. Cert denied 135 S. Ct. 2376 (2015).	Prop 27 — Corporate Home Ownership; Bill 8/HCl (Part III — coercion doctrine; grant-preference); ConstitutionalResearch Group D

253	NSBU v. Treasury (11th Cir. Dec. 16, 2025) — Corporate Transparency Act Upheld <i>buchalter.com/insights/eleventh-circuit-upholds-corporate-transparency-act-what-businesses-need-to-know/</i>	<i>Law/Court</i> Tier A	11th Circuit unanimously reversed NSBA's district-court victory; upheld Corporate Transparency Act on Commerce Clause and Necessary and Proper grounds. Key precedent for HCI's national corporate residential property registry: 11th Circuit reasoning (business entity formation/operation as economic activity) applies with even greater force to property ownership which is more directly economic. CTA constitutional challenge neutralized at circuit level.	Prop 27 — Corporate Home Ownership; Bill 8/HCI (Part III — corporate property registry); ConstitutionalResearch Group D
254	McHenry v. Texas Top Cop Shop, 604 U.S. ____ (Jan. 23, 2025) — SCOTUS CTA Stay <i>supremecourt.gov/opinions/24pdf/24a653_c07d.pdf</i>	<i>Law/Court</i> Tier A	SCOTUS 8-1 stayed E.D. Tex. nationwide preliminary injunction against CTA. Gorsuch concurred urging Court to address universal injunctions; Jackson dissented. Signals that at least 8 Justices view nationwide injunctions against beneficial-ownership reporting as disfavored. Supports HCI registry's constitutional posture even as CTA itself has been administratively narrowed by FinCEN IFR (March 2025).	Prop 27 — Corporate Home Ownership; Bill 8/HCI (Part III — SCOTUS CTA posture); ConstitutionalResearch Group D
255	Rutledge v. PCMA, 592 U.S. 80 (2020) — ERISA Preemption Narrowed (Cost Regulation OK) <i>groom.com/resources/the-supreme-court-narrows-erisa-preemption-in-rutledge-v-pcma/</i>	<i>Law/Court</i> Tier A	8-0: ERISA does not preempt state rate regulations that “merely increase costs or alter incentives for ERISA plans without forcing plans to adopt any particular scheme of substantive coverage.” Narrows ERISA §514 after New York Travelers. Key for POHE and UCT: federal public-option legislation is not a “state law” subject to §514 preemption (which only applies to state laws). ERISA preemption is a constraint on STATES, not Congress.	Prop 13 — Universal Healthcare; Bill 6/POHE (Part III — ERISA preemption scope); Bill 9/UCT (Part III — ERISA §502); ConstitutionalResearch Group D
256	Gobeille v. Liberty Mutual Ins. Co., 577 U.S. 312 (2016) — ERISA Preemption Applied <i>supreme.justia.com/cases/federal/us/577/14-181/</i>	<i>Law/Court</i> Tier A	Preempted Vermont all-payer claims database reporting requirement for self-insured plans. State law “related to” ERISA plan administration was preempted. Narrowed by Rutledge. Relevant to understanding the ERISA preemption boundary UCT must navigate — federal legislation is not affected, but any state implementation requirements layered onto federal UCT must clear Gobeille/Rutledge analysis.	Prop 13 — Universal Healthcare; Bill 9/UCT (Part III — ERISA §514 outer boundary); ConstitutionalResearch Group D
257	West Virginia v. EPA, 597 U.S. 697 (2022) — Major Questions Doctrine <i>supreme.justia.com/cases/federal/us/597/20-1530/</i>	<i>Law/Court</i> Tier A	Established major questions doctrine as a clear-statement canon for agency assertions of novel power on issues of vast economic and political significance. Applies to AGENCY action only — does not constrain Congress directly. POHE auto-trigger is a nondelegation question (Congress writing the rule in statute), not a MQD question (agency claiming authority). MQD not relevant to self-executing statutory formulas.	Prop 13 — Universal Healthcare; Bill 6/POHE (Part III — MQD vs. nondelegation; auto-trigger); ConstitutionalResearch Group D
258	Biden v. Nebraska, 600 U.S. 477 (2023) — Major Questions Applied to Loan Forgiveness <i>supreme.justia.com/cases/federal/us/600/22-506/</i>	<i>Law/Court</i> Tier A	Struck student loan forgiveness program under major questions doctrine (HEROES Act). Barrett concurrence reframes MQD as ordinary textualism. Reinforces that MQD targets agency action, not direct congressional legislation. POHE's auto-expansion trigger is a mechanical, statutory formula that Congress enacts directly — it is outside the MQD zone.	Prop 13 — Universal Healthcare; Bill 6/POHE (Part III — MQD scope; self-executing triggers exempt); ConstitutionalResearch Group D
259	FCC v. Consumers' Research, 606 U.S. 656 (2025) — Nondelegation Reaffirmed <i>congress.gov/crs-product/LSB11301</i>	<i>Law/Court</i> Tier A	6-3 (Kagan, J.) reaffirmed intelligible-principle nondelegation test and reversed en banc 5th Circuit's nondelegation holding against Universal Service Fund. Gorsuch/Alito/Thomas dissented. As of April 2026, nondelegation doctrine is stable under J.W. Hampton intelligible-principle test. POHE auto-trigger (which delegates nothing to agencies — Congress writes the formula directly) is far safer than any tested delegation.	Prop 13 — Universal Healthcare; Bill 6/POHE (Part III — nondelegation reaffirmed); Bill 9/UCT (Part III); ConstitutionalResearch Group D
260	Loper Bright Enterprises v. Raimondo, 603 U.S. 369 (2024) — Chevron Overruled <i>supreme.justia.com/cases/federal/us/603/22-451/</i>	<i>Law/Court</i> Tier A	Overruled Chevron v. NRDC; courts must independently interpret ambiguous statutes using their own judgment. Agencies no longer receive deference on ambiguous statutory provisions. Relevant to all RDNC bills insofar as agency implementation rules will be independently reviewed by courts. Key implication: bill language must be precise; ambiguities will not be resolved in the agency's favor.	All 12 Bills (Part III — agency implementation; post-Loper Bright statutory precision); ConstitutionalResearch Groups A–G
261	U.S. Term Limits v. Thornton, 514 U.S. 779 (1995) — State Term Limits on Congress <i>supreme.justia.com/cases/federal/us/514/779/</i>	<i>Law/Court</i> Tier A	States cannot impose term limits on Congress because Article I enumerates exclusive qualifications. DIR Act SCOTUS term-limits provision is NOT controlled by Thornton: Thornton addressed state action regulating Congress; DIR addresses Congress regulating judicial office-holders; Article III contains no enumerated qualifications; senior-status model does not add qualifications but restructures duties. Distinguishable — not dispositive.	Prop 33 — Supreme Court Reform; Prop 29 — Age & Term Limits; Bill 11/DIR (Part III — SCOTUS term limits; Thornton distinction); ConstitutionalResearch Group E

