

AMERICAN RENEWAL INITIATIVE
HEALTHCARE · EDUCATION · INFRASTRUCTURE
Renew. Rebuild. Deliver.

The United States built something remarkable — a governing system, a broad middle class, and public institutions capable of keeping concentrated power in check. That system has been methodically weakened. The cost of living rises every year. The institutions meant to protect ordinary people have been hollowed out. Neither major party has offered a coherent plan to reverse it.

We have a plan.

01

FIX THE FOUNDATIONS

Healthcare, education, and infrastructure are not separate issues. They are the three pillars on which every advanced society's prosperity rests. We rebuild them.

02

SAME RULES FOR EVERYONE

Elected officials who trade on inside information. Corporations that break the law and pay fines as a cost of doing business. That ends.

03

BUILD WHAT LASTS

Domestic manufacturing. Energy independence. Semiconductor supply chains we control. Infrastructure jobs that can't be offshored.

WHAT WE DO RIGHT NOW

- Pre-fill your tax return. The government already has the information. Filing should take minutes.
- Cap childcare costs at 7% of household income. If we want parents working, we need childcare they can afford.
- Ban congressional stock trading. Same rules as everyone else. Full stop.
- Invest in domestic semiconductors and clean energy. National security that creates American jobs.
- Restore the inspectors and auditors that keep corporations honest. Accountability that pays for itself.

WHAT WE DON'T DO

- Start fights we can't win yet. We fix what's broken first, then expand what works.
- Make promises we can't keep in the first term. Everything builds from what we prove works.
- Depend on one person. The plan outlasts any candidate.
- Ask for trust without evidence. Half our agenda requires no congressional vote — it begins Day 1.

The window is open.

A detailed governing plan exists. Legislation is drafted. The framework is ready. What's needed is people willing to carry it forward.

Built to work.

The ideas belong to anyone willing to fight for them.