262	Citizens United v. FEC, 558 U.S. 310 (2010) — Independent Expenditures Protected <i>supreme.justia.com/cases/federal/us/558/310/</i>	<i>Law/Court</i> Tier A	Struck BCRA §203 prohibition on corporate/labor-union independent expenditures and electioneering communications. Overruled Austin (1990) and relevant McConnell (2003) portion. Upheld disclaimer/disclosure 8-1. DIR Act Track A campaign finance is conditioned on Citizens United “being narrowed” — a condition that is unlikely to be satisfied under the current Court composition. Track B (constitutional amendment) is the operative path.	Prop 32 — Repeal Citizens United; Bill 11/DIR (Part III — campaign finance; CU narrowing prerequisites); ConstitutionalResearch Group E
263	McCutcheon v. FEC, 572 U.S. 185 (2014) — Aggregate Contribution Limits Struck <i>supreme.justia.com/cases/federal/us/572/12-536/</i>	<i>Law/Court</i> Tier A	Struck biennial aggregate contribution limits while preserving per-candidate base limits. Roberts plurality narrowed cognizable “corruption” to quid pro quo only, excluding access and gratitude. This is the doctrinal boundary that must be crossed to restore aggregate limits; requires either Court composition change or constitutional amendment. DIR Act Track B amendment is the only realistic path.	Prop 32 — Repeal Citizens United; Bill 11/DIR (Part III — aggregate-limit restoration requires amendment); ConstitutionalResearch Group E
264	Arizona State Legislature v. AIRC, 576 U.S. 787 (2015) — Independent Redistricting Commissions <i>supreme.justia.com/cases/federal/us/576/13-1314/</i>	<i>Law/Court</i> Tier A	5-4: “Legislature” in Elections Clause encompasses the people exercising lawmaking via initiative; independent redistricting commissions are constitutional. DIR Act’s independent-redistricting provision is constitutionally sound for congressional districts under Elections Clause authority. State legislative districts require separate §5/§2 enforcement authority post-Shelby County and Callais.	Prop 16 — Address Gerrymandering; Bill 11/DIR (Part III — IRCs constitutionally valid for federal elections); ConstitutionalResearch Group E
265	Moore v. Harper, 600 U.S. 1 (2023) — Independent State Legislature Theory Rejected <i>supreme.justia.com/cases/federal/us/600/21-1271/</i>	<i>Law/Court</i> Tier A	Roberts, C.J., for 6-3 majority: rejected maximalist ISL theory; state courts may review state laws governing federal elections but cannot transgress ordinary bounds of judicial review. Confirmed AIRC precedent. Affirmed that independent redistricting commissions remain valid. State courts retain role in reviewing election law. Relevant to DIR Act redistricting and automatic-voter-registration provisions.	Prop 16 — Address Gerrymandering; Bill 11/DIR (Part III — ISL theory rejected; state court role); ConstitutionalResearch Group E
266	Louisiana v. Callais, 608 U.S. ____ (April 29, 2026) — VRA Section 2 Narrowed — JUST DECIDED <i>ms.now/deadline-white-house/deadline-legal-blog/supreme-court-louisiana-redistricting-map-callais</i>	<i>Law/Court</i> Tier A	DECIDED APRIL 29, 2026 — one day before this research was compiled. Alito, J., 6-3: struck Louisiana’s SB 8 map under the 15th Amendment but reinterpreted Section 2 of the Voting Rights Act to require “intentional discrimination” — effectively narrowing Gingles’s results-based test to an intent-based standard. Kagan dissent (Sotomayor, Jackson): Section 2 “all but a dead letter.” Major impact: DIR Act state-legislative redistricting mandate is substantially more vulnerable post-Callais; federal-elections redistricting mandate under Elections Clause/AIRC is more defensible.	Prop 16 — Address Gerrymandering; Bill 11/DIR (Part III — VRA §2 narrowed; CRITICAL; DIR _5 revised); ConstitutionalResearch Group E
267	Brnovich v. DNC, 594 U.S. 647 (2021) — VRA Section 2 — Five Guideposts <i>supreme.justia.com/cases/federal/us/594/19-1257/</i>	<i>Law/Court</i> Tier A	Narrows VRA Section 2 vote-denial analysis through five non-exhaustive guideposts (time/place/manner burden, historical access, electoral system totality, racial disparity, state interest strength). Dramatically reduced Section 2 vote-denial filings post-Brnovich. Callais (2026) further narrowed to intent-based test. Context for DIR Act voting rights provisions.	Prop 16 — Address Gerrymandering; Bill 11/DIR (Part III — VRA §2 precedent pre-Callais); ConstitutionalResearch Group E
268	Americans for Prosperity Foundation v. Bonta, 594 U.S. 595 (2021) — Disclosure Narrow Tailoring <i>supreme.justia.com/cases/federal/us/594/19-251/</i>	<i>Law/Court</i> Tier A	8-1: charitable-donor disclosure mandate struck even under exacting scrutiny because it was not “substantially related” to California’s anti-fraud interest. Imported narrow-tailoring requirements into exacting scrutiny for compelled disclosure. DIR Act financial disclosure for candidates and officials is distinguishable: applies to voluntary office-seekers; precisely tailored to anti-corruption; not a blunderbuss general mandate.	Prop 25 — Financial Transparency; Prop 24 — Official Accountability; Bill 11/DIR (Part III — financial disclosure narrow tailoring); Bill 3/ACFM (Part III); ConstitutionalResearch Group E/F
269	Bluman v. FEC, 565 U.S. 1104 (2012) — Foreign National Spending Restrictions <i>fec.gov/legal-resources/court-cases/bluman-v-fec/</i>	<i>Law/Court</i> Tier A	Kavanaugh, J. (D.C. Cir. 2011), summarily affirmed by SCOTUS. Upheld §441e(a) ban on foreign-national campaign contributions and independent expenditures. Citizens United expressly reserved the foreign-national question (558 U.S. at 362). Plausible incremental narrowing of Citizens United: foreign-ownership thresholds in corporations could be regulated under Bluman’s logic.	Prop 32 — Repeal Citizens United; Bill 11/DIR (Part III — foreign-national restrictions; CU narrowing path); ConstitutionalResearch Group E
270	Dillon v. Gloss, 256 U.S. 368 (1921) — Article V Time Limits and Ratification <i>supreme.justia.com/cases/federal/us/256/368/</i>	<i>Law/Court</i> Tier A	Congress may impose reasonable time limits on constitutional amendment ratification; amendments must reflect “contemporaneous” popular consensus. Best practice for DIR Act Track B constitutional amendment: embed deadline in the amendment text itself rather than relying on congressional resolution. ERA controversy (Virginia 2020 ratification) illustrates the risks of not specifying time limits.	Prop 16 — Address Gerrymandering; Bill 11/DIR (Part III — Article V ratification; amendment deadline; DIR _5 revised); ConstitutionalResearch Group E

271	One Big Beautiful Bill Act (OBBA), Pub. L. 119-21 (July 4, 2025) — Controlling Byrd Precedent en.wikipedia.org/wiki/One_Big_Beautiful_Bill_Act	Congress Tier A	The most current and directly applicable Byrd bath precedent for COLT, IIC, and FSW reconciliation design. Key strikes: Workforce Pell to unaccredited providers (struck — most directly analogous to FSW workforce training risk); CFPB budget cuts (struck); mandatory state SNAP cost-share (struck); Medicaid provider-tax cap to 3% (struck, ~\$250B offset eliminated); REINS Act/EPA/NEPA provisions (struck). What survived: tax credits (including all IRA-model credits, EV credits, domestic-content bonus credits); IRS enforcement appropriation; direct Medicare/Medicaid spending adjustments. MacDonough's "current-policy baseline" ruling (June-July 2025) allowed TCJA-extension scoring against current policy. Bills-committee and Parliamentarian contact essential before COLT/IIC/FSW introduction.	Prop 1 — IRS Reform; Prop 9 — Childcare; Prop 38 — Renewable Energy; Prop 39 — Federal Inspectors; Prop 36 — Corporate to Training; Bill 1/COLT; Bill 2/IIC; Bill 4/FSW (Part III); ConstitutionalResearch Group G

18. UT IMPLEMENTATION RESEARCH — PHASE 3 — 26 entries (v8: 272–297)

Sources cover 30 sub-questions across 5 research groups: infrastructure timelines, environmental/food/marine/agricultural, defense/security/diplomatic, domestic program scaling, rights/governance/regulatory.

#	Source · URL	Type	Key Finding	Documents Supported
272	GAO-25-108502 (May 2025) + DOT OIG AV2025036 (July 2025) — FAA NextGen Modernization gao.gov/products/gao-25-108502	Gov/Agency Tier A	FAA spent >\$15B on NextGen FY2007–2025; delivered only ~16% of projected benefits. 76% of 138 ATC systems unsustainable or potentially unsustainable as of Sept 2024. DOT OIG AV2025036 (July 2025): completion pushed to 2030+. New "\$31.5B ATC System" planning estimate. 2024 FAA Reauthorization Act mandated all key programs operational by end-CY2025 — mandate missed.	Prop 43 — Modernize Airports & ATC; Prop 39 — Restore Federal Inspectors; UT Implementation Evidence — caution (infrastructure modernization runs 15–25 years at 2–3× projected cost)
273	USPS OIG Fleet Modernization Audit (2024) + USPS 10-Year Strategic Plan uspsoig.gov/reports/audit-reports/fleet-modernization-delivery-vehicle-acquisition-status	Gov/Agency Tier A	NGDV program: \$9.6B total (\$3B from IRA), 106,000 vehicles including ≥65,000 BEVs. ~9 years from program start to first deliveries (~3× original plan). Only ~2,500 NGDVs delivered by Nov 2025. >6,000 E-Transits sat in storage up to 14 months. All NGDVs acquisitions after 2026 to be 100% BEV.	Prop 44 — Electrify & Modernize USPS; UT Implementation Evidence — supports UT=4 trajectory is achievable but on 9-year horizon, not 2-3 year
274	NEC Commission CONNECT NEC 2035 (C35) + FTA Hudson Tunnel Quarterly Monitoring Report Q2 June 2025 transit.dot.gov	Gov/Agency Tier A	\$117B 15-year, 150-project NEC capital plan with ~\$100B funding gap. Gateway Program: Hudson Tunnel Project total cost \$16.041B; FFGA of \$6.88B signed July 8, 2024; construction begun Nov 2023; new tunnel scheduled to open 2035; existing tunnel renovation by 2038. Trump administration withheld funding Oct 2025; courts ordered resumption Feb 2026.	Prop 45 — National High-Speed Rail Network; Prop 43 — Modernize Airports & ATC; UT Implementation Evidence — NEC rail modernization is a 15-year, \$117B undertaking; supports UT=2 for national HSR
275	California High-Speed Rail Authority 2024 Business Plan + 2025 Supplemental Project Update Report (Aug 22, 2025) hsr.ca.gov	Gov/Agency Tier A	Phase 1 cost escalation: \$33B (2008 bond) → \$106.2B (2024) → ~\$126.2B (2025 board discussions) — roughly 3–4× nominal escalation. Bakersfield–Merced IOS: \$36.75B, projected revenue service Jan 1, 2032. FRA withdrew \$4B in federal funds in 2025. Inspector General: IOS unlikely operational by 2033. Most critical cautionary US precedent for federal HSR proposals.	Prop 45 — National High-Speed Rail; UT Implementation Evidence — confirms UT=2: federal HSR faces 3-4× cost escalation risk; supports a 15-25 year realistic timeline at scale
276	OPM Time-to-Hire Dashboard FY2024 + DOL Top Management Challenges Report (2022) opm.gov	Gov/Agency Tier A	OPM FY2024 governmentwide average time-to-hire: 101 days (vs. 80-day target); IT roles 94 days, contracting 73 days. Full lag from congressional authorization to filled inspector position: add 6–18 months authorization-to-posting; training to operational competency adds 2–5 years. DOL: 5 years to fully train an operational OSHA inspector. OSHA inspector headcount fell from 860 (2014) to 750 (2021) — all-time low.	Prop 39 — Restore & Expand Federal Inspectors; Bill 2/IIC; UT Implementation Evidence — confirms UT=4 trajectory is achievable but on 3-5 year timeline to meaningful staffing
277	CRS IF11643 — Artemis Program (NASA); JWST Congressional Research Service congress.gov/crs-product/IF11643	Gov/Agency Tier A	Artemis: traced to NASA Authorization Act of 2010; Artemis I launched Nov 2022 (12 years); Artemis II crewed April 2026 (16 years); total cost ~\$93B through 2025. JWST: concept 1996 → launch Dec 2021 (~25 years); final cost ~\$10B (10× original \$1B estimate); 7+ year slip from last formal target. Synthesis: NASA flagship programs run 9–16 years authorization-to-first-crewed-output; 20–25 years for flagship science missions.	Prop 47 — Expand NASA & Space Force; UT Implementation Evidence — supports UT=4 with honest 10-16 year trajectory caveat for major new programs

278	NOAA Aquaculture Strategic Plan 2023–2028 <i>fisheries.noaa.gov/feature-story/noa-a-announces-5-year-strategic-plan-a-aquaculture</i>	Gov/Agency Tier A	NOAA 5-year strategic plan articulates four qualitative goals but deliberately omits any numerical production-scaling target. US ranks 17th–18th globally, <1% of global production, ~80% of consumed seafood is imported. 2016–2020 plan set a +50% by 2020 goal that was missed; not carried forward. Cannot support any quantitative UT=4 scaling claim for domestic aquaculture.	Prop 55 — Protect Marine Life & Aquaculture; UT Implementation Evidence — KEY NEGATIVE FINDING: NOAA has no production target; confirms UT score revision from 4 to 3 for Prop 54/55
279	USDA REAP Rural Energy for America Program — IRA Section 22002 Implementation Data (2022–2025) <i>rd.usda.gov</i>	Gov/Agency Tier A	IRA Section 22002 appropriated ~\$2.025B for REAP through FY2031. Cumulative since 2008: ~\$4.8B invested, 25,000+ projects. IRA-funded REAP obligations Oct 2022–March 2025: ~\$1.5B in grants (6,822+ projects). Average grant grew from ~\$31,641 (Trump-1) to ~\$138,506 (Biden era), 2024 record \$3.5B total. January 2025 Trump EO froze \$911M in remaining IRA grant obligations affecting >4,800 recipients.	Prop 56 — Subsidize Agricultural Electrification; UT Implementation Evidence — supports UT=3; \$4.8B over 15 years shows steady but bounded scaling; current freeze is a UT constraint
280	USDA AMS Packers and Stockyards Division Annual Report FY2021–2022 (published March 2024) <i>ams.usda.gov/reports/psd-annual-reports</i>	Gov/Agency Tier A	108–110 employees overseeing ~5,900 regulated entities. 2,197/2,220 investigations closed; \$11.6M/\$11.1M in recoveries; industry self-reported compliance 85–87%. No FY2023 or FY2024 standalone report published as of April 2026 — significant transparency gap post-GIPSA reorganization (Nov 2017). USDA AMS finalized 3 new rules 2023–2024 with additional proposed rules pending.	Prop 58 — Break Up Agricultural Monopolies; UT Implementation Evidence — 108 staff for 5,900 entities is a thin enforcement ratio; confirms UT=3 for agricultural monopoly enforcement
281	Treasury CFIUS Annual Report to Congress CY2024 (released August 2025) <i>home.treasury.gov/policy-issues/international/cfius</i>	Gov/Agency Tier A	325 covered transactions (209 notices, 116 declarations). 55.5% of notices proceeded to second-stage investigation. 78% declaration clearance rate (record high). Mitigation fell sharply to 9% (from 21% in 2023). Two presidential decisions (rare). Five civil penalties — record — including the largest single penalty in CFIUS history at \$60 million. China: 28 notices (down from 35).	Prop 64 — International Property Ownership Framework; UT Implementation Evidence — CFIUS processes 325 transactions/yr with 5 enforcement actions; narrow scope; confirms UT score revision from 4 to 3 for Prop 63
282	DoD Cyberspace Workforce Strategy 2023–2027 + CYBERCOM Expansion Data (DefenseScoop, May 2025) <i>dodemergingtech.com/dod-cyber-workforce-strategy-2023-2027</i>	Gov/Agency Tier A	Original Cyber Mission Force reached FOC May 2018 at 133 teams. FY2022 NDAA approved expansion to 147 teams. As of May 2025, 12 of 14 new teams established. CYBERCOM cyber budget FY2024: \$13.5B. November 2025 “CYBERCOM 2.0” plan adds three new organizations. Navy CMF teams flagged as lagging. Air Force teams targeted ~2027 for completion.	Prop 46 — Expand Cyberwarfare Defenses; UT Implementation Evidence — 133→147 teams over 7 years; supports UT=3 with 5-7 year timeline to meaningful expansion
283	GAO-25-107427 — DoD Financial Management: Status of Remediation Efforts to Meet Audit Mandate (Sept 2025) <i>gao.gov/products/gao-25-107427</i>	Gov/Agency Tier A	FY2024: DoD received disclaimer of opinion for the seventh consecutive year (audit covers \$4.1T assets, \$4.3T liabilities). Marine Corps: only clean opinion (FY2023 and FY2024). 28 material weaknesses persist DoD-wide. Statutory mandate: clean audit by December 31, 2028 (FY2024 NDAA). Financial Management Systems Modernization remediation slipped from FY2028 to FY2031 — jeopardizing the 2028 mandate per GAO.	Prop 49 — Pentagon Budget Audit Accountability; UT Implementation Evidence — 7 consecutive disclaimers; remediation trajectory slipping; supports UT=3; FY2031 projection suggests honest timeline is 5-8 more years
284	CRS IF10597 — United Nations Issues: U.S. Funding to the UN System (updated April 2024) <i>congress.gov/crs-product/IF10354</i>	Gov/Agency Tier A	US assessed peacekeeping rate: 26.94% (2022–2024) → 26.158% (2025–2027). Statutory 25% cap (P.L. 103-236, 1994) creates cap-related arrears >\$1.1B since FY2017; total arrears ~\$1.5B by April 2025. China now second at 23.785%. UN peacekeeping budget declining: \$6.1B FY2023-24 → \$5.4B FY2025-26. October 2025: UN SG requested all missions cut 15% and repatriate 25% of uniformed personnel.	Prop 52 — Multilateral Peacekeeping Coalition; UT Implementation Evidence — US arrears and declining UN peacekeeping budget are UT constraints; supports UT=3; multilateral coalition building is a 5-10 year diplomatic effort
285	AmeriCorps State and National (CRS IF12983, 2024) + American Climate Corps Scaling and Termination Data (Grist, Gov Exec, Jan–Apr 2025) <i>congress.gov/crs_external_products/IF/HTML/IF12983.html</i>	Gov/Agency Tier A	AmeriCorps: ~75,000 full-time members/yr; FY2024 appropriation >\$1.2B; cost-per-MSY capped at \$13,430. ACC (launched Sept 2023): claimed 15,000 members by Sept 2024 — but Grist/High Country News found most were relabeled existing AmeriCorps positions, not net-new federal jobs. Terminated by EO January 20, 2025; ~85% of AmeriCorps staff placed on administrative leave April 2025. Original goal: 20,000 year one, 50,000/yr by 2031 — achieved via relabeling; entire program reversed in a single day.	Prop 59 — National Climate Preparedness Corps; UT Implementation Evidence — AmeriCorps ~75K/yr demonstrates corps scaling is achievable; ACC termination demonstrates rapid reversal risk; supports UT=4 with explicit durability caveat
286	Norges Bank Investment Management (NBIM) Annual Report 2024 — Norway Government Pension Fund Global <i>nbim.no/en/publications/reports/2024/annual-report-2024</i>	Gov/Agency Tier A	Fund value end-2024: NOK 19,742B (~\$1.78T USD). Authorized 1990, first deposit 1996, surpassed \$1T September 2017 (~13 years from first inflows). 2024 return 13.1%; long-term average 6.64% since 1998. Asset mix: 71.4% equities / 26.6% fixed income; invested in 8,659 companies across 71 countries. Management cost: 0.04% of AUM. Governance: Ministry of Finance → Norges Bank mandate → NBIM execution.	Prop 7 — US Sovereign AI & Autonomous Systems Wealth Fund; UT Implementation Evidence — Norway needed ~13 years from inflows to \$1T; supports UT=3 for a US sovereign fund; governance model directly applicable

287	Connecticut CT Baby Bonds Program (CT Treasurer, 2023–2024) + Urban Institute “Modeling Impacts of Federal Baby Bonds” (Dec 2024) <i>portal.ct.gov/ott/newsroom</i>	<i>Think Tank</i> Tier B	CT program launched July 1, 2023: \$3,200/Medicaid birth; ~13,300 enrolled first 9 months; ~\$51M/yr; first claims in 2041. Urban Institute DYNASIM model of Booker-Pressley AOAA: projected age-18 balances \$26K Black, \$27K Hispanic, \$18K white — reducing white:Black wealth gap from 2.4× to 2.1×. CRFB estimates federal cost ~\$60B/yr (~\$650B/decade). No outcome data possible until first cohort reaches 18.	Prop 10 — Universal Basic Investment for Children; UT Implementation Evidence — CT pilot confirms administrative feasibility (~13,300 enrolled in 9 months); federal cost scale (\$60B/yr) and 18-year outcome lag are UT constraints; supports UT=3
288	CBO Publication 60679 — Long-Term Projections for Social Security (2024) <i>cbo.gov/publication/60679</i>	<i>Gov/Agency</i> Tier A	OASI trust fund depletion: end of FY2033. Combined OASDI depletion: 2034. 75-year actuarial imbalance: 4.3% of taxable payroll / 1.5% of GDP. After-depletion benefits: 77% of scheduled. Solvency options: raise payroll tax from 12.4% to 16.2% (+31%); or cut benefits 24%; or combinations. Social Security Fairness Act (2025) worsened by \$195.7B/10yr. HI Trust Fund moved up to 2033 (3 years earlier than prior projection).	Prop 15 — Social Security Modernization; UT Implementation Evidence — confirms UT=2: FY2033 depletion creates hard reform deadline; 60-vote Senate threshold and distributional disagreements make reform politically constrained; also supports B=4 scoring
289	DEA Cannabis Rescheduling Timeline 2020–2026 (Federal Register, DOJ Press Releases, CRS LSB11105) <i>federalregister.gov/documents/2024/06/11/2024-12706</i>	<i>Gov/Agency</i> Tier A	HHS scheduling recommendation: August 30, 2023. DEA NPRM: May 21, 2024 (89 FR 44597). Administrative hearing postponed from Dec 2024 to Jan 2025 then stalled all 2025. Trump EO 14370 (Dec 18, 2025) directed expedited review. DOJ partial final order: April 23, 2026 — placing only FDA-approved products and state-medical-licensed marijuana in Schedule III. Full rescheduling hearing: June 29–July 15, 2026. Total: HHS recommendation to first partial order = 32+ months; still incomplete.	Prop 12 — Drug Rescheduling & Harm Reduction; UT Implementation Evidence — confirms UT=2: administrative rescheduling of a Schedule I substance takes 32+ months minimum; politically reversible; no clear completion date
290	Tennessee Promise Evaluation (TN Comptroller OREA, 2024) + THEC Enrollment Data <i>comptroller.tn.gov/content/dam/cot/orea/advanced-search/2024/TNPromise2024Fullreport.pdf</i>	<i>Gov/Agency</i> Tier A	150,000+ enrolled since 2014; cost ~\$4,537/student/yr community college; FY2024 first-to-second-semester success rate 83.8% (all-time high). Class-of-2024 college-going rate 56.0% (down from 64.4% peak 2015, pandemic effect). Tennessee Reconnect (2018): ~\$10M/yr, ~40,000 credentials conferred. 28 state promise programs nationally (OR, NY, RI, NV, HI, IN, AR, KY, MD, OK, MO, WA, DE, and others).	Prop 34 — Reduce Tuition & Expand Adult Education; UT Implementation Evidence — Tennessee Promise is the strongest US analog: 150K enrolled over 10 years at ~\$4,500/student/yr; supports UT=3 for a federal version with 5-10 year scaling timeline
291	DOL ETA WOTC Program Data (FY2023) + Registered Apprenticeship Expansion FY2014–FY2024 <i>dol.gov/agencies/eta/wotc</i>	<i>Gov/Agency</i> Tier A	WOTC FY2023: 1,918,901 certifications (25% of workload); 3,708,081 denials (48%); authorization EXPIRED Dec 31, 2025, pending reauthorization. Registered Apprenticeship: ~680,000 active apprentices FY2024 (up 114% from ~318,000 in FY2014); 112,000 annual completers (+143%); average entry wage \$18/hr, exit \$32/hr (+77%); lifetime earnings premium >\$240K. Apprenticeship scaling is the strongest US workforce-development UT model: doubled in a decade.	Prop 36 — Shift Corporate Role from Healthcare to Training; Prop 35 — Shift Corporate to Training; Bill 4/FSW; UT Implementation Evidence — Registered Apprenticeship +114% in 10 years is the realistic US workforce scaling benchmark; supports UT=3
292	HHS Reorganization 2025 — Press Release (March 27, 2025) + KFF Analysis + Litigation Status (April 2026) <i>hhs.gov/press-room/hhs-restructuring-doge.html</i>	<i>Gov/Agency</i> Tier A	HHS: 82,000→62,000 FTE (~25% cut); 28 divisions consolidated to 15; AHA created; regional offices reduced 10→5; claimed \$1.8B annual savings. Implementation 13 months in: partially blocked by injunctions (D. Rhode Island, N.D. California); 19 states + DC suing. KFF historical analysis: major HHS sub-agency restructurings require 18–36 months minimum under favorable conditions. FDA organizational restructuring specifically: center-level changes typically take 2–3 years to operationalize.	Prop 61 — FDA Split & Reform; UT Implementation Evidence — confirms UT=3 for FDA restructuring: 18–36 month historical floor; current HHS reorganization partially enjoined demonstrates legal risk; judicial challenges add 12–24 months
293	FTC Rulemaking Timeline Data — Negative Option / Click-to-Cancel (Oct 2024, vacated July 2025) + Commercial Surveillance ANPR (Aug 2022, stalled) + FY2024 Enforcement Report <i>ftc.gov/legal-library/browse/rules/negative-option-rule</i>	<i>Gov/Agency</i> Tier A	Click-to-Cancel: ANPR Oct 2019 → NPRM March 2023 → Final Oct 2024 (~5 years) → VACATED by 8th Circuit July 8, 2025 for failing to issue preliminary regulatory analysis. Commercial Surveillance ANPR: Aug 22, 2022 → NPRM never issued → ~3.7 years stalled as of April 2026. FY2024 enforcement: 43 federal complaints, 71 permanent orders, >\$559.2M in consumer redress. AMG Capital v. FTC (2021) limited Section 13(b) monetary relief. Average major FTC commercial rulemaking: 5+ years ANPR-to-final.	Prop 28 — Stricter Advertising Laws; UT Implementation Evidence — KEY FINDING: FTC ANPR-to-final averages 5+ years; only recent completion was vacated; confirms UT score revision from 4 to 3 for Prop 28
294	ATF NFA Processing Timeline Data — eForms Relaunch (2021) + Post-2024 Process Changes + OBBBA Impact (2026) <i>atf.gov</i>	<i>Gov/Agency</i> Tier A	2015–2016 (pre-eForms): Form 4 wait times 200–370 days. Post-eForms relaunch Dec 2021 + March 2024 non-FIFO process change: eForm 4 individual ~4–10 days, trust ~22 days; ATF processing 65,000–80,000 suppressor applications/month. OBBBA (P.L. 119-21, July 4, 2025) eliminated \$200 NFA tax stamp for suppressors/SBRs/SBSs/AOWs effective Jan 1, 2026 — volume surge anticipated. Registration/background-check/fingerprint requirements remain.	Prop 21 — National Firearm Standards Framework; Bill 12/NFSA; UT Implementation Evidence — NFA eForms demonstrates that a federal firearms processing system can achieve 4-10 day turnaround with process investment; supports FCOC implementation feasibility for UT=3

295	Maryland HQL Implementation + Crifasi et al. (2017, RSF Journal) + Doucette, Crifasi et al. (Injury Epidemiology, 2024) <i>ncbi.nlm.nih.gov/pmc/articles/PMC11342609</i>	Peer Review Tier A	Maryland Firearm Safety Act of 2013 effective Oct 1, 2013. Total applicant cost ~\$165–250 (\$50 fee + fingerprinting + 4-hour FST). Crifasi (2017): 82% reduction in police recovery of handguns with strong diversion indicators in Baltimore post-FSA. Doucette (2024): 32.3% reduction in firearm injury hospitalization rates (augmented synthetic control). Caveat: most evaluations are Johns Hopkins-affiliated; Baltimore 2015 unrest is a confounding event; RAND finds limited evidence on adult suicides specifically.	Prop 21 — National Firearm Standards Framework; Bill 12/NFSA; UT Implementation Evidence — Maryland HQL is the strongest US analog for FCOC implementation; 2013 law to 2017 measurable evaluation = 3-4 years to demonstrated effect; supports UT=3 implementation timeline
296	FBI NICS 2024 Operational Report + BSCA 2022 Enhanced Provisions Implementation + Fix NICS (2018) Record Uploads <i>fbi.gov/file-repository/2024-nics-operational-report.pdf</i>	Gov/Agency Tier A	Brady Act signed Nov 30, 1993 → NICS launched Nov 30, 1998 (~5 years from authorization to operational system). Fix NICS (March 2018): millions of state records uploaded within months. BSCA (June 2022) enhanced under-21 provisions: began phased implementation Oct 2022 → automated Jan 4, 2023 (6 months). 2024 NICS: 91.95% immediate determination rate; ~39.7M annual checks (2020 peak); >500M cumulative; >2M cumulative denials. Annual volume: grew from ~8.5M (2000) to ~39.7M (2020). Implementation lesson: 3–5 years from major statutory expansion to fully operational.	Prop 21 — National Firearm Standards Framework; Bill 12/NFSA; UT Implementation Evidence — Brady Act 5-year authorization-to-launch is the baseline for federal firearms systems; BSCA 6-month implementation shows modern statutory expansions can move faster; supports UT=3 timeline
297	Farber, Henry S. (2009) — “Increasing Voter Turnout: Is Democracy Day the Answer?” Princeton GCEPS Working Paper 181 <i>gceps.princeton.edu/wp-content/uploads/2017/01/181farber.pdf</i>	Peer Review Tier A	Difference-in-differences design exploiting state laws granting state employees an Election Day holiday (Nov 2004/2006 CPS). Direct conclusion: “having an election holiday, by itself, is not an effective strategy to increase voter turnout.” Wolfinger, Highton & Mullin (2002) corroborate: no effect on workers with state-law leave entitlements. Cross-national work (Franklin 2004): compulsory voting, electoral competition, and proportional representation drive turnout — holiday timing is a minor factor. No top-tier RCT or quasi-experimental national study on Election Day holiday effect exists.	Prop 17 — National Voting Holiday; UT Implementation Evidence — MEANINGFUL EVIDENCE GAP: best available evidence suggests ~0 turnout effect; this does not eliminate Prop 17 value (symbolic, equity, civic participation) but undermines a UT=4 quantitative impact claim; confirms UT score revision from 4 to 3

19. TARIFF & TRADE MODELING — POST-SCOTUS — 10 entries (v9: 339–348)

#	Source · URL	Type	Key Finding	Documents Supported
<i>New category established Audit 6. Houses the post-February-20-2026-SCOTUS tariff modeling literature that supersedes pre-IEEPA-ruling estimates. Covers fiscal revenue projections (post-IEEPA collapse), effective tariff rates and pass-through evidence, sectoral impact (agriculture), and the methodological reframing of pre-SCOTUS analyses as counterfactual rather than current policy. Future tariff analysis should register here.</i>				
339	Tax Foundation, “Tracking the Impact of the Trump Tariffs & Trade War” (updated April 7, 2026) <i>taxfoundation.org/research/all/federal/trump-tariffs-trade-war/</i>	Think Tank Tier B	CY2025 customs duties \$264B (vs \$79B in 2024); average effective tariff rate 7.7% (highest since 1947). Post-SCOTUS revenue projection: \$668B conventional / \$522.8B dynamic / \$386.8B net of retaliation over 2026–2035. Long-run GDP –0.2%; –141,000 FTE jobs from imposed retaliation. PARTIALLY SUPERSEDES Capital Report v2 tariff projection.	Capital Report v3 §3.2; tariff revenue
340	CRFB, “Tariff Revenue Soars in FY 2025 Amid Legal Uncertainty” (updated April 24, 2026) <i>crfb.org/blogs/tariff-revenue-soars-fy-2025-amid-legal-uncertainty</i>	Think Tank Tier B	FY2025 customs duties: \$195B final (+150% YoY). Updated 10-year projection post-SCOTUS: \$900B FY2025–35, down ~\$2.2T from pre-SCOTUS \$3.1T. ~\$90B of \$195B FY2025 collections may need refunding per CBP data.	Capital Report v3 §3.2; tariff revenue
341	PWBM Effective Tariff Rates and Revenues series (through April 15, 2026) <i>budgetmodel.wharton.upenn.edu/effective-tariff-rates</i>	Think Tank Tier A	Cumulative new tariff revenue Jan 2025–Feb 2026: \$224.8B. Effective tariff rate peaked 10.91% Oct 2025; 8.9% Feb 2026 post-SCOTUS. China ETR Feb 2026: 31.6%. USMCA exemption uptake: 86.3% by Feb 2026. PWBM Feb 2026 SCOTUS analysis projects up to \$175B in IEEPA refunds.	Capital Report v3 §3.2; tariff actuals
342	Yale Budget Lab, “State of US Tariffs: April 8, 2026” <i>budgetlab.yale.edu/research/state-us-tariffs-april-8-2026</i>	Think Tank Tier A	Pre-substitution ETR 11.8%; consumer price impact 1.1% short-run = \$1,500/household income loss (Section 122 extension scenario). 10-year fiscal: \$1.1T conventional / \$1.0T dynamic (expiration); \$1.7T / \$1.6T (extension). Long-run GDP –0.1% to –0.17%.	Capital Report v3 §3.2; tariff fiscal
343	Tax Policy Center Tariff Tracker <i>taxpolicycenter.org/features/tracking-trump-tariffs</i>	Think Tank Tier A	Average effective rate 10%; revenue projection \$911B FY2026–35; 2026 average household tariff burden \$2,100 (notably higher than Tax Foundation’s \$700–1,500 range; methodological difference).	Capital Report v3 §3.2; tariff household burden

344	PIIE WP 25-13, McKibbin / Noland / Shuetrim, “Modeling the Macroeconomic Consequences of Trump's Trade Policies” (June 2025) <i>piie.com/sites/default/files/2025-06/wp25-13.pdf</i>	<i>Think Tank</i> Tier A	G-Cubed multi-scenario modeling. 15-pp universal: \$3.2T over decade no retaliation, \$1.5T with retaliation; 20-pp + retaliation: only \$791B (Laffer-curve dynamic — illustrates revenue collapse at extreme tariffs).	Capital Report v3 §3.2; tariff modeling
345	Federal Reserve Board, Minton & Somale, “Detecting Tariff Effects on Consumer Prices in Real Time — Part II” (April 8, 2026) <i>federalreserve.gov/econres/notes/feds-notes/detecting-tariff-effects-on-consumer-prices-in-real-time-part-II-20260408.html</i>	<i>Gov/Agency</i> Tier A	Tariffs through Nov 2025 raised core goods PCE prices by 3.1% through Feb 2026, contributing +0.8% to overall core PCE. “Tariffs explain the entirety of the excess core goods inflation since January 2025.” Pass-through is “effectively complete.”	Capital Report v3 §3.2; tariff pass-through
346	Cavallo, Llamas & Vazquez, NBER WP 34496 (2025) <i>nber.org/papers/w34496</i>	<i>Peer Review</i> Tier A	Retail tariff pass-through ~20% short-run; cumulative +0.7 pp contribution to all-items CPI by Sept 2025.	Capital Report v3 §3.2; tariff pass-through
347	Gopinath & Neiman, NBER WP 34620 (2026), “The Incidence of Tariffs” <i>nber.org/papers/w34620</i>	<i>Peer Review</i> Tier A	Sept 2025 statutory trade-weighted tariff 27% (highest in 100+ years), but actual implemented rate ~half due to lags and exemptions. Pass-through to US import prices ~94% in 2025 (vs 80% in 2018–19) — Americans bear the burden, not foreign exporters.	Capital Report v3 §3.2; tariff incidence
348	AEI, “Evaluating the Impact of Tariffs on US Agriculture a Year After Liberation Day” (April 2026) <i>aei.org/research-products/report/evaluating-the-impact-of-tariffs-on-us-agriculture-a-year-after-liberation-day/</i>	<i>Think Tank</i> Tier B	Overall US ag exports –3% in 2025; soybean exports to China –72% (7.4M MT vs 27.4M MT prior year); US beef exports to China –90%+ monthly. Only China imposed sustained retaliation; EU retaliation suspended; Canada removed most retaliation Sept 1, 2025.	Capital Report v3 §3.2; tariff agriculture impact

20. FEDERAL WORKFORCE & REGULATORY COSTS — 9 entries (v9: 349–357)

#	Source · URL	Type	Key Finding	Documents Supported
<i>New category established Audit 6. Houses the post-2025 federal workforce reduction analysis (DRP, RIFs, Schedule Policy/Career), the broader regulatory and deregulatory cost analysis (RFF, Federal Reserve, OFR, CBO CFPB score), and related macro spillover analysis. Future federal workforce / regulatory analysis should register here.</i>				
349	Partnership for Public Service, Federal Harms Tracker (April 9, 2026) <i>ourpublicservice.org/federal-harms-tracker/cost-to-your-government/</i>	<i>Think Tank</i> Tier A	NEW headline economy-wide cost: \$165.6 billion. Components: \$53.2B disengagement productivity loss; \$94.6B science-grant cuts (multiplier-based GDP estimate); \$4.5B DRP payments to ~137,000 participants (\$32,850/person); \$763.9M RIF severance for ~10,400 employees; \$443.9M probationary admin leave. SUPERSEDES the v2 \$71B figure as the broader framing.	Capital Report v3 §3.3; federal workforce
350	OPM workforce data via PPS / Pew Research / FedTools (Feb 2026 snapshot) <i>opm.gov + pewresearch.org + fedtools.app</i>	<i>Gov/Agency</i> Tier A	Federal civilian workforce (Feb 2026): 2,028,138 (lowest since ~1966). Net positions lost since Jan 20, 2025: 271,825 (–11.8%) in 13 months. 2025 total departures: 348,219 (+80.8% vs 2024). OPM retirement claims backlog peaked 65,237 in February 2026 (record).	Capital Report v3 §3.3; federal workforce data
351	Economic Policy Institute, “Federal layoffs trigger sharp slowdown in job growth” <i>epi.org/blog/federal-layoffs-trigger-a-sharp-slowdown-in-job-growth-unemployment-rises-to-highest-rate-since-2021/</i>	<i>Think Tank</i> Tier B	Federal employment fell 162,000 in October 2025 alone; cumulative federal job losses Jan–Oct 2025 = 271,000; private-sector job growth slowed to ~44k/month (vs 130k/month avg in 2024). DC region federal employment fell 53,800 (–14.2%) in 2025. Flag: EPI is left-of-center; methodologically transparent. SUPPLEMENTS PPS with regional/macro spillovers.	Capital Report v3 §3.3; federal workforce macro

352	GAO-26-108719, “Federal Agency Workforce Changes: Update for January to June 2025” <i>gao.gov/products/gao-26-108719</i>	Gov/Agency Tier A	Confirms staffing decline at nearly all 24 CFO Act agencies. Methodological caveat: GAO is descriptive, not evaluative on cost.	Capital Report v3 §3.3; federal workforce baseline
353	OPM Final Rule 91 FR 5580, “Improving Performance, Accountability and Responsiveness in the Civil Service” (Schedule Policy/Career, effective March 9, 2026) <i>federalregister.gov</i>	Law/Court Tier A	OPM official estimate: ~50,000 positions to be reclassified. Plaintiffs in NTEU v. Vought (D.D.C.) argue actual number could be far higher; as of May 2, 2026, no confirmed count of post-conversion positions has been published — flag as reporting gap .	Capital Report v3 §3.3; Schedule Policy/Career
354	CRFB, “Potential Savings from Shrinking the Federal Workforce” <i>crfb.org/blogs/potential-savings-shrinking-federal-workforce</i>	Think Tank Tier B	Pre-2025 estimate: 10% civilian reduction would save ~\$350B over 10 years; 25–33% reduction \$900B–\$1.2T. Counter-figure to PPS cost estimates, but ignores transition costs. No CBO score of the 2025 RIFs/DRP exists — CBO has stated inability to score under Byrd Rule.	Capital Report v3 §3.3 (counter-figure)
355	Resources for the Future, Roy & Palmer, “Hidden Costs of Repealing EPA’s Carbon Pollution Standards” (IB 25-10, August 6, 2025) <i>media.rff.org/documents/IB_25-10.pdf</i>	Think Tank Tier A	Avoided compliance cost ~\$75B NPV; health damages \$157–476B NPV; climate damages \$109–497B NPV. Net societal cost of repeal: \$198–855B; health damages alone are 2.3–4× avoided compliance costs. Combined CPS repeal + OBBBA effect: net +\$67–97/year higher household electricity bills in 2030s. SUPERSEDES EPA’s June 2025 RIA cost-benefit analysis.	Capital Report v3 §3.4; deregulation
356	Federal Reserve, Financial Stability Report (Nov 2025) <i>federalreserve.gov/publications/files/financial-stability-report-20251107.pdf</i>	Gov/Agency Tier A	Identifies elevated policy-uncertainty risk; hedge-fund leverage at/near decade high; AI-driven sentiment cited by ~30% of NY Fed market contacts as top near-term risk. Does not explicitly score deregulation fiscal cost.	Capital Report v3 §3.4; financial stability
357	Office of Financial Research 2025 Annual Report (Nov 19, 2025) <i>financialresearch.gov/annual-reports/files/OFR-AR-2025.pdf</i>	Gov/Agency Tier A	Hedge-fund positions +\$1T to ~\$4.1T in 2025; CRE office delinquencies 11.1% CMBS; 9M+ student loan borrowers delinquent. Treasury announced March 2026 RIFs at OFR proposing 60% staff cut — relevant fiscal-feasibility flag .	Capital Report v3 §3.4; financial stability

DNC 2024 PLATFORM COMPONENT SOURCES — 7 cross-Cat entries (v9: 361–366, 369; span Cat 2 fiscal & Cat 3 healthcare)

Capital Report v3 §4 component-level breakdown of the DNC 2024 platform (CTC + EITC, housing, drug pricing). Several are extracts from upstream papers already registered in Cat 2 (Sources 10, 13) but support distinct specific claims.

#	Source · URL	Type	Key Finding	Documents Supported
These seven sources support the Capital Report v3 §4 component-level breakdown of the DNC 2024 platform (CTC + EITC, housing, drug pricing). Some are extracts of findings from upstream papers already registered in v8 (e.g., the PWBm Aug 2024 paper at Source 13 also yields the component-level findings at Sources 361 and 364); these are treated as separate registry entries because they support distinct specific claims, with cross-references to upstream where applicable. Sources span Cat 2 (fiscal) and Cat 3 (healthcare) but are rendered here as a single cluster following v9 treatment.				
361	PWBm Aug 26, 2024 — CTC component breakdown (extract from upstream Source 13) <i>budgetmodel.wharton.upenn.edu/issues/2024/8/26/harris-campaign-policy-proposals-2024</i>	Think Tank Tier A	CTC expansion to \$3,000/\$3,600: –\$1.662T; \$6,000 newborn: –\$132B; EITC: –\$126B. Subtotal ~\$1.92T/10yr. Same upstream paper as Sources 13 and 360; registered separately for the component-level finding.	Capital Report v3 §4.2; DNC platform tax credits
362	CRFB Oct 28, 2024 — CTC + EITC bundle component (extract from upstream Source 10) <i>crfb.org/papers/fiscal-impact-harris-and-trump-campaign-plans</i>	Think Tank Tier B	CTC + EITC bundle: –\$1.40T central (FY2026–2035). Component-level extract from CRFB Oct 2024 aggregate Harris/Trump fiscal analysis (Source 10).	Capital Report v3 §4.2; DNC platform tax credits

363	Tax Policy Center, Gleckman (Oct 10, 2024) — Harris tax credits combined <i>taxpolicycenter.org/taxvox/key-harris-tax-credits-would-largely-benefit-low-and-middle-income-households</i>	<i>Think Tank</i> Tier A	CTC + EITC + first-time homebuyer combined ~\$2T/10yr. >70% of households earning ≤\$113K benefit from at least one. Distributional analysis: tax credits concentrate among low- and middle-income households.	Capital Report v3 §4.2; DNC platform tax credits
364	PWBM — \$25K first-time homebuyer credit (extract from upstream Source 13) <i>budgetmodel.wharton.upenn.edu/issues/2024/8/26/harris-campaign-policy-proposals-2024</i>	<i>Think Tank</i> Tier A	\$25K first-time homebuyer credit (4-year duration): ~\$138B/10yr; supports 1.4M buyers/yr. Same upstream paper as Sources 13, 360, 361.	Capital Report v3 §4.2; DNC platform housing
365	CRFB Housing bundle — extract from upstream Source 10 <i>crfb.org/papers/fiscal-impact-harris-and-trump-campaign-plans</i>	<i>Think Tank</i> Tier B	Housing bundle (homebuyer + \$40B innovation fund + LIHTC + NHTC + builder incentives): ~\$250B central; low \$200B / high \$500B if homebuyer credit permanent. Component extract from CRFB aggregate (Source 10).	Capital Report v3 §4.2; DNC platform housing
366	Tax Foundation — Housing tax credits combined <i>taxfoundation.org</i>	<i>Think Tank</i> Tier B	Combined housing tax credits ~\$223B (2025–2034 conventional). Independent third-party scoring of the housing-affordability component.	Capital Report v3 §4.2; DNC platform housing
369	CRFB drug pricing analysis — extension scenario <i>crfb.org</i>	<i>Think Tank</i> Tier B	Central +\$250B savings over 10 years from extending IRA drug-negotiation authority. Companion to existing CBO IRA negotiation score (Source 60: \$98.5B base, now reduced by ~\$8.8B due to OBBBA orphan-drug expansion).	Capital Report v3 §4.2; DNC platform drug pricing

AUDIT LOG

Each audit of this document is recorded here. When a new audit is performed, a new entry is appended. Entries are never removed or edited retroactively. The log is a permanent transparency record. Audits 1–5 are recorded as completed during the v8 production cycle (April 29 – May 1, 2026). Audit 6 is the v9 Capital Report v3 source-additions expansion edition (May 2, 2026). Audit 7 is the v10 full aggregated rebuild (May 2–3, 2026). Audit 8 is the present v11 Retroactive Tier Overlay edition (May 3, 2026), which assigns evidence-tier ratings (A/B/C/D) to all 298 v8-lineage sources retroactively, completing the tier-rating coverage of the SRG.

AUDIT 1 · April 29, 2026 · Producing: v3 (integrity-audited edition)

Conducted by: Claude (Anthropic, claude-sonnet-4-6) in collaboration with D. Sintetos

Scope	All 213 entries (v8 numbering at time of audit). Description accuracy verified against known source content. Attribution checked. Source quality and classification reviewed. URL plausibility assessed.
Method	Knowledge-based verification (training knowledge through August 2025). Network access was disabled; URLs were assessed for plausibility and format, not live-verified. All URL findings were preliminary pending live re-verification.
Errors found and corrected	20 corrections applied. Sources affected: 22 (TPC TCJA description merge), 45 (Fortin URL flag), 53 (Turnaway Study lead PI), 67 (De Loecker description bundling), 72 (REStat publisher), 79 (REStat publisher), 83 (Baicker & Chandra finding scope), 97 (OSHA inspector ratio attribution), 101 (ALA \$32:\$1 attribution), 108 (Zuboff publisher), 109 (Twenge URL typo), 120 (UMD PPC URL), 121 (Harvard Journal on Legislation URL), 130 (Ornstein institutional affiliation), 150 (POGO cost ratio), 152 (Microsoft type reclassification), 159 (RTI/NCO-PNT GPS attribution), 164 (NIBS pre-disaster ROI), 175 (Ikenberry book reclassification), 191 (FRBSF attribution flag).
Quality flags noted (not corrected)	(A) Sources 192–199 are deliberate duplicates of earlier entries for methodology navigation. (B) Source 28 bundles CBO WP 2012-08 with Ramey multiplier research. (C) Source 104 bundles USBR drought data with NAS desalination cost. (D) Source 213 is a composite of three organizations. (E) Several URLs are general domain roots requiring re-verification. (F) Source 15 (Saez-Zucman) description should note adaptation more precisely. (G) Source 65 (Yale SOM) is too vague — consider specific citation in next revision.

AUDIT 2 · April 29, 2026 · Producing: v5 (URL verification edition)

Conducted by: Claude (Anthropic, claude-sonnet-4-6) — extended research task (Phase 1A) + build integration (Phase 1B)

Scope	30 URLs verified via live network access. Priority groups: confirmed wrong (Group A), unverifiable attributions (Group B), government/think tank specific URLs (Group C), constitutional law citations (Group D), academic sources (Group E).
Method	Live URL verification via extended research agent with external network access. All URLs visited and confirmed against claimed source content.
Corrections applied	21 corrections applied (15 verified correct; 8 URL replacements; 4 journal-root → specific article URLs; 3 underlying citation errors; 2 CBO document mismatches). Sources affected: 45 (Fortin URL + author names + journal), 57 (CBO public option document number), 72 (REStat URL to MIT Press), 79 (REStat URL to MIT Press), 91 (CBO IRA document number flag), 109 (Haidt sole authorship), 118 (Gilens & Page URL upgrade), 120 (UMD PPC URL), 121 (Harvard JOL URL), 141 (JJP article URL), 153 (Fortna editorial flag — two candidate URLs registered), 184 (Snyder & Strömberg journal from AER to JPE), 191 (Barnichon authors + year), 200 (Bruen URL upgrade), 201 (Maryland Shall Issue docket correction), 202 (Rahimi opinion PDF URL), 203 (Moore citation volume), plus PWBm (Trump 2024, Harris 2024, Trump tariffs) and Sarin-Summers verified.
Open items carried forward	Source 153 (Fortna): maintainer must confirm whether book or ISQ article was intended. Source 91 (IRA manufacturing): maintainer should confirm CBO doc given substantially revised later projections.

AUDIT 3 · April 30, 2026 · Producing: v6 (Constitutional Law Research Edition)*Conducted by: Claude (Anthropic, claude-sonnet-4-6) — Phase 2 constitutional law research applied*

Scope	58 new sources added (Sources 214–271) from Phase 2 constitutional law research across seven research groups: Group A (Second Amendment/Bruen), Group B (Sixteenth Amendment/Taxation), Group C (First Amendment/Data), Group D (Spending Clause/Coercion), Group E (Article III/Governance), Group F (Speech or Debate Clause), Group G (Byrd Rule/Reconciliation). New Category 17 established.
Notable inclusions	Louisiana v. Callais (608 U.S. ___, decided April 29, 2026 — VRA Section 2 narrowed to intent-based test, Source 266); One Big Beautiful Bill Act (Pub. L. 119-21, controlling 2025 Byrd bath precedent, Source 271); Moody v. NetChoice (603 U.S. 707, 2024, Source 231); FCC v. Consumers' Research (606 U.S. 656, 2025, Source 259); Free Speech Coalition v. Paxton (606 U.S. 461, 2025, Source 232); NetChoice v. Bonta CAADCA Round 2 (9th Cir. Mar. 2026, Source 233).
Total source count after audit	271

AUDIT 4 · May 1, 2026 · Producing: v7 (Ecosystem-Wide Source Mapping Edition)*Conducted by: Claude (Anthropic, claude-sonnet-4-6) — Step 4 ecosystem-wide source mapping applied*

Scope	All 297 sources (v8 numbering) mapped to specific Framework proposals (Props 1–65), bill document IDs (Bills 1–12, current versions), and cross-cutting documents (Capital Report, Comp Docs, ConstitutionalResearch document by Group). The Ecosystem Path column (gold) now functions as a full navigation index across the ecosystem.
Sources updated	All 271 entries (Ecosystem Path column updated). No new sources added; total source count: 271.
Open flags carried forward	Source 153 (Fortna — book vs. journal unresolved; maintainer must confirm). Source 91 (CBO IRA manufacturing doc — maintainer to confirm correct document). DIR Bill 11 revised to _5 this session (Callais redistricting fix; Track B savings clause fix). Ecosystem Index updated to v29.

AUDIT 5 · May 1, 2026 · Producing: v8 (UT Implementation Research — Phase 3)*Conducted by: Claude (Anthropic, claude-sonnet-4-6)*

Scope	26 new sources added (272–297) as Category 18: UT Implementation Research — Phase 3. Sources cover 30 sub-questions across 5 research groups: infrastructure implementation timelines (FAA NextGen, USPS fleet, NEC/Gateway, California HSR, OPM hiring, NASA); environmental/food/marine/agricultural (NOAA fisheries rebuilding, NOAA aquaculture plan, USDA AFIDA, USDA REAP, Packers and Stockyards, CFIUS CY2024, EPA/Basel); defense/security/diplomatic (DoD Cyber Workforce Strategy, CYBERCOM, War Powers, DoD audit, UN peacekeeping, AmeriCorps/ACC); domestic program scaling (Norway GPFG, CT Baby Bonds, CBO Social Security, DEA cannabis, Tennessee Promise, WOTC/Apprenticeship, HHS reorganization); rights/governance/regulatory (FTC rulemaking, ATF NFA processing, Maryland HQL, FBI NICS, Election Day holiday).
Evidence quality	22 Tier A (rigorous government/longitudinal data); 7 Tier B (well-documented with methodological gaps); 1 meaningful evidence gap (Prop 17 Election Day holiday — no top-tier study exists; best evidence ~0 effect).
Score revisions informed by this audit	Prop 17 (Voting Holiday) UT=4→UT=3 · Prop 28 (Advertising Laws) UT=4→UT=3 · Prop 39 (Shoreline/Fishery) UT=4→UT=3 · Prop 53 (Domestic Food) UT=4→UT=3 · Prop 54 (Marine Life & Aquaculture) UT=4→UT=3 · Prop 63 (International Property) UT=4→UT=3. Four additional proposals confirmed at current UT score: Prop 12 Drug Rescheduling (UT=2 confirmed); Prop 15 Social Security (UT=2 confirmed); Prop 44 High-Speed Rail (UT=2 confirmed); Prop 13 Universal Healthcare (UT=1 confirmed).
Open flags	Source 153 (Fortna — book vs. journal unresolved). Source 91 (IRA manufacturing CBO doc — maintainer to confirm). Ecosystem Index updated to v30 this session.

AUDIT 6 · May 2, 2026 · Producing: v9 (Capital Report v3 Source Additions / Audit 6 Expansion Edition)*Conducted by: Claude (Anthropic, Opus 4.7) in collaboration with D. Sintetos*

Approach	Approach C — Audit 6 Expansion Edition (B-now); full v10 aggregated rebuild was queued as a separate session task (executed as Audit 7 below).
Sources added	73 new sources (Sources 300–372). Total ecosystem source count after audit: 297 (v8) + 73 (v9) = 370 unique sources.
Categories	2 new categories established. Cat 19 Tariff & Trade Modeling — Post-SCOTUS (10 sources, 339–348); Cat 20 Federal Workforce & Regulatory Costs (9 sources, 349–357). Total categories: 20.
Maintainer resolutions	Source 91 (CBO IRA Manufacturing) augmented by Source 326 (Peterson Foundation, OBBBA energy tax policy). Source 153 (Fortna) split into 153a (Princeton UP book) / 153b (ISQ journal article). Both flags from Audits 1, 2, and 5 resolved.
Methodology	Sources drawn from the Capital Report v3 source apparatus (May 2026), where each citation was inline-tagged with evidence tier (A/B/C/D) and cross-referenced to the SRG by source number. v9 reproduced the tier ratings in the Type column and preserved the same SRG number assignments. URLs not live-verified for this audit (network-disabled session); all formatted consistently and traceable to the source publication.
Per-category breakdown	Cat 1 (Taxation): 3 new (310, 316, 317). Cat 2 (Fiscal Modeling): 20 new (300–302, 308, 309, 311, 328–338, 358–360) — largest single addition. Cat 3 (Healthcare): 8 new (319–324, 367, 368). Cat 4 (Economy): 4 new (312–315 antitrust). Cat 5 (Infrastructure): 7 new (307, 325–327, 370–372). Cat 14 (Scoring Methodology): 4 new (303–306 multiplier literature). Cat 15 (Constitutional Law Architecture): 1 new (318 Moore re-registration). Cat 19 (NEW — Tariff & Trade Post-SCOTUS): 10 new (339–348). Cat 20 (NEW — Federal Workforce & Regulatory): 9 new (349–357). DNC component cluster: 7 new (361–366, 369). Numbering gap: 298–299, 359, 372 left unassigned for various reasons (some intentional spacing, some deferred late additions).

AUDIT 7 · May 2–3, 2026 · Producing: v10 (Full Aggregated Rebuild)*Conducted by: Claude (Anthropic, Opus 4.7) in collaboration with D. Sintetos*

Approach	Five-pass sequenced rebuild merging v8 (297 sources, 18 categories, Audits 1–5) and v9 (73 sources, 2 new categories + DNC cluster, Audit 6) into a single canonical edition with consistent design tokens, structural normalization, and unified front matter. Each pass shipped as an in-progress build artifact for review-gate approval before proceeding to the next pass.
Sources	370 unique sources, 371 entries (Source 153 split into 153a/153b adds the +1 entry). v8 lineage: 298 entries (297 v8 numbers + 1 net add from 153 split). v9: 73 entries (300–372).
Categories	20 numbered categories + DNC component sources cross-Cat cluster (7 sources, 361–366, 369; rendered as a separate cluster following v9 treatment, supports Capital Report v3 §4 component-level breakdowns).
Tier overlay scope	Decision confirmed (Option A): tier ratings present on Sources 300–372 only, where they were applied at registration in v9 (Audit 6). Retroactive tier rating for Sources 1–297 deferred to Audit 8 — Retroactive Tier Overlay , a dedicated future audit. v10 is a structural rebuild, not a re-evaluation.
Maintainer resolutions verified and rendered	Source 91 (CBO IRA Manufacturing) carries a teal “RESOLVED Audit 6” badge with cross-reference to Source 326. Source 326 (Peterson Foundation OBBBA energy tax policy) carries a gold “AUGMENTS Source 91” badge. Source 153 split into 153a (Fortna 2008 Princeton UP book, classified Peer Review (book)) and 153b (Fortna 2004 ISQ article, classified Peer Review (journal)); both carry the teal “RESOLVED Audit 6” badge. Original Source 153 entry is removed. Numbering gaps 298–299 preserved to maintain v8/v9 boundary.
Methodology and constraints	URLs not live-verified for this rebuild (network-disabled session, deferred to Audit 8+). Design tokens, layout, and citations carried forward from v8/v9 with structural normalization. Stale stat-strip references from v8 (“213 sources / 19 categories”) corrected to accurate v10 totals (370 sources / 20 categories). Closing language from v8 (“16 categories” stale reference) replaced with v10-accurate audit log + maintainer resolutions sections.
Open items carried forward to Audit 8+	Live URL re-verification across all 370 sources. Retroactive evidence-tier overlay for Sources 1–297. Yale SOM Source 65 specific-paper citation. Source 28 (CBO/Ramey) and Source 104 (USBR/NAS) bundling consideration.

AUDIT 8 · May 3, 2026 · Producing: v11 (Retroactive Tier Overlay Edition)*Conducted by: Claude (Anthropic, Opus 4.7) in collaboration with D. Sintetos*

Approach	Two-phase audit: Phase 1 produced findings document with proposed tier (A/B/C/D) and one-line rationale for every v8-lineage source (298 entries: 297 v8 numbers + 153a/153b split). Author reviewed and approved all defaults, including 12 explicitly-flagged ambiguous calls and one structural question (Sources 192–199 kept as standalone with own tier ratings rather than merged to cross-references). Phase 2 (this build) applied the approved tiers and produced this canonical v11 edition.
Sources tiered	298 v8-lineage sources tiered. Distribution: 216 Tier A, 65 Tier B, 17 Tier C, 0 Tier D. No Tier D assigned because v8 sources were curated to anchor the policy framework, not to provide adversarial outlier reads; the Tier D “partisan-aligned outlier with explicit advocacy framing” rating remains reserved for v9’s Sources 338 and 359, which are the canonical Tier D entries in the SRG.
Per-category breakdown	Cat 1 (11A/11B/1C/0D), Cat 2 (8/7/0/0), Cat 3 (17/8/0/0), Cat 4 (11/6/4/0), Cat 5 (15/4/1/0), Cat 6 (16/9/5/0), Cat 7 (10/0/1/0), Cat 8 (7/6/2/0 — includes 153a/153b), Cat 9 (8/1/1/0), Cat 10 (4/3/0/0), Cat 11 (2/1/1/0), Cat 12 (3/1/1/0), Cat 13 (4/2/0/0), Cat 14 (6/2/0/0 — includes 192–199 kept standalone), Cat 15 (11/0/0/0), Cat 16 (1/2/0/0), Cat 17 (57/1/0/0 — lone B is Source 239 Balkin), Cat 18 (25/1/0/0 — lone B is Source 287 CT Baby Bonds + Urban Institute blend).
Ambiguity flags resolved	12 entries flagged for explicit author decision (defaults retained for all): Source 23 Tax Foundation Tariff Tracker (B); Source 31 PWBm Trump Tariffs (B — not D-rated despite v9 precedent on related PWBm tariff modeling); Source 61 Vera Institute (B); Source 65 Yale SOM (C — specific paper still unresolved, carried forward as v11 open item); Source 68 CEA Biden (B); Source 88 CHIPS/SIA blended (B); Source 109 Haidt/Twenge (B); Source 130 Fix the Court/Ornstein (C); Source 137 McKinsey 2009 (C); Source 150 GAO+POGO blended (B); Source 188 Himmelstein & Woolhandler (B); Source 197 World Bank WGI (B). Structural question: Sources 192–199 (methodology-reference duplicates) kept as standalone entries with own tier ratings (rather than merged to “see Source N” cross-references).
Bundled maintenance fix	Source 20 Moore citation corrected. v10 carried the pre-Audit-2 stale citation “Moore v. United States, 600 U.S. 771 (2024)” at Source 20 in Cat 1 (Taxation & Fiscal Policy). v10 Source 203 (Cat 15) had the corrected “602 U.S. 572”. v11 Source 20 now reads “Moore v. United States, 602 U.S. 572 (2024)” with full opinion-PDF URL (supremecourt.gov/opinions/23pdf/22-800_jg6o.pdf) and explicit cross-reference to Source 203. This was flagged in the Framework Sourced ref-review audit (P0-3, May 3, 2026) and bundled into Audit 8 because both touch the same canonical document (v10 SRG).
Methodology and constraints	Tiering was knowledge-based, not URL-live-verified. Network was disabled for this session. Tier definitions carried forward unchanged from v9/Audit 6 (no methodology drift). Calibrated conservatism applied: when ambiguous between two tiers, the lower tier was the default (per the same principle applied throughout the scoring methodology). Tier overlay scope note in front matter updated from “Sources 300–372 only” to “all sources.”
Full SRG distribution after Audit 8	371 entries total (370 unique sources + 153a/153b split). By tier: 265 A · 87 B · 17 C · 2 D = 371. By layer: v8 lineage 298 entries (216A/65B/17C/0D); v9 layer 73 entries (49A/22B/0C/2D — unchanged from v10).
Open items carried forward to Audit 9+	Live URL re-verification across all 370 sources (still deferred). Yale SOM Source 65 specific-paper citation (still unresolved). Source 28 (CBO/Ramey) and Source 104 (USBR/NAS) bundling consideration. Possible future re-tiering if any source’s institutional posture or methodology becomes substantively contested.

MAINTAINER RESOLUTIONS

This section documents the two cross-cutting maintainer resolutions in v10. Both originated as open flags in earlier audits and were resolved during Audit 6 (v9). Both are preserved here as permanent reference for any reader following a citation by source number.

Source 91 — CBO IRA Manufacturing Credits (augmented by Source 326)

Flag origin	Audit 1 (April 29, 2026): publication number flagged. CBO pub/58278 cited in pre-audit registration was S. 4166 (Technological Hazards Preparedness Act, a FEMA bill), not the IRA manufacturing credits document. Audit 2 (April 29, 2026): URL corrected to CBO Aug. 3, 2022 IRA cost estimate (hr5376_IR_Act_8-3-22.pdf). Per-source flag carried forward through Audits 2–5 pending maintainer confirmation that the CBO Aug 2022 doc was the intended citation given substantially revised later projections.
Resolution	Audit 6 (May 2, 2026): Source 91 is retained with the corrected CBO Aug. 2022 URL. The key finding now references both the original CBO \$271B projection AND the subsequent CRFB/Goldman Sachs upward revisions to \$622B+ through 2031. Source 326 added as Peterson Foundation, “Energy Tax Policy Under the OBBBA” (pgpf.org), carrying an AUGMENTS Source 91 badge. Both entries are now mutually cross-referenced.
Rendering in v11	Source 91 in Cat 5 carries a teal “RESOLVED Audit 6 — see Source 326” badge. Source 326 in Cat 5 carries a gold “AUGMENTS Source 91” badge.

Source 153 — Fortna Peacekeeping (split into 153a / 153b)

Flag origin	Audit 1 (April 29, 2026): editorial flag noted that no Fortna (2008) article exists in International Organization (the originally cited journal). Audit 2 (April 29, 2026): two candidate citations registered pending maintainer confirmation — the Princeton UP book <i>Does Peacekeeping Work? Shaping Belligerents' Choices after Civil War</i> (2008), and the Fortna 2004 ISQ article “Does Peacekeeping Keep Peace? International Intervention and the Duration of Peace After Civil War,” ISQ 48(2):269–292.
Resolution	Audit 6 (May 2, 2026): Maintainer confirmed both citations are valid and complementary. Original Source 153 is removed and replaced by two new entries: 153a = Fortna (2008) Princeton UP book — the canonical empirical aggregation, classified as Peer Review (book); 153b = Fortna (2004) ISQ article — the precursor empirical paper, classified as Peer Review (journal). Both retain the original 50–85% conflict-recurrence reduction finding and are cross-referenced via the split badge.
Rendering in v11	Source 153 entry is removed from Cat 8 (Military & Defense). Sources 153a and 153b appear in its place, both carrying a teal “RESOLVED Audit 6 — Source 153 split into 153a / 153b” badge. Citation by number from any other ecosystem document should use 153a (book — default), 153b (journal article), or both as appropriate.

v11 canonical edition (Retroactive Tier Overlay). 370 unique sources · 371 entries (Source 153 split into 153a + 153b) · 20 categories + DNC component cluster · 8 audits logged in this document (Audit 8 = this v11 retroactive tier overlay). v8 lineage: 298 entries (297 v8 numbers + 1 net add from 153 split). v9: 73 entries (300–372). Tier overlay scope: all sources (Audit 8 closed the v8-lineage retroactive tier-rating gap on May 3, 2026). Full SRG distribution: 265 A · 87 B · 17 C · 2 D = 371. Re-verify all URLs before any public release.
